

Situation of 07 January 2019 edition of the hours 14-next update 09-01-2019 hours 14, forecaster: AM

reliability: 90%

Snowpack generally stable and well bonded.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 800 m
T.average 1000: 0 °C
T.average 2000: -7 °C

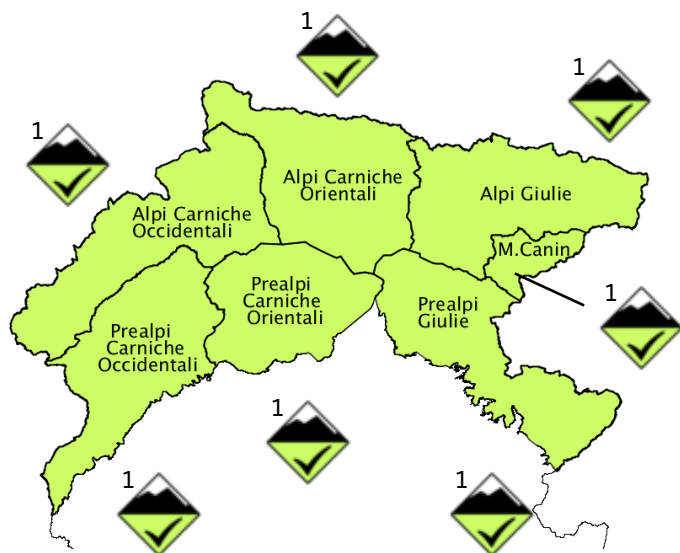

Weather by OSMER - ARPA FVG:
Cloudy sky.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	5	0	-3	1
VARMOST M.TE SIMONE	1870	26	0	-4	0
SELLA NEVEA - LIVINAL LUNC	1837	61	0	-5	-2
PIANCAVALLO	1280	0	0	-5	5
TARVISIO	800	7	0	-4	7

Snow cover conditions and avalanche danger: Generally variable sky. The snowpack has very low thicknesses and is generally stable and well bonded. On the Alps above an altitude of 2000 m and on the northern slopes there are localized wind deposits. Such deposits, made of new and old snowpack, where present with more significant thicknesses and on extremely steep slopes, they can cause moderate starting zones locally if overloaded. The snow cover is indicatively present to the North above 1500/1700 m, at slightly lower altitudes in the Tarvisio area, while to the South above 1900-2000 m. At an altitude of 2000 m the thicknesses vary on the North from 35 to 60 cm, from 5 to 20 cm on the South. Avalanche danger 1 (weak) throughout the mountain territory. Pay close attention to the possible presence of icy parts even along mountain trails and on snow-free areas.

Forecast for Tuesday 08 January 2019, reliability: 90%

Snowpack generally stable and well bonded.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

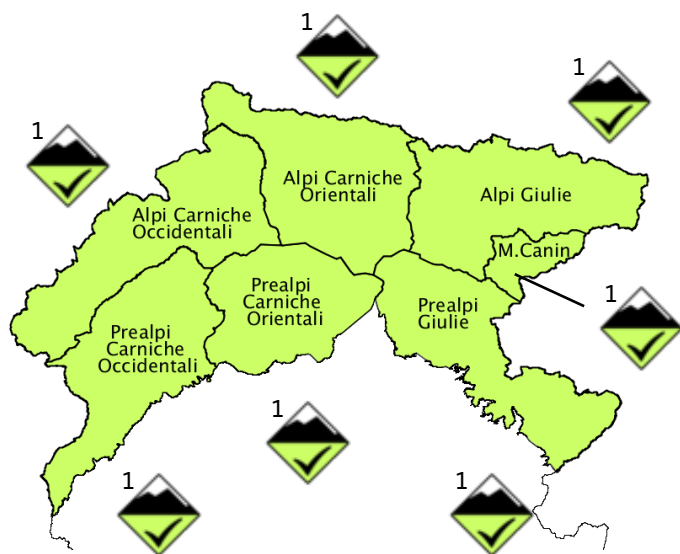

Thermal Zero: 600 m
T.average 1000: -1 °C
T.average 2000: -5 °C

Weather by OSMER - ARPA FVG:
Variable sky with moderate Northern winds. Possible sleet at altitude especially on the border with Austria.

