

Situation of 12 April 2017 edition of the hours 14-next update 14-04-2017 hours 14, forecaster: DM

reliability: 90%

In the morning the snowpack will be stable, danger will increase in the afternoon.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2600 m
T.average 1000: 8 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:

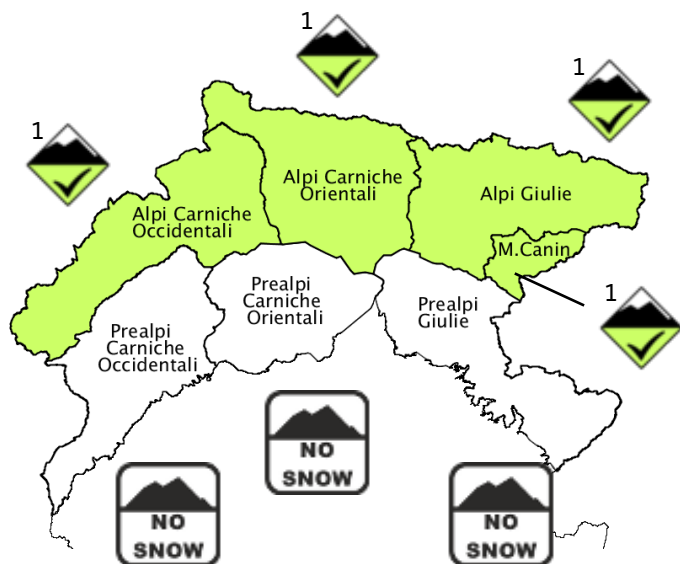

Partly cloudy with possible local rainfalls from the afternoon on the Prealps.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI -	1750	0	0	0	11
VARMOST M.TE SIMONE	1870	0	0	0	12
SELLA NEVEA - LIVINAL	1837	90	0	0	11
PIANCAVALLO	1280	0	0	2,6	12
TARVISIO	800	0	0	3	15

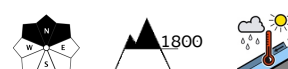

Snow cover conditions and avalanche danger: Very light precipitations on Tuesday do not change the stability of the snowpack, which is very thin and present only to the N and above 1500-1600 m. No snow to on S aspects, except for spring-like snow at the highest altitudes on the highest mountains. On the Prealps snow is present only in limited areas to the N. No avalanche danger there. From the afternoon, small and limited releases of humid or wet snow may be possible from very steep slopes under rocks and walls. Current danger level: 1 (low) on the Carniche and Giulie Alps. No danger on the Prealps due to absence of snow.

Forecast for Thursday 13 April 2017, reliability: 90%

In the morning the snowpack will be stable, danger will increase in the afternoon.

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2700 m
T.average 1000: 10 °C
T.average 2000: 4 °C

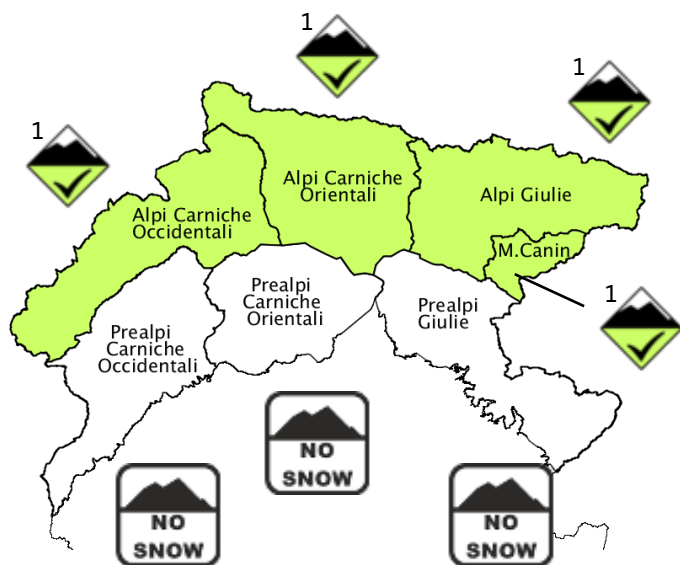

Weather by OSMER - ARPA FVG:

Partly cloudy with possible local rainfalls towards the evening.

Snow cover conditions and avalanche danger: The snowpack will be mostly stable and well consolidated to the N, where snow is still present. The snowpack will be characterised by load-bearing superficial crusts in the morning, which will weaken during the day due to increase in temperatures. Only small superficial releases will be possible during the warmest hours. Forecast danger level: 1 (low) on the Carniche and Giulie Alps. No danger on the Prealps due to absence of snow.

Forecast for Friday 14 April 2017, reliability: 90%

In the morning the snowpack will be stable, danger will increase in the afternoon.

Weather by OSMER - ARPA FVG:
Partly cloudy to variable with possible local rainfalls from the afternoon.

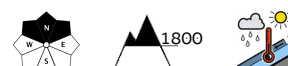

Snow cover conditions and avalanche danger: The snowpack will be mostly stable and well consolidated to the N, where snow is still present. The snowpack will be characterised by load-bearing superficial crusts in the morning, which will weaken during the day due to increase in temperatures. Only small superficial releases will be possible during the warmest hours. Forecast danger level: 1 (low) on the Carniche and Giulie Alps. No danger on the Prealps due to absence of snow.

Forecast for Saturday 15 April 2017, reliability: 90%

The snowpack is still stable although light precipitations will occur above 1700-1800 m.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2300 m
T.average 1000: 8 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:
Cloudy with widespread light to moderate precipitations, snow above 1700-1800 m.

Snow cover conditions and avalanche danger: On Saturday: light to moderate widespread precipitations, very little snow above approx. 1700-1800 m, which will not change the current situation and danger. The snowpack will continue to be mostly stable and well consolidated. Possible small releases of loose snow will be possible only in couloirs and from the steepest walls. Forecast danger level: 1 (low) on the Carniche and Giulie Alps. No danger on the Prealps due to absence of snow.
