

Situation of 15 December 2017 edition of the hours 14-next update 18-12-2017 hours 14, forecaster: DM

reliability: 80%

Possible triggered avalanches, even with low overload, on the Giulie Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1200 m
T.average 1000: 2 °C
T.average 2000: -4 °C

Weather by OSMER - ARPA FVG:

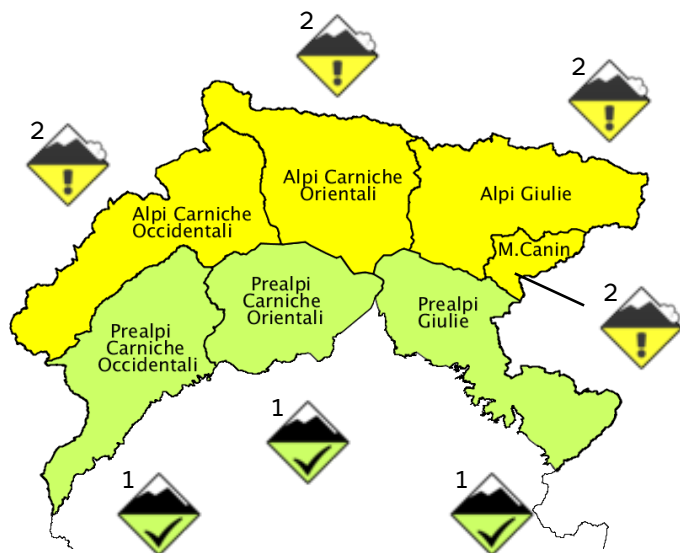

Moderate precipitations in the morning, snowfall above 1000m. Attenuation. Snow level up to 400 m in the evening.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	54	4	-5,6	-2,8
VARMOST M.TE SIMONE	1870	73	0	-7,2	-1,9
SELLA NEVEA - LIVINAL LUNC	1837	163	13	-3,8	-2
PIANCAVALLO	1280	2	1	-3,1	2,2
TARVISIO	800	6	2	0	2

Snow cover conditions and avalanche danger: In the last few days on the Giulie Alps, 20 to 30 cm of new snow fell with the last slight and moderate snowfall. Insignificant snow quantity across the rest of the territory. The new snow covered the frozen crusts originated by the rainfall of the last weekend. The southern winds eroded the ridges and formed small accumulations in the dips and along the couloirs. In these areas on the Giulie Alps, above 1800 m, the release of small-sized slab avalanches may occur, even with low overload. Possible violent falls on the eroded ridges because of the frozen crusts. Forecast danger level: 2 (moderate) on the Giulie and on the Carnic Alps, 1 (low) on the Prealps.

Forecast for Saturday 16 December 2017, reliability: 80%

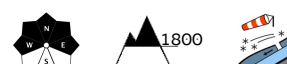

Increasing triggered release danger on the Giulie Alps because of new snowfall.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1000 m
T.average 1000: -1 °C
T.average 2000: -7 °C

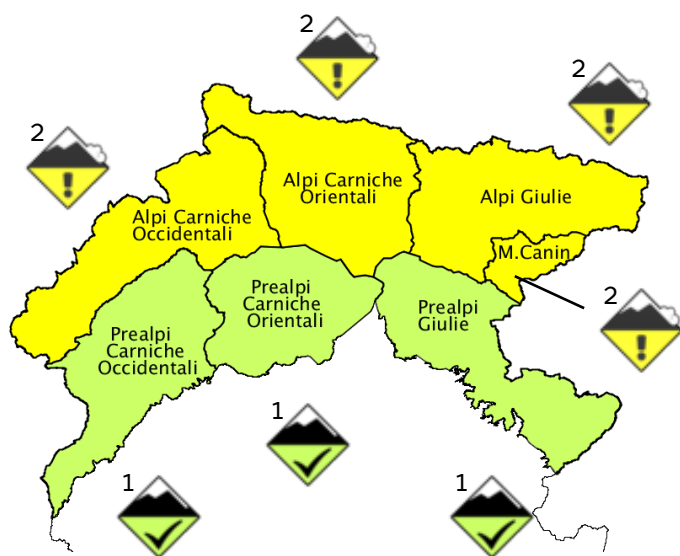

Weather by OSMER - ARPA FVG:

Slight precipitations to the W and moderate ones to the E in the morning. Clear up and colder during the day.