Snow cover conditions and avalanche danger: Generally variable sky with moderate Northern winds. Slight decrease in temperatures. On the Alps above an altitude of 2000 m and on the Northern slopes there are localized wind deposits. Such deposits in areas with more significant thicknesses and on extremely steep slopes, they can cause moderate starting zones locally if overloaded. The snow cover is indicatively present to the North above 1500/1700 m, at slightly lower altitudes in the Tarvisio area, while to the South above 1900-2000 m. At an altitude of 2000 m the thicknesses vary on the North from 35 to 60 cm, from 5 to 20 cm on the South. Avalanche danger 1 (weak) throughout the mountain territory. Pay close attention to the possible presence of icy parts even along mountain trails and on snow-free areas.

Forecast for Wednesday 09 January 2019, reliability: 80%

Single wind accumulations are present on the Alps, to the North and above an altitude of 2000 m.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 800 m
T.average 1000: 0 °C
T.average 2000: -7 °C

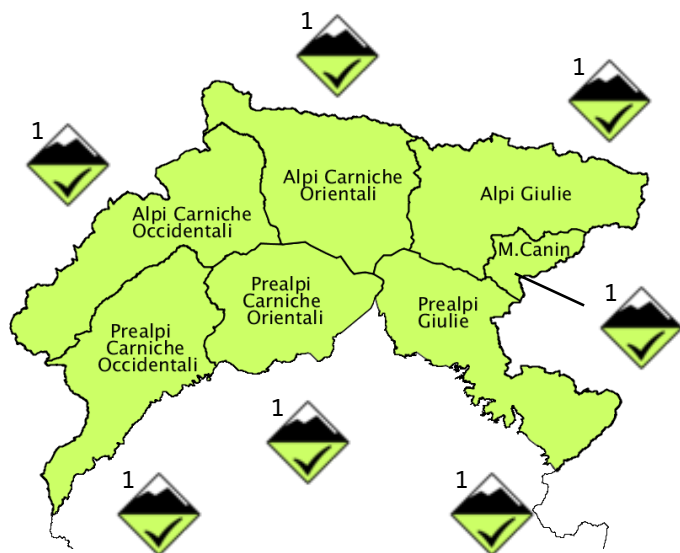

Weather by OSMER - ARPA FVG:

Mostly partly cloudy sky. Possibility of some weak snowfalls on the border with Austria.

Snow cover conditions and avalanche danger: Variable sky to slightly cloudy. Freezing level at an altitude of 800 m. Moderate northern winds. On the Alps above an altitude of 2000 m and on the Northern slopes there are localized wind deposits. Such deposits, made by new and old snowpack, where are present with more significant thicknesses and on extremely steep slopes, they can cause moderate starting zones locally if overloaded. The snow cover is indicatively present to the North above 1500/1700 m, at slightly lower altitudes in the Tarvisio area, while to the South above 1900-2000 m. At an altitude of 2000 m the thicknesses vary on the North from 35 to 60 cm, from 5 to 20 cm on the South. Avalanche danger 1 (weak) throughout the mountain territory. Possible presence of icy parts.

Forecast for Thursday 10 January 2019, reliability: 70%

Significant decrease in temperatures.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 500 m
T.average 1000: -3 °C
T.average 2000: -11 °C

Weather by OSMER - ARPA FVG:

From variable to partly cloudy sky. Moderate wind at altitude.

Snow cover conditions and avalanche danger: Decrease in temperatures and moderate Northern wind. Avalanche danger 1 (weak) throughout the mountain territory. On the Alps above an altitude of 2000 m and on the Northern slopes there are localized wind deposits. Such deposits, made by new and old snowpack, where are present with more significant thicknesses and on extremely steep slopes, they can cause moderate starting zones locally if overloaded. Pay close attention to the possible presence of icy parts even along mountain trails and on snow-free areas.
