

Situation of 16 February 2018 edition of the hours 14-next update 19-02-2018 hours 14, forecaster: LL

reliability: 80%

Avalanche danger, locally triggered even with low overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2200 m
T.average 1000: 1 °C
T.average 2000: 0 °C

Weather by OSMER - ARPA FVG:

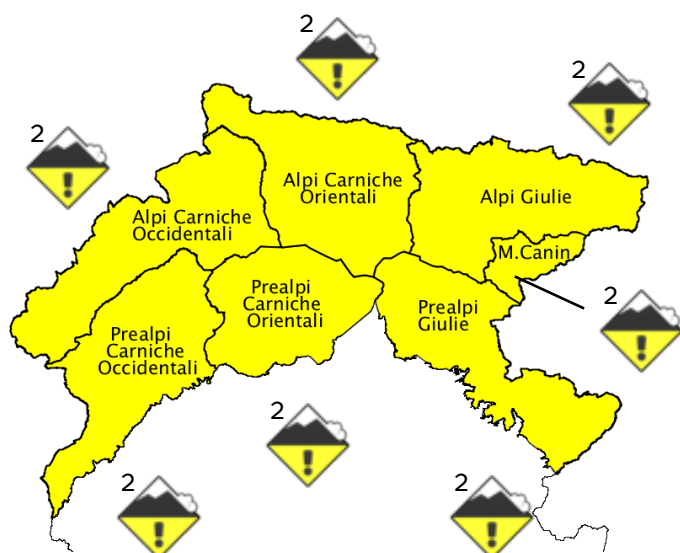

Partly cloudy, variable in the afternoon.
Thermal inversion.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	105	0	-10	-1,1
VARMOST M.TE SIMONE	1870	139	0	-7,7	1,9
SELLA NEVEA - LIVINAL LUNC	1837	320	0	-9,9	1,6
PIANCAVALLO	1280	54	0	-7,3	-1,9
TARVISIO	800	40	0	-9,6	0,4

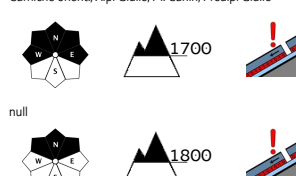

Snow cover conditions and avalanche danger: The snow cover is characterised by recent small-sized accumulations related to the last snowfall, locally unstable. These accumulations lay on old and solid wind drift accumulations, which are generally well consolidated. Moderate danger level (2) on the Giulie Alps. Still possible release above the tree line in the accumulation zones, triggered with a generally high overload. Pay attention to the accumulations below ridges and forks on the northern aspects, where releases may be triggered even by a single skier/hiker. Moderate danger level (2) on the Carnic Alps and Prealps, related to the old accumulations, which could cause a triggered release on the northern aspects with a generally high overload. Not to be excluded the release even with low overload on very steep slopes and locally at the highest altitudes. Possible isolated spontaneous releases during the warmer hours on the steepest slopes.

Forecast for Saturday 17 February 2018, reliability: 80%

Avalanche danger, locally triggered even with low overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1200 m
T.average 1000: 0 °C
T.average 2000: -3 °C

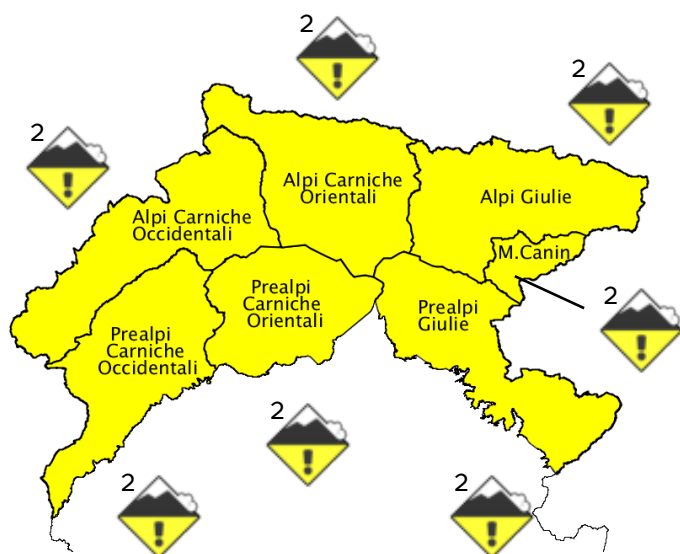

Weather by OSMER - ARPA FVG:

Partly cloudy in the morning, overcast later.
Possible very slight snowfall above 500 m in the evening.