Snow cover conditions and avalanche danger: New snowfall expected between Friday night and Saturday morning: about 20 cm on the Giulie Alps and 10 cm across the rest of the territory. Nevertheless, still moderate (2) avalanche danger on the whole Alpine belt, while it is still low (1) on the Prealps. New small accumulations will be formed in the dips and along the northern couloirs (above 1700-1800 m) by the new precipitations and the South-western winds. In these areas the release of small avalanches may occur, even with low overload and especially on the Giulie Alps, where the snow is more abundant. There is almost no spontaneous avalanche activity, except for some releases on steeper slopes.

Forecast for Sunday 17 December 2017, reliability: 80%

Possible triggered avalanches on the Giulie Alps, locally even with low overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

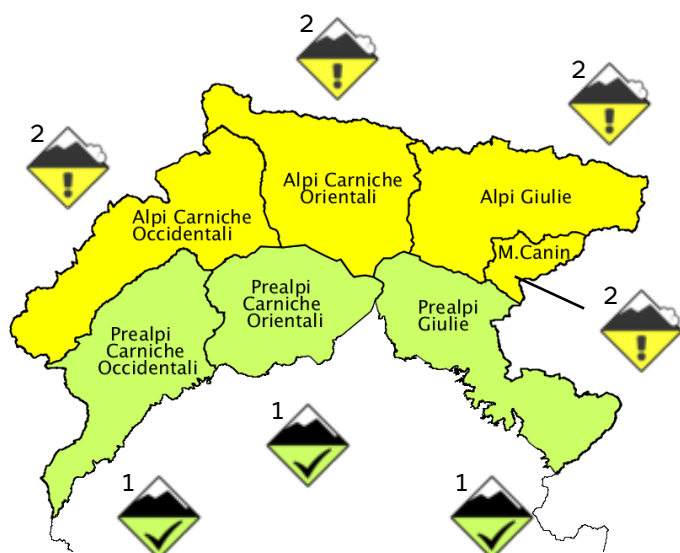

Thermal Zero: 800 m
T.average 1000: -3 °C
T.average 2000: -10 °C

Weather by OSMER - ARPA FVG:
Clear sky or partly cloudy for haziness.

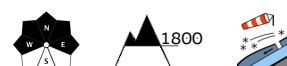

Snow cover conditions and avalanche danger: Good weather and cold on Sunday. Still possible small releases of slab avalanches even with low overload on the Giulie Alps, along the couloirs and below steeper ridges and forks above 1800 m; less likely elsewhere. There is almost no spontaneous avalanche activity, except for some releases on steeper slopes exposed to the sun. Forecast danger level: 2 (moderate) on the Giulie and on the Carnic Alps, 1 (low) on the Prealps.

Forecast for Monday 18 December 2017, reliability: 80%

Possible triggered avalanches on the Giulie Alps, locally even with low overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 700 m
T.average 1000: -4 °C
T.average 2000: -9 °C

Weather by OSMER - ARPA FVG:
Probable variable cloudiness, low probability of precipitations on Monday. Still cold.

Snow cover conditions and avalanche danger: Still possible small releases of slab avalanches even with low overload on the Giulie Alps, along the couloirs and below steeper ridges and forks above 1800 m; less likely elsewhere. There is almost no spontaneous avalanche activity, except for some releases on steeper slopes. Forecast danger level: 2 (moderate) on the Giulie and on the Carnic Alps, 1 (low) on the Prealps.
