

Situation of 20 November 2017 edition of the hours 14-next update 22-11-2017 hours 14, forecaster: LL

reliability: 90%

Possible spontaneous limited releases during the warmer hours and on sunny slopes.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

NW 20 km/h

T max T min

Thermal Zero: 1200 m
T.average 1000: 1 °C
T.average 2000: -4 °C

Weather by OSMER - ARPA FVG:

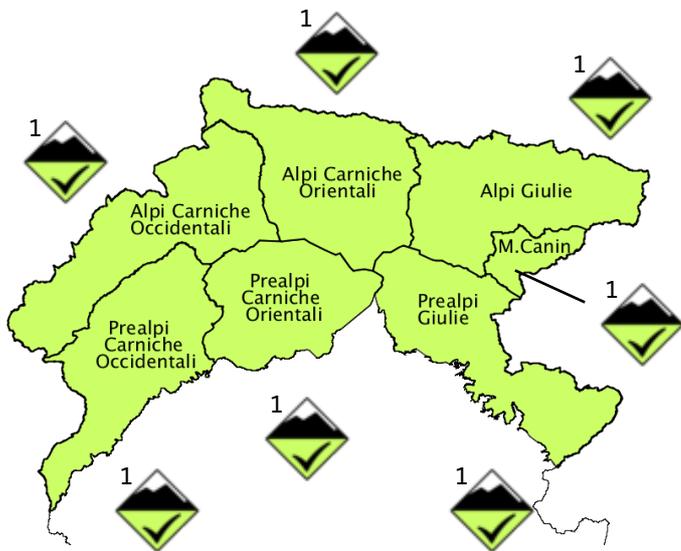

Clear sky or partly cloudy with moderate northwesterly wind.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI -	1750	2	0	-3	5,3
VARMOST M.TE SIMONE	1870	34	0	-4,9	1,9
SELLA NEVEA - LIVINAL	1837	81	0	-5,3	-0,6
PIANCAVALLO	1280	3	0	-5,3	5
TARVISIO	800	45	0	-6,3	3,2

Snow cover conditions and avalanche danger: The snow cover is well consolidated and settled. The sun and the above-zero temperatures over the last few days reduced the snow cover thickness, especially on southern aspects. Low avalanche danger across the whole territory. Possible limited releases and spontaneous small-sized avalanches on the surface during the warmer hours and on steeper sunny slopes, which are generally low cohesive. Forecast danger level: 1 (low) across the whole territory.

Forecast for Tuesday 21 November 2017, reliability: 80%

Possible spontaneous limited releases during the warmer hours and on sunny slopes.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

NW 20 km/h

T max T min

Thermal Zero: 2600 m
T.average 1000: 2 °C
T.average 2000: 3 °C

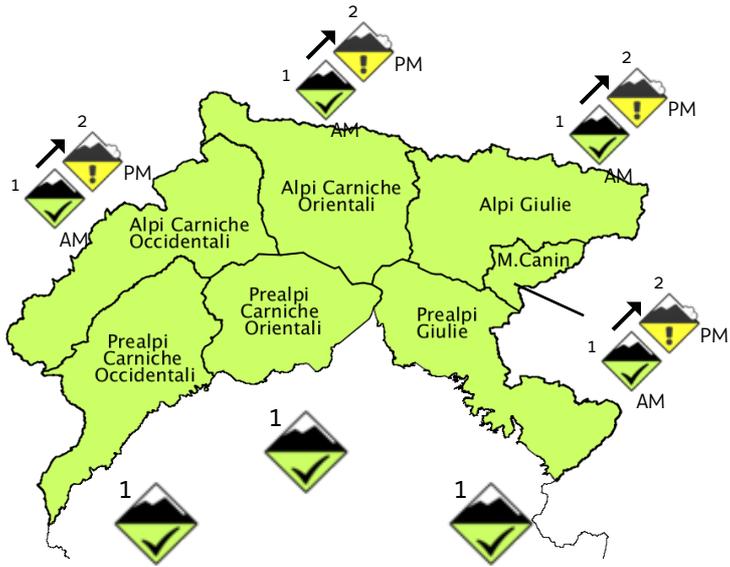

Weather by OSMER - ARPA FVG:

Early in the morning, mainly partly cloudy, later mostly cloudy, especially on the Giulie Prealpi.

