

Situation of 07 April 2017 edition of the hours 14-next update 10-04-2017 hours 14, forecaster: GA

reliability: 80%

During warm hours possible releases from very steep slopes under the rocks.

Alpi Carniche occ., Prealpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2200 m  
T.average 1000: 7 °C  
T.average 2000: 1 °C

Weather by OSMER - ARPA FVG:

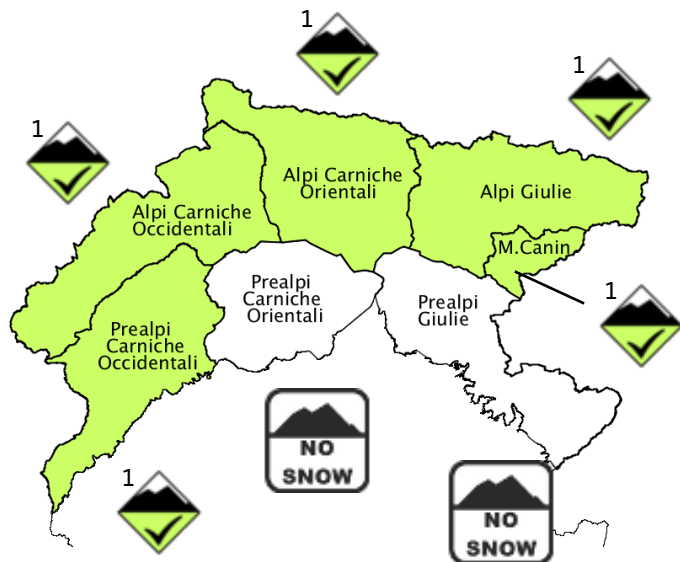

Sky generally variable in the afternoon.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI -	1750	0	0	-3	8
VARMOST M.TE SIMONE	1870	0	0	-2	9
SELLA NEVEA - LIVINAL	1837	112	0	-2	8
PIANCAVALLO	1280	0	0	1	8
TARVISIO	800	0	0	-1	17

**Snow cover conditions and avalanche danger:** Snow cover is thin and present only to the N, above 1600-1700 m. No snow on southern slopes, with the single exception of spring-like snow at the very highest altitudes. On the Giulie Alps and eastern Carniche Prealps snow is present only in limited areas to the N. No avalanche danger there. From the afternoon, releases of humid or wet snow may be possible from very steep slopes under rocks and walls below 2000-2100 m. Forecast danger level: 1 (low) on the Carniche and Giulie Alps and western Carniche Prealps. No danger on the eastern Carniche Prealps and the Giulie Prealps.

Forecast for Saturday 08 April 2017, reliability: 80%

In the morning the snowpack will be stable, danger will increase in the afternoon.

Alpi Carniche occ., Prealpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2600 m  
T.average 1000: 9 °C  
T.average 2000: 3 °C

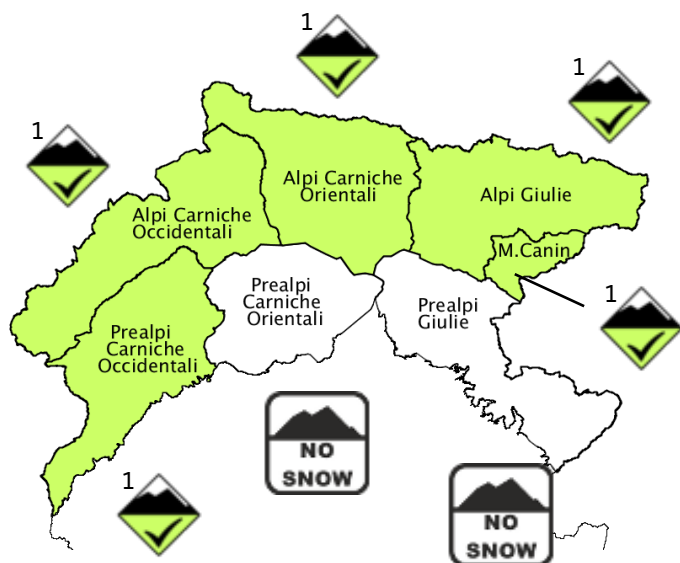

Weather by OSMER - ARPA FVG:

Partly cloudy in the morning; increasing cloudiness during the day.

