PIANCAVALLO	1280	0	0	1,5	4,4
TARVISIO	800	0	0	5	14

Snow cover conditions and avalanche danger: The transitory perturbation that had passed through on Thursday the 4th brought only moderate snow precipitations above 1500 m. The snowpack, wherever is present, it's generally stable and well consolidated, except for the little amount of superficial new snow formed in the past snow falls, which may lead to small superficial avalanches above 1800-2000 m, along usual routes during the warmest hours. On the Prealps the snow is almost completely absent, except for the northern exposures where over 1800 m there are still sites with discontinuous coverage. Forecast danger level: 1 (low) of the Alps, rising to 2 (moderate) during the warmest hours; danger is absent on the Prealps. THIS IS THE LAST AVALANCHES BULLETIN FOR THE 2016-2017 SEASON.

Forecast for Saturday 06 May 2017, reliability: 80%

Small loose snow avalanches may be possible during the warmest hours on the Alps.

T.average 2000: 3 °C

Weather by OSMER - ARPA FVG:
Variable to cloudy, with possible rain falls in the afternoon. In the evening worsening, with snow above

Snow cover conditions and avalanche danger: On Saturday rising temperatures in altitude. On the Alps above 1800-2000m, the modest amount of new snow above the old snowpack might generate small loose snow releases and small avalanches along usual routes and from the steeper slopes. Below the top rows and the forks of the highest peaks there may be moderate deposits and accumulations, detachable if stressed. Forecast danger level: 1 (low) on the Alps rising to 2 (moderate) during the warmest hours, no danger on the Prealps. THIS IS THE LAST AVALANCHES BULLETIN FOR THE 2016-2017 SEASON.

Forecast for Sunday 07 May 2017, reliability: 80%

Small loose snow avalanches may be possible during the warmest hours on the Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

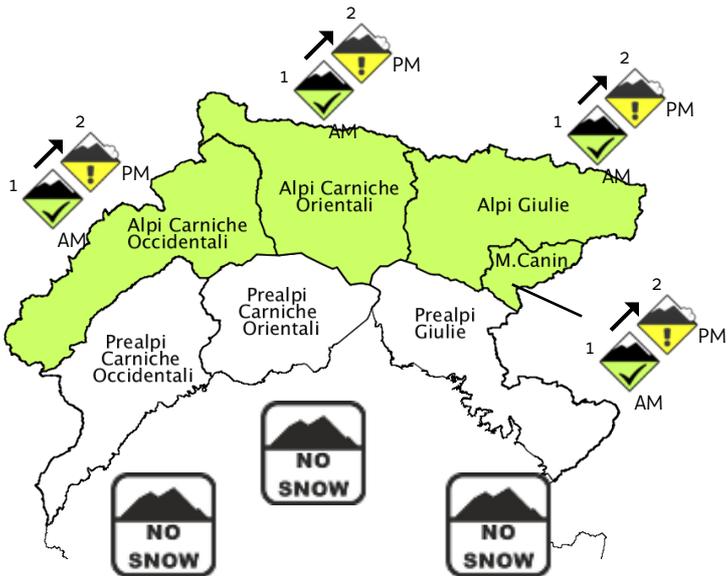

Thermal Zero: 2800 m
T.average 1000: 12 °C
T.average 2000: 5 °C

Weather by OSMER - ARPA FVG:
Early mornig cloudy, becoming clear thereafter; in the afternoon some rain falls may occur.

Snow cover conditions and avalanche danger: During the night between Saturday and Sunday there will be new precipitations, snow falls only above 2000m, low amounts (5-10 cm). Snowpack conditions and danger will not change. Snowshoes and small avalanches of loose snow and releases will be possible from steep slops and along usual routes on all aspects, because of the modest amount of new snow on the surface. Deposits of new snow below the top rows and the forks may detache if stressed. Forecast danger level: 1 (low) on the Alps rising to 2 (moderate) during the warmest hours, no danger on the Prealps. THIS IS THE LAST AVALANCHES BULLETIN FOR THE 2016-2017 SEASON.

Forecast for Monday 08 May 2017, reliability: 80%

Small loose snow avalanches may be possible during the warmest hours on the Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

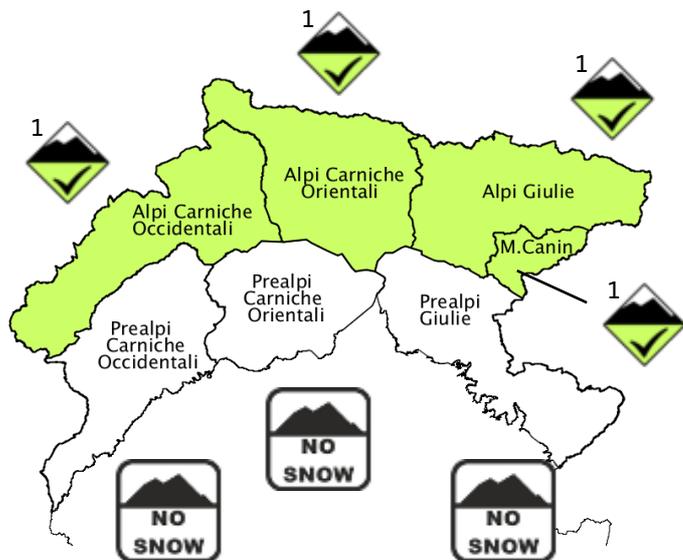

Thermal Zero: 2400 m
T.average 1000: 11 °C
T.average 2000: 3 °C

Weather by OSMER - ARPA FVG:
Good weather in the morning, variable with some precipitations in the afternoon.

Snow cover conditions and avalanche danger: On Monday possible scattered showers may occur in the afternoon, typical of spring season. Avalanche danger will be low everywhere; during the warmest hour danger may be rising because of the possibility of snow falls and small avalanches at weak surface cohesion from the steeper slopes. Forecast danger level: 1 (low) on the Alps rising to 2 (moderate) during the warmest hours, no danger on the Prealps. THIS IS THE LAST AVALANCHES BULLETIN FOR THE 2016-2017 SEASON.

Forecast for Tuesday 09 May 2017, reliability: 70%

Snowfall is predominantly stable and well-established.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Thermal Zero: 1800 m
T.average 1000: 6 °C
T.average 2000: -2 °C

Weather by OSMER - ARPA FVG:

Nice weather in the morning, variable with some precipitations in the afternoon.

Snow cover conditions and avalanche danger: On Tuesday a temperature drop is expected because of a cold air of polar origin. The snow cover is stable and well consolidated during the day, no avalanche activity. Forecast danger level: 1 (low) on the Alps, no danger on the Prealps. THIS IS THE LAST AVALANCHES BULLETIN FOR THE 2016-2017 SEASON.
