

Situation of 18 December 2017 edition of the hours 14-next update 21-12-2017 hours 14, forecaster: LL

reliability: 90%

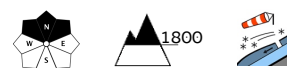

Possible triggered avalanches, locally with low overload, especially on the Giulie Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 600 m
T.average 1000: -6 °C
T.average 2000: -11 °C

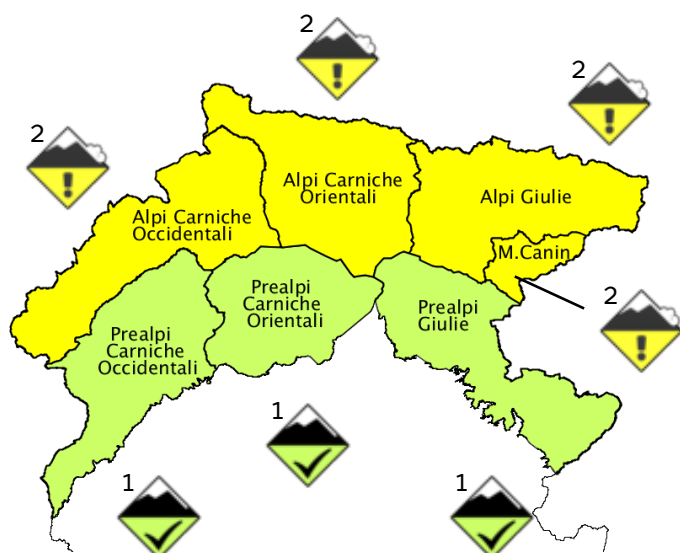

Weather by OSMER - ARPA FVG:
Clear sky or partly cloudy. More cloudy to the W during the day.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	53	0	-12	-3,3
VARMOST M.TE SIMONE	1870	72	0	-11	-2,2
SELLA NEVEA - LIVINAL LUNC	1837	161	0	-11	-6,9
PIANCAVALLO	1280	17	0	-8,8	-0,4
TARVISIO	800	11	0	-9,3	2

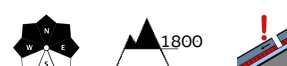

Snow cover conditions and avalanche danger: The snowcover has been reshaped by the wind. It has some eroded areas with crusts formed by regelation and with wind accumulations, due to the recent snowfall; these accumulations are generally small-sized and localised in the couloirs above the tree line. Same situation on the Prealps at the highest altitudes in the northern aspects. Still possible triggered small-sized slab releases, even with low overload, especially on the Giulie Alps, along the couloirs and below ridges and steeper forks above 1800m. This is less likely on the Carnic Alps and isolated and restricted to the highest altitudes of the major massifs on the Prealps. Across the whole territory, the avalanche activity is limited to some releases on the steeper slopes exposed to the sun. Forecast danger level: 2 (moderate) on the Alps, 1 (low) on the Prealps.

Forecast for Tuesday 19 December 2017, reliability: 70%

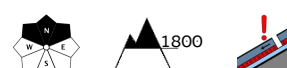

Possible triggered avalanches, locally with low overload, especially on the Giulie Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

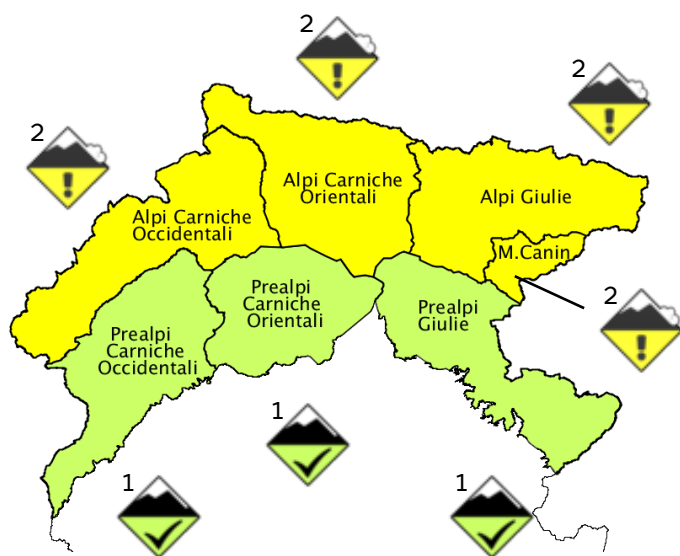

Thermal Zero: 600 m
T.average 1000: -6 °C
T.average 2000: -9 °C

Weather by OSMER - ARPA FVG:
Clear sky, partly hazy. Cloudy in the evening.

