

Situation of 27 March 2017 edition of the hours 14-next update 29-03-2017 hours 14, forecaster: LL

reliability: 90%

The snowpack is well consolidated; isolated releases from the steepest slopes from the afternoon.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2200 m  
T.average 1000: 5 °C  
T.average 2000: 1 °C

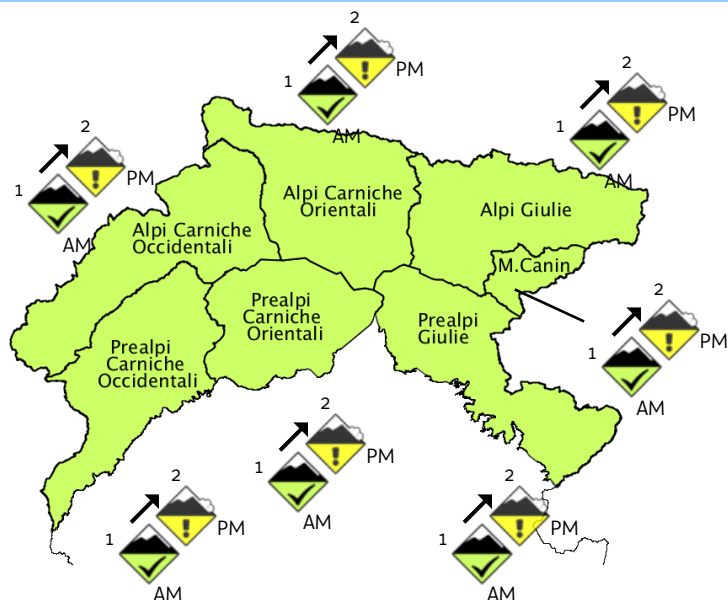

**Weather by OSMER - ARPA FVG:**  
Generally clear with increasing temperatures from the afternoon.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI -	1750	23	0	-4	8
VARMOST M.TE SIMONE	1870	23	0	-4	6
SELLA NEVEA - LIVINAL	1837	135	0	-3	6
PIANCAVALLO	1280	0	0	-2	8
TARVISIO	800	0	0	-4	8

**Snow cover conditions and avalanche danger:** The snowpack is present almost only to the N except for the main southern mountains where snow is present only above 1700-1800 m. The clear night and the decreasing temperatures led to load-bearing melt-freeze crusts. The snowpack is therefore generally consolidated and stable in the morning up to the highest altitudes. Temperatures will increase from the late morning (zero-degree line at 2200 m). Isolated releases will be possible from the afternoon, under rocks on very steep aspects. Forecast danger level: 1 (low) throughout the mountain territory.

Forecast for Tuesday 28 March 2017, reliability: 90%

In the warmer hours of the day possible real eases from very steep slopes.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

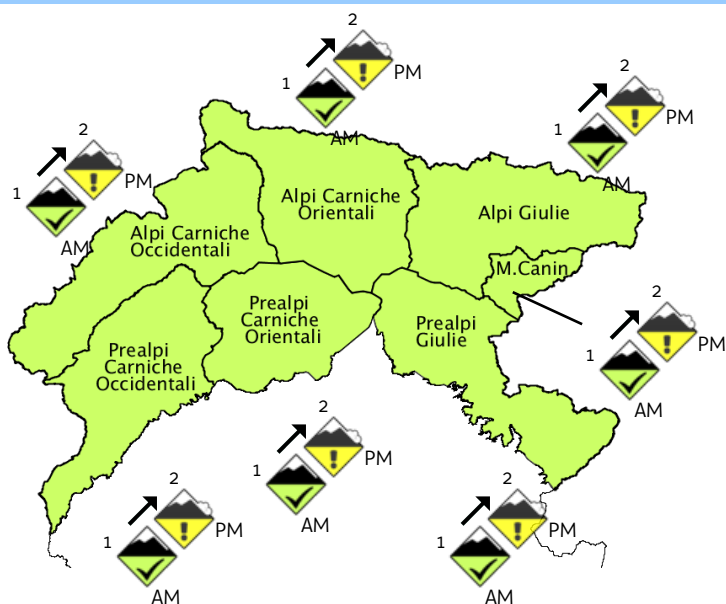

Thermal Zero: 2700 m  
T.average 1000: 10 °C  
T.average 2000: 4 °C

**Weather by OSMER - ARPA FVG:**  
Clear with strong thermal inversion in the valleys in the valleys.

**Snow cover conditions and avalanche danger:** Clear sky with zero-degree line at 2700 m. The snowpack will always be characterized by generally load-bearing melt-freeze crusts in the morning. From midday non-isolated releases of humid or wet snow may occur especially on sunny very steep aspects, under rocks and walls. Forecast danger level: 1 (low), increasing to 2 (moderate) from the afternoon.

Forecast for Wednesday 29 March 2017, reliability: 80%

In the warmer hours of the day possible real eases from very steep slopes.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

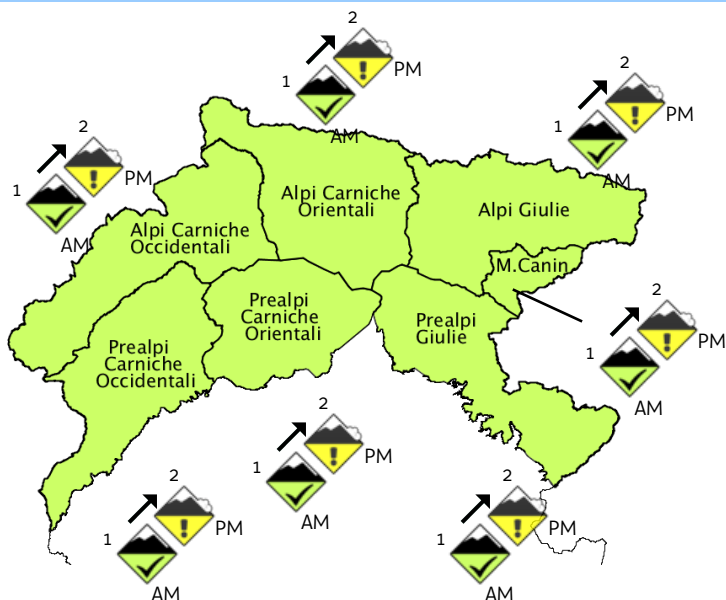

Thermal Zero: 2600 m  
T.average 1000: 13 °C  
T.average 2000: 5 °C

**Weather by OSMER - ARPA FVG:**  
Generally partly cloudy sky.  
Temperatures are on the rise in the valleys.

**Snow cover conditions and avalanche danger:** Partly cloudy sky. The snowpack will always be characterised by generally load-bearing melt-freeze crusts in the morning. From midday non-isolated releases of humid or wet snow may occur especially on sunny very steep aspects, under rocks and walls. Forecast danger level: 1 (low), increasing to 2 (moderate) from the afternoon.

Forecast for Thursday 30 March 2017, reliability: 80%

In the warmer hours of the day possible real eases from very steep slopes.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2700 m  
T.average 1000: 10 °C  
T.average 2000: 3 °C

**Weather by OSMER - ARPA FVG:**  
Variable weather on the mountains.

**Snow cover conditions and avalanche danger:** Variable sky with zero-degree line at 2700 m. The snowpack will still be characterised by generally load-bearing melt-freeze crusts in the morning. From midday non-isolated releases of humid or wet snow may occur especially on sunny very steep aspects, under rocks and walls. Forecast danger level: 1 (low), increasing to 2 (moderate) from the afternoon.
