

Situation of 02 January 2019 edition of the hours 14-next update 04-01-2019 hours 14, forecaster: DM

reliability: 90%

Strong winds at altitude with very low temperatures.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1000 m
T.average 1000: 0 °C
T.average 2000: -4 °C

Weather by OSMER - ARPA FVG:

Variable cloudiness with strong cold winds from the north at altitude, possible some weak snowfall on the Alps.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	8	0	-5	+4
VARMOST M.TE SIMONE	1870	22	0	-5	+6
SELLA NEVEA - LIVINAL LUNC	1837	62	0	-6	+4
PIANCAVALLO	1280	0	0	-5	+2
TARVISIO	800	0	0	-6	+5

Snow cover conditions and avalanche danger: Strong winds from the north present at altitude that are facilitating the formation of small deposits under the ridges and along the gullies situated at an altitude over 1800/2000 m. Also, due to the wind, temperatures are significantly reduced with a strong Wind Chill effect. The deposits of new and old formation with more significant thicknesses and on extremely steep slopes, if overloaded, can locally originate small starting zones. Avalanche danger is 1 (weak) throughout the mountain territory. Possible presence of icy parts has been reported, even in the snow-free areas.

Forecast for Thursday 03 January 2019, reliability: 90%

Strong winds at altitude with very low temperatures.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 500 m
T.average 1000: -6 °C
T.average 2000: -15 °C

Weather by OSMER - ARPA FVG:

Variable cloudiness with strong cold winds from the north at altitude.

Snow cover conditions and avalanche danger: Strong cold winds from the north are still expected at altitude. Winds are still facilitating the formation of small deposits under the ridges and along the gullies situated at an altitude over 1800/2000 m. Also, due to the wind, temperatures will be very low with a strong Wind Chill effect. The deposits of new and old formation with more significant thicknesses and on extremely steep slopes, if overloaded, can locally originate small starting zones. Avalanche danger is 1 (weak) throughout the mountain territory. Possible presence of icy parts has been reported, even in the snow-free areas.

Forecast for Friday 04 January 2019, reliability: 90%

Very low temperatures at high altitudes and decreasing winds.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 500 m
T.average 1000: -6 °C
T.average 2000: -13 °C

Weather by OSMER - ARPA FVG:
From partly cloudy to variable sky.

Snow cover conditions and avalanche danger: On Friday's day the winds will be decreasing and the temperatures will still be low with a moderate Wind Chill effect. The deposits under the ridges and along the gullies situated at an altitude over 1800/2000 m, with more significant thicknesses if overloaded, can locally originate small starting zones. Avalanche danger is 1 (weak) throughout the mountain territory. Possible presence of icy parts has been reported, even in the snow-free areas.

Forecast for Saturday 05 January 2019, reliability: 90%

Temperatures still low at altitude and decreasing winds.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 600 m
T.average 1000: -3 °C
T.average 2000: -8 °C

Weather by OSMER - ARPA FVG:
Variable sky

Snow cover conditions and avalanche danger: On Saturday we will still have good weather with slightly rising temperatures and further decreasing winds. The deposits under the ridges and along the gullies situated at an altitude over 1800/2000 m, with more significant thicknesses if overloaded, can locally originate small starting zones. Avalanche danger is 1 (weak) throughout the mountain territory. Possible presence of icy parts has been reported, even in the snow-free areas.