**Snow cover conditions and avalanche danger:** Partly cloudy in the morning; increasing cloudiness during the day. Temperatures will be on the rise with zero-degree line at 2600 m. Snowpack generally stable and well consolidated in the morning. During warm hours releases of superficial humid or wet snow will be possible above 1900-2000 m from very steep slopes under rocks and walls, especially on the Canin, where snow thickness is higher. Under the same conditions small triggering of surface layers of humid or wet snow will be possible when transiting on skis. Forecast danger level: 1 (low) on the Carniche and Giulie Alps and western Carniche Prealps. No danger on the eastern Carniche Prealps and the Giulie Prealps.

Forecast for Sunday 09 April 2017, reliability: 80%

In the morning the snowpack will be stable, danger will increase in the afternoon.

Alpi Carniche occ., Prealpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2900 m  
T.average 1000: 10 °C  
T.average 2000: 5 °C

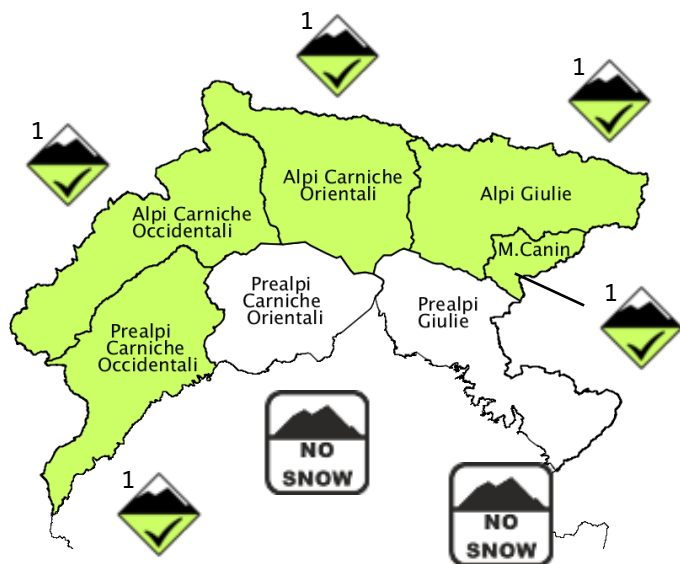

**Weather by OSMER - ARPA FVG:**

Partly cloudy in the morning;  
increasing cloudiness during the day,  
especially along the border with  
Cadore.

**Snow cover conditions and avalanche danger:** Partly cloudy in the morning; more variable during the day. Temperatures will be on the rise with zero-degree line at 2900 m. Snowpack generally stable and well consolidated in the morning. From the late morning releases of superficial humid or wet snow will be possible above 1900-2000 m from very steep slopes under rocks and walls. On the Canin, where the snowpack is thicker, small isolated avalanches may be possible. Under the same conditions small triggering of surface layers of humid or wet snow will be possible when transiting on skis. Forecast danger level: 1 (low) on the Carniche and Giulie Alps and western Carniche Prealps. No danger on the eastern Carniche Prealps and the Giulie Prealps.

Forecast for Monday 10 April 2017, reliability: 70%

During warm hours possible releases from very steep slopes under the rocks.

Alpi Carniche occ., Prealpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2800 m  
T.average 1000: 10 °C  
T.average 2000: 5 °C

**Weather by OSMER - ARPA FVG:**

Sky mainly variable.

**Snow cover conditions and avalanche danger:** Generally variable sky with zero-degree line at 2800 m. Avalanche danger will remain unchanged. From the late morning releases of superficial humid or wet snow will be possible above 1900-2000 m from very steep slopes under rocks and walls. On the Canin, where the snowpack is thicker, small isolated avalanches may be possible. Under the same conditions small triggering of surface layers of humid or wet snow will be possible when transiting on skis. Forecast danger level: 1 (low) on the Carniche and Giulie Alps and western Carniche Prealps. No danger on the eastern Carniche Prealps and the Giulie Prealps.
