

Situation of 17 November 2017 edition of the hours 14-next update 20-11-2017 hours 14, forecaster: LL

reliability: 90%

Possible triggered avalanches with generally high overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1800 m
T.average 1000: 4 °C
T.average 2000: 0 °C

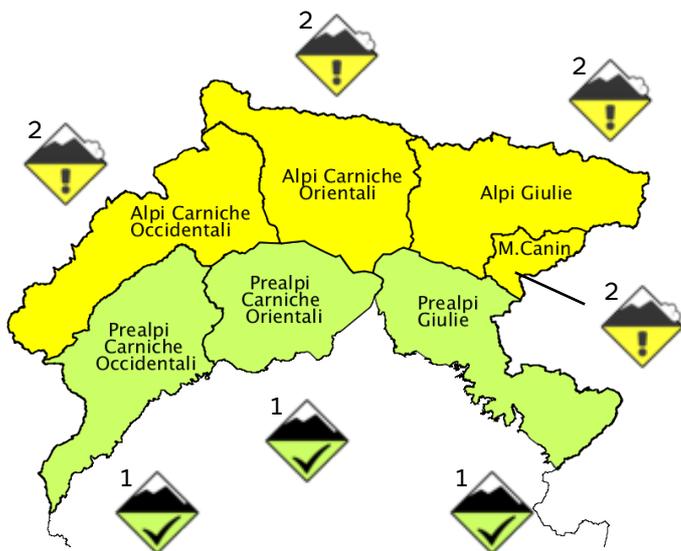

Weather by OSMER - ARPA FVG:
Variable cloudiness. On the Giulie Alps it is even overcast and in the evening possible sleet above 1000 m.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI -	1750	4	0	0	8
VARMOST M.TE SIMONE	1870	38	0	-1,3	4
SELLA NEVEA - LIVINAL	1837	90	0	1,1	4,7
PIANCAVALLO	1280	8	0	0,5	2,1
TARVISIO	800	50	0	1,3	6,5

Snow cover conditions and avalanche danger: On the Alps possible triggering of small and medium-sized avalanches with generally high overload, except on extremely steep slopes to the North above 1900 m, where there is the possibility of local low overload. The dangerous areas are located in the wind drift accumulation zones, usually clearly recognizable above 1900 m, especially to the North and at the highest altitudes. Forecast danger level: 2 (moderate). On the Prealps possible small-sized triggered avalanches with generally high overload. The dangerous areas are limited to the highest altitudes and to the North and there are small-sized wind accumulations. Forecast danger level: 1 (low). The snow cover is formed by eroded zones alternated at accumulations in couloirs. The temperature increase and decrease leads to a considerable snow cover consolidation, except for the northern aspects at the highest altitudes. The sun and the above-zero temperatures

Forecast for Saturday 18 November 2017, reliability: 80%

Possible triggered avalanches with generally high overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

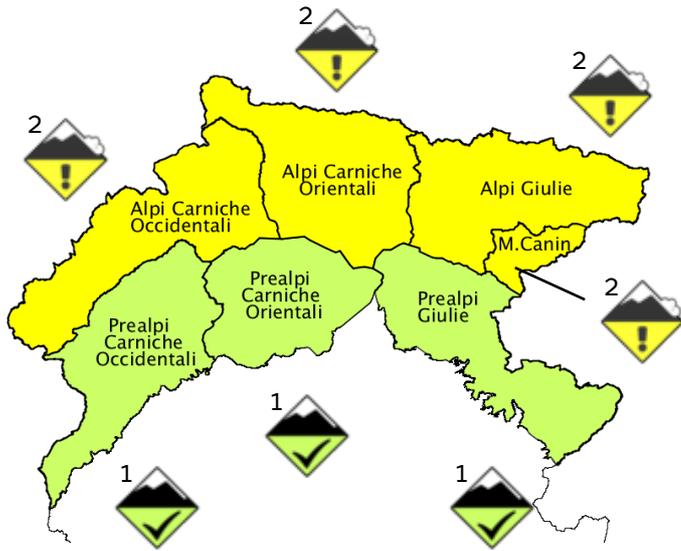

Thermal Zero: 1500 m
T.average 1000: 2 °C
T.average 2000: -2 °C

Weather by OSMER - ARPA FVG:
Clear sky or partly cloudy, in the morning possible variable to the East, especially above Tarvisio.

Snow cover conditions and avalanche danger: On the Alps possible triggering of small and medium-sized avalanches with generally high overload, except on extremely steep slopes to the North above 1900 m, where there is the possibility of local low overload. The dangerous areas are located in the wind drift accumulation zones, usually clearly recognizable above 1900 m, especially to the North and at the highest altitudes. Forecast danger level: 2 (moderate). On the Prealps possible small-sized triggered avalanches with generally high overload. The dangerous areas are limited to the highest altitudes and to the North and there are small-sized wind accumulations. Forecasts danger level: 1 (low).

Forecast for Sunday 19 November 2017, reliability: 80%

Possible triggered avalanches with generally high overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

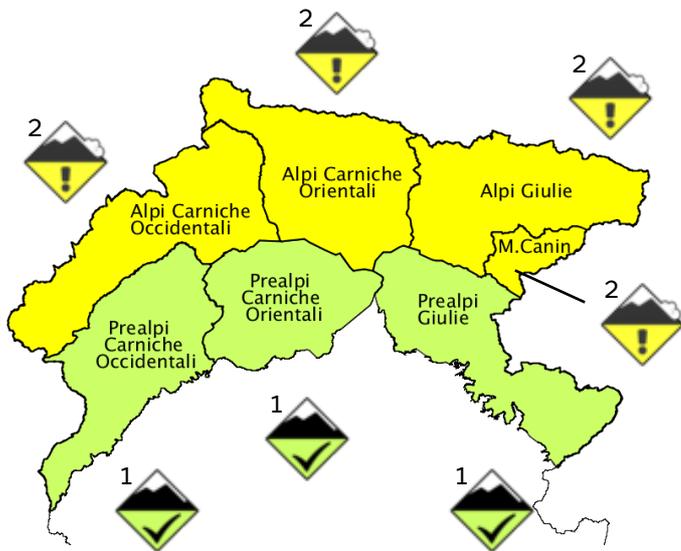

Thermal Zero: 1500 m
T.average 1000: 1 °C
T.average 2000: -5 °C

Weather by OSMER - ARPA FVG:
In the morning possible variable weather, improvement during the day. Northern Northwestern wind,

Snow cover conditions and avalanche danger: On the Alps possible triggering of small and medium-sized avalanches with generally high overload, except on extremely steep slopes to the North above 1900 m, where there is the possibility of local low overload. The dangerous areas are located in the wind drift accumulation zones, usually clearly recognizable above 1900 m, especially to the North and at the highest altitudes.
