

Situation of 24 November 2017 edition of the hours 14-next update 27-11-2017 hours 14, forecaster: LL

reliability: 90%

**Possible isolated and spontaneous releases in the warmer hours and on sunny aspects.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

SW 10  
km/h

T max T min

Thermal Zero: 2700 m  
T.average 1000: 4 °C  
T.average 2000: 3 °C

**Weather by OSMER - ARPA FVG:**

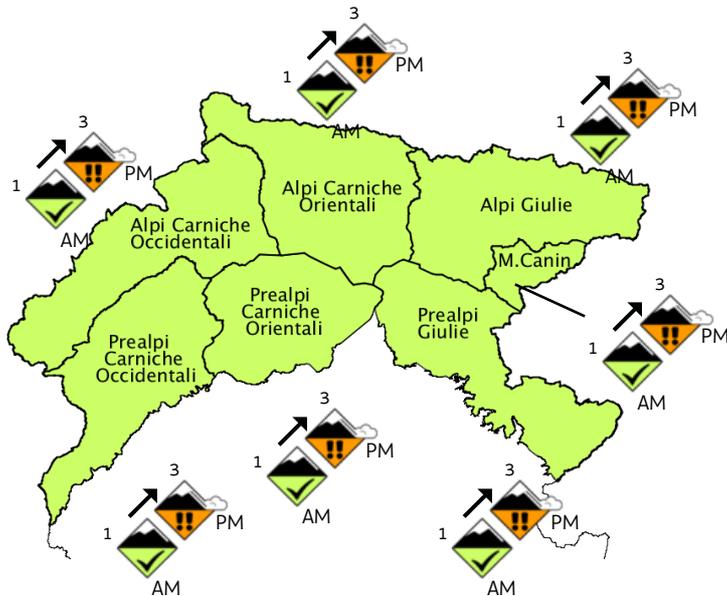

Variable on inland areas, more cloudy on the Prealps.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	31	0	-2,6	9,2
VARMOST M.TE SIMONE	1870	38	0	-1,6	8,6
SELLA NEVEA - LIVINAL LUNC	1837	78	0	-2	4,4
PIANCAVALLO	1280	0	0	-2,2	6,8
TARVISIO	800	0	0	-0,3	9,9

**Snow cover conditions and avalanche danger:** The snow cover is generally well consolidated. At altitude and during the day above zero temperatures are expected, more cloudy sky on the Prealps. Across the whole territory and especially on the Alps, possible isolated releases and spontaneous small-sized avalanches above the tree line and on sunny aspects during the warmer hours, even down to the valley floors on steeper green slopes. Forecast danger level: 1 (low).

Forecast for Saturday 25 November 2017, reliability: 70%

**Snowfall danger increasing to 3 (considerable) starting from the evening.**

Thermal Zero: 2000 m  
T.average 1000: 4 °C  
T.average 2000: 0 °C

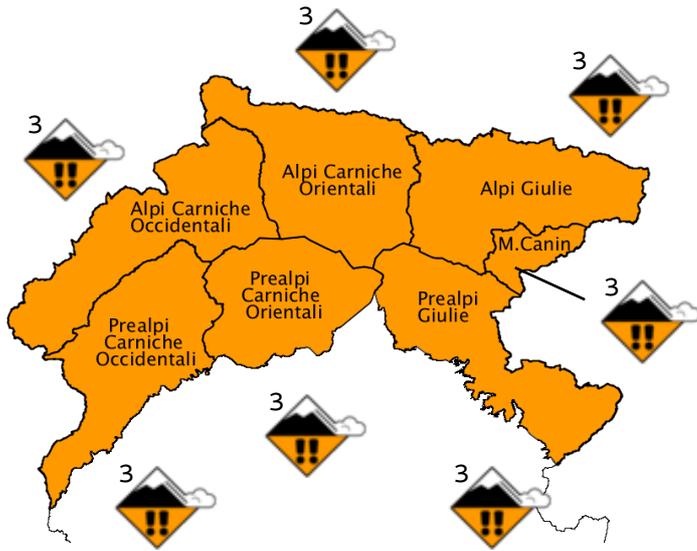

**Weather by OSMER - ARPA FVG:**

Overcast sky, light and scattered snowfalls in the morning, turning to abundant and widespread from the evening.

**Snow cover conditions and avalanche danger:** In the morning still warm temperatures at altitude. By mid-morning, light and scattered rainfalls up to 1800 m until the evening, except for the border ridge where the rainfalls are expected up to 1500 m. Starting from the evening, abundant and intense snowfalls, especially to the East. So it will occur a considerable danger increase related to the snowfall quantity. Across the whole mountain areas and above 1700-1800 m, possible both spontaneous avalanches on all aspects, even to the valley floors on the steeper green slopes and triggered avalanches with low overload. Forecast danger level: 1 (low) in the morning increasing to 3 (considerable) from the evening.

Forecast for Sunday 26 November 2017, reliability: 70%

**Possible both spontaneous and triggered avalanches, even with low overload above the tree line.**

N 50  
km/h

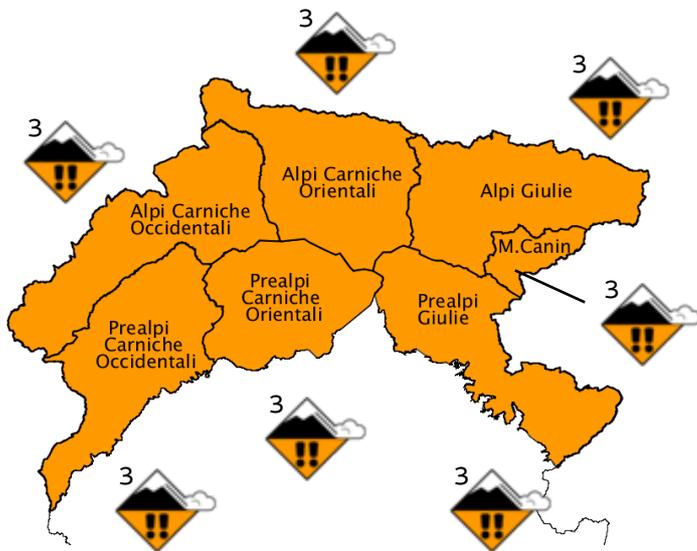

Thermal Zero: 1000 m  
T.average 1000: -1 °C  
T.average 2000: -8 °C

**Weather by OSMER - ARPA FVG:**  
In the morning light residual precipitations, especially to the East. Clear by the afternoon, cold in the evening.

**Snow cover conditions and avalanche danger:** Residual snowfalls (5-10 cm) during the morning, variable to partly cloudy and cold later. A strong wind will turn from the North and form new significant accumulations on all aspects, especially to the South-West, South and South-East. Above the tree line there is the possibility to trigger avalanches in the accumulation zones, even by one single skier or hiker. Possible spontaneous small-sized avalanches on steeper slopes. Forecast danger level: 3 (considerable).

Forecast for Monday 27 November 2017, reliability: 70%

**Possible triggered avalanches even with low overload above the tree line.**

N 30  
km/h

Thermal Zero: 800 m  
T.average 1000: -2 °C  
T.average 2000: -8 °C

**Weather by OSMER - ARPA FVG:**  
Mostly clear sky, intense cold and frosts.

**Snow cover conditions and avalanche danger:** Clear sky or partly cloudy and even intense cold. Above the tree line there is the possibility to trigger avalanches in the accumulation zones (especially to the South-West, South and South East), even by one single skier or hiker. Forecast danger level: 3 (considerable).
