

Situation of 30 April 2018 edition of the hours 14-next update 01-12-2018 hours 14, forecaster: LL

reliability: 80%

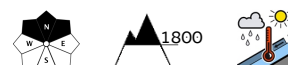

Possible superficial releases during the warmest hours especially on the Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2700 m
T.average 1000: 11 °C
T.average 2000: 3 °C

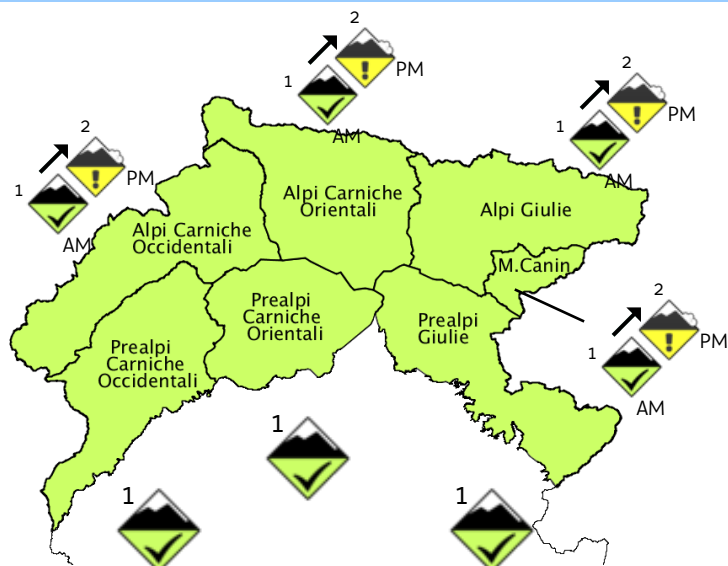

Weather by OSMER - ARPA FVG:
Partly cloudy during the day.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	0	0	5,5	12,9
VARMOST M.TE SIMONE	1870	54	0	5,1	17,7
SELLA NEVEA - LIVINAL LUNC	1837	265	0	4,7	12,9
PIANCAVALLO	1280	0	0	8,9	16
TARVISIO	800	0	0	12,4	24

Snow cover conditions and avalanche danger: Expected an improvement during the day, partly cloudy. Moderate avalanche danger (2) on the zalps and possible releases and small-sized avalanches of wet snow during the warmest hours on very steep slopes, below cliffs at high altitude; this condition is due to the recent rainfalls and to the widespread clouds in the morning and the solar radiation in the afternoon. Lack of snowpack on the Prealps to the S, irregular snowpack up to the highest altitudes to the N. Low avalanche danger (1) due to possible isolated releases of wet snow during the warm hours, especially on very steep sunny slopes and at the highest altitudes.

Forecast for Tuesday 01 May 2018, reliability: 80%

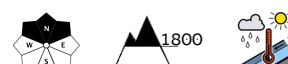

Possible releases and superficial small-sized avalanches of wet snow on the Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

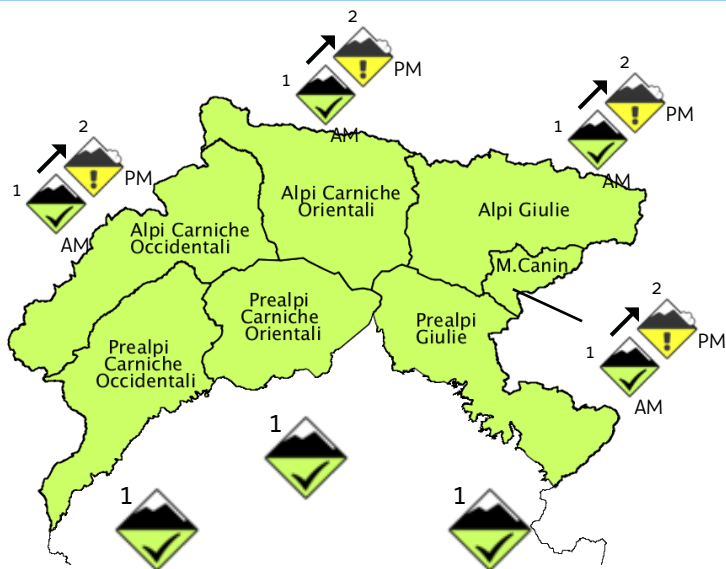

Thermal Zero: 2400 m
T.average 1000: 10 °C
T.average 2000: 3 °C

Weather by OSMER - ARPA FVG:
Clear sky or partly cloudy in the morning, variable to cloudy from the late afternoon.