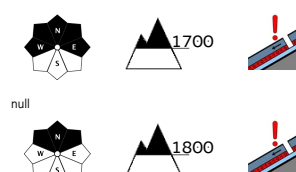

Snow cover conditions and avalanche danger: Partly cloudy in the morning, cloudy to overcast during the day. Moderate danger level (2) on the Giulie Alps. Still possible release above the tree line in the accumulation zones, triggered with a generally high overload. Pay attention to the accumulations below ridges and forks on the northern aspects, where releases may be triggered even by a single skier/hiker. Moderate danger level (2) on the Carnic Alps and Prealps, related to the old accumulations, which could cause a triggered release on the northern aspects with a generally high overload. Not to be excluded the release even with low overload on very steep slopes and locally at the highest altitudes. Possible isolated spontaneous releases during the warmer hours on the steepest slopes.

Forecast for Sunday 18 February 2018, reliability: 80%

Avalanche danger, locally triggered even with low overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1100 m
T.average 1000: 0 °C
T.average 2000: -7 °C

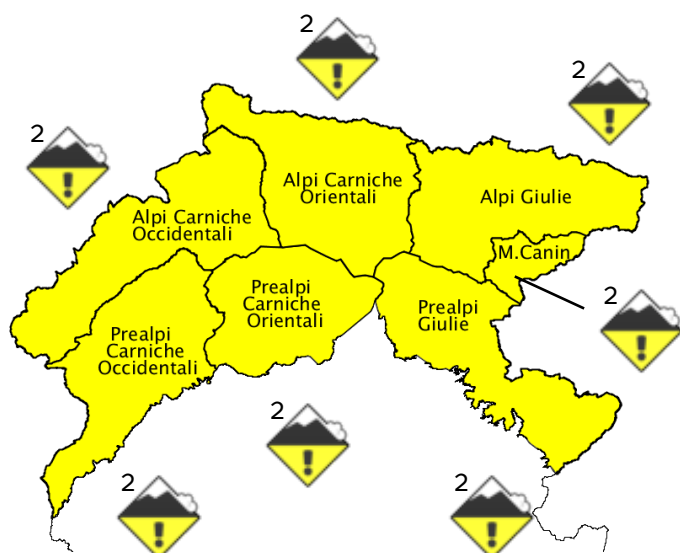

Weather by OSMER - ARPA FVG:

Possible slight scattered precipitations during the night, sleet above 400 m. Variable during the day.

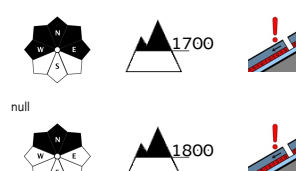

Snow cover conditions and avalanche danger: Still cloudy and possible sleet on the Western Carnia. Moderate danger level (2) on the Giulie Alps. Still possible release above the tree line in the accumulation zones, triggered with a generally high overload. Pay attention to the accumulations below ridges and forks on the northern aspects, where releases may be triggered even by a single skier/hiker. Moderate danger level (2) on the Carnic Alps and Prealps, related to the old accumulations, which could cause a triggered release on the northern aspects with a generally high overload. Not to be excluded the release even with low overload on very steep slopes and locally at the highest altitudes. Possible isolated spontaneous releases during the warmer hours on the steepest slopes.

Forecast for Monday 19 February 2018, reliability: 70%

Avalanche danger, locally triggered even with low overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 600 m
T.average 1000: -3 °C
T.average 2000: -9 °C

Weather by OSMER - ARPA FVG:

Variable.

Snow cover conditions and avalanche danger: Variable, more cloudy on the Giulie. Moderate danger level (2) on the Giulie Alps. Still possible release above the tree line in the accumulation zones, triggered with a generally high overload. Pay attention to the accumulations below ridges and forks on the northern aspects, where releases may be triggered even by a single skier/hiker. Moderate danger level (2) on the Carnic Alps and Prealps, related to the old accumulations, which could cause a triggered release on the northern aspects with a generally high overload. Not to be excluded the release even with low overload on very steep slopes and locally at the highest altitudes. Possible isolated spontaneous releases during the warmer hours on the steepest slopes.