Snow cover conditions and avalanche danger: A temperature increase is expected, avalanche danger is low across the whole territory though. Possible limited releases and spontaneous small-sized avalanches on the surface during the warmer hours and on steeper sunny slopes, which are generally low cohesive. Forecast danger level: 1 (low) across the whole territory.

Forecast for Wednesday 22 November 2017, reliability: 80%

Possible releases and spontaneous small-sized avalanches in the warmer hours and on sunny aspects.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

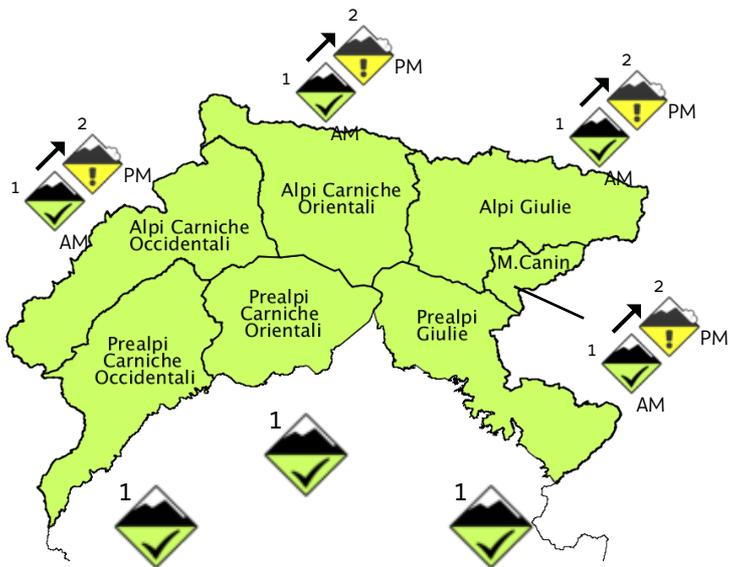

Thermal Zero: 3200 m
T.average 1000: 3 °C
T.average 2000: 4 °C

Weather by OSMER - ARPA FVG:
Mainly clear sky on the Alps, mild wind at altitude; variable and possible mist on the Prealps.

Snow cover conditions and avalanche danger: A considerable temperature increase is expected (thermal zero at 3200 m), reversals on valley floors with an increasing danger. On the Alps possible spontaneous small-sized avalanches above the tree line during the warmer hours and on sunny slopes, even down to the valley floor on steeper green slopes. Forecast danger level: 1 (low) increasing to 2 (moderate) during the warmer hours. On the Prealps possible limited releases and spontaneous small-sized avalanches on the surface during the warmer hours and on steeper sunny slopes, which are generally low cohesive. Forecast danger level: 1 (low).

Forecast for Thursday 23 November 2017, reliability: 70%

Possible releases and spontaneous small-sized avalanches in the warmer hours and on sunny aspects.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2800 m
T.average 1000: 3 °C
T.average 2000: 3 °C

Weather by OSMER - ARPA FVG:
Variable to partly cloudy, especially at altitude.

Snow cover conditions and avalanche danger: In the central part day, a mild temperature at altitude is still expected. On the Alps possible spontaneous small-sized avalanches above the tree line during the warmer hours and on sunny slopes, even down to the valley floor on steeper green slopes. Forecast danger level: 1 (low) increasing to 2 (moderate) during the warmer hours. On the Prealps possible limited releases and spontaneous small-sized avalanches on the surface during the warmer hours and on steeper sunny slopes, which are generally low cohesive. Forecast danger level: 1 (low).