Snow cover conditions and avalanche danger: Partly cloudy in the morning, variable to cloudy from the late afternoon. Well consolidated snowpack on the Alps in the morning, low avalanche danger (1). Moderate avalanche danger (2) in the afternoon, above 1800-2000 m, due to the temperature increase and the solar radiation and possible releases and small-sized avalanches of wet snow on the steepest slopes, especially below cliffs. Possible small-sized releases of wet snow triggered by skiing during the warmest hours on very steep slopes. Low avalanche danger (1) on the Prealps and possible isolated releases during the warmest hours on the steepest slopes.

Forecast for Wednesday 02 May 2018, reliability: 70%

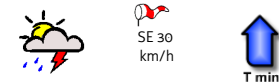

Possible releases and superficial small-sized avalanches of wet snow on the Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2700 m
T.average 1000: 11 °C
T.average 2000: 5 °C

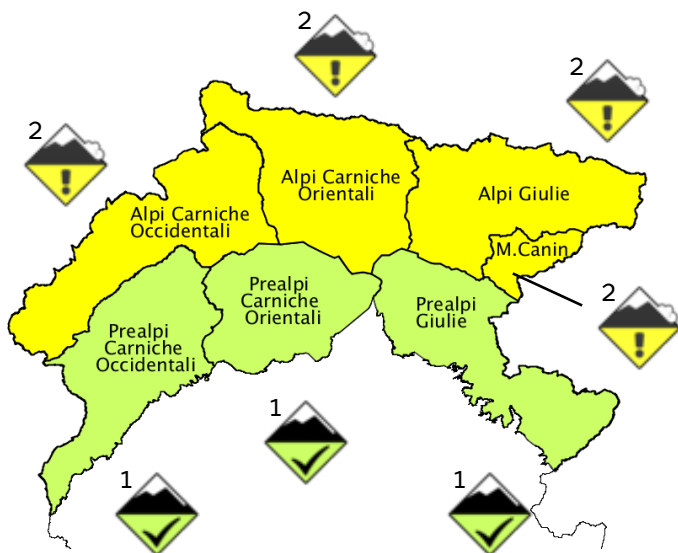

Weather by OSMER - ARPA FVG:

Overcast in the morning, moderate rainfalls especially to the W; possible clears but also some downpours.

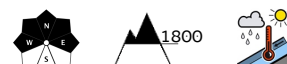

Snow cover conditions and avalanche danger: Cloudy in the morning, variable during the day and possible downpours, more likely to the W. The widespread clouds prevent the refreeze of the superficial layer. Low avalanche danger (1) on the Alps above 1800-2000 m in the morning, increasing to 2 (moderate) from the late morning due to possible releases and small-sized avalanches of wet snow on the steepest slopes, especially below cliffs. Possible small-sized releases of wet snow triggered by skiing during the warmest hours on very steep slopes. Low avalanche danger (1) on the Prealps and possible isolated releases during the warmest hours on the steepest slopes.

Forecast for Thursday 03 May 2018, reliability: 70%

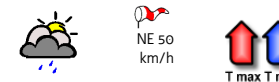

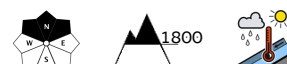

Possible releases and superficial small-sized avalanches of wet snow on the Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 3000 m
T.average 1000: 13 °C
T.average 2000: 7 °C

Weather by OSMER - ARPA FVG:

Variable clouds across the whole territory, possible scattered rainfalls.

Snow cover conditions and avalanche danger: Unstable development. Possible variable clouds and scattered rainfalls, temperature increase. Moderate avalanche danger (2) on the Alps above 1800-2000 m from the morning, due to possible releases and small-sized avalanches of wet snow on the steepest slopes, especially below cliffs. Possible small-sized releases of wet snow triggered by skiing during the warmest hours on very steep slopes. Low avalanche danger (1) on the Prealps and possible isolated releases during the warmest hours on the steepest slopes.