Snow cover conditions and avalanche danger: Clear sky or partly cloudy during the day, cloudy in the evening; low temperatures. Still possible triggered small-sized slab releases, even with low overload, especially on the Giulie Alps, along the couloirs and below ridges and steeper forks above 1800m. This is less likely on the Carnic Alps and isolated and restricted to the highest altitudes of the major massifs on the Prealps. Across the whole territory, the avalanche activity is limited to some releases on the steeper slopes exposed to the sun. Forecast danger level: 2 (moderate) on the Alps, 1 (low) on the Prealps.

Forecast for Wednesday 20 December 2017, reliability: 70%

Possible triggered avalanches, locally with low overload, especially on the Giulie Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

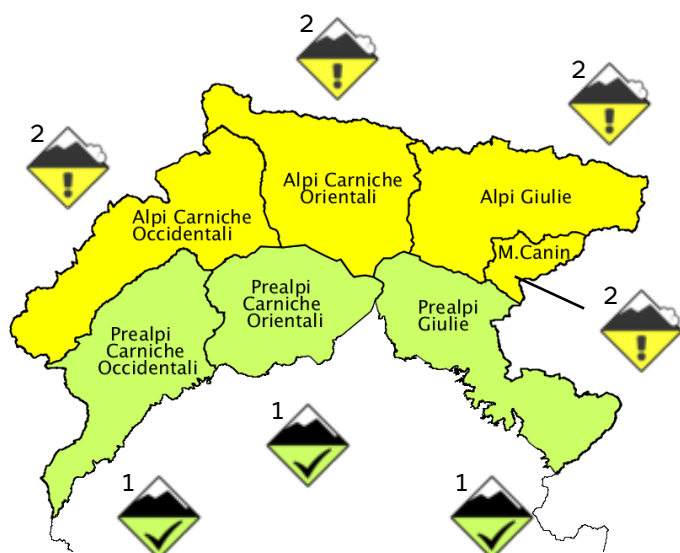

Thermal Zero: 800 m
T.average 1000: -5 °C
T.average 2000: -8 °C

Weather by OSMER - ARPA FVG:
Variable during the night. Clear sky during the day.

Snow cover conditions and avalanche danger: Variable during the night and in the early morning. Clear sky during the day; low temperatures. Still possible triggered small-sized slab releases, even with low overload, especially on the Giulie Alps, along the couloirs and below ridges and steeper forks above 1800m. This is less likely on the Carnic Alps and isolated and restricted to the highest altitudes of the major massifs on the Prealps. Across the whole territory, the avalanche activity is limited to some releases on the steeper slopes exposed to the sun. Forecast danger level: 2 (moderate) on the Alps, 1 (low) on the Prealps.

Forecast for Thursday 21 December 2017, reliability: 60%

Possible triggered avalanches, locally with low overload, especially on the Giulie Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1000 m
T.average 1000: -1 °C
T.average 2000: -1 °C

Weather by OSMER - ARPA FVG:
Clear sky or partly cloudy. Thermal zero increase up to over 2000m in the evening.

Snow cover conditions and avalanche danger: Clear sky or partly cloudy, low temperatures during the day, but thermal zero altitude increase up to over 2000m in the evening. Still possible triggered small-sized slab releases, even with low overload, especially on the Giulie Alps, along the couloirs and below ridges and steeper forks above 1800m. This is less likely on the Carnic Alps and isolated and restricted to the highest altitudes of the major massifs on the Prealps. Across the whole territory, the avalanche activity is limited to some releases on the steeper slopes exposed to the sun. Forecast danger level: 2 (moderate) on the Alps, 1 (low) on the Prealps.
