

Situation of 06 May 2019 edition of the hours 14-next update 08-05-2019 hours 14, forecaster: GA

reliability: 80%

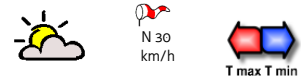

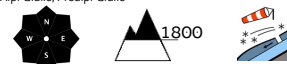

Possible avalanches both natural and human triggered, locally of medium size as well.

Alpi Carniche occ., M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, Prealpi Giulie

Thermal Zero: 1500 m  
T.average 1000: 5 °C  
T.average 2000: -4 °C

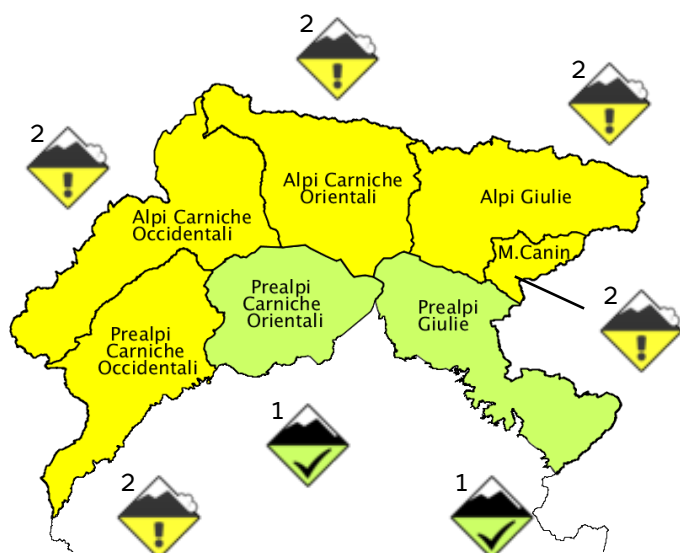

**Weather by OSMER - ARPA FVG:**  
Variable in the afternoon.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	52	24	-5,1	0
VARMOST M.TE SIMONE	1870	121	64	-5,7	-2,9
SELLA NEVEA - LIVINAL LUNC	1837	226	45	-5,4	-2,5
PIANCAVALLO	1280	60	54	-1,6	+1
TARVISIO	800	0	1	0	+4

**Snow cover conditions and avalanche danger:** From 40 to 60 cm of new snow fell at altitude on Sunday. The new snow has been highly reworked by the wind that has created deposits on the passes, in the basins and in the gullies. The new snow has bonded quite well with the existing snow. On the Western Carnic Alps and on the Canin the danger is 3 (considerable). Above 1800-1900 m on very steep slopes with wind deposits the human triggering of slab avalanches, generally of medium size, is possible especially with high additional load. The human triggering is not excluded locally, on extreme slopes, even with low additional load. Possible natural avalanches on steep slopes of small and locally of medium size. On the Julian Alps, Eastern Carnic Alps and on the Pre-Alps the danger is 2 (moderate). On steep slopes, natural avalanches are possible, generally small, and locally small human triggering on deposit areas by wind at the maximum local altitudes.

Forecast for Tuesday 07 May 2019, reliability: 80%

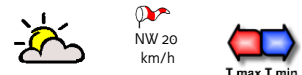

Possible avalanches both natural and human triggered, locally of medium size as well.

Alpi Carniche occ., Prealpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche orient., Prealpi Giulie

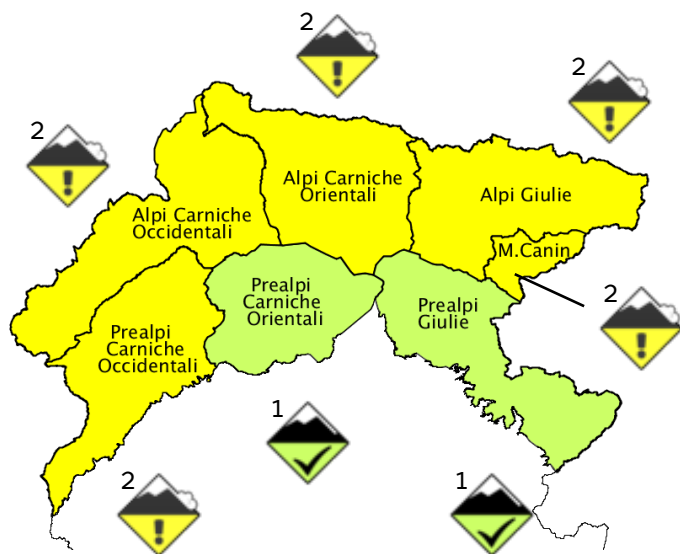

Thermal Zero: 1500 m  
T.average 1000: 3 °C  
T.average 2000: -3 °C

**Weather by OSMER - ARPA FVG:**  
Generally variable skies more sunny in the morning and more cloudiness in the afternoon. Still cold.

**Snow cover conditions and avalanche danger:** Good weather in the morning, variability in the afternoon. On the Alps and Western Carnic Pre-Alps the danger will be 2 (moderate): above 1800-1900 m on very steep slopes with deposits by wind the human triggering of slab avalanches, generally of medium size, will be possible especially with high additional load. The human triggering is not excluded locally, on extreme slopes at the maximum altitudes, it could happen even with low additional load. Possible natural avalanches on steep slopes of small and locally of medium size during hot hours of the day, especially from the Southern sides. On the Julian Pre-Alps and Eastern Carnic Alps the danger will be 1 (low). On steep slopes during hot hours, small natural avalanches will be possible, and locally small human triggering on deposit areas by wind at the maximum altitudes.

Forecast for Wednesday 08 May 2019, reliability: 80%

Possible avalanches both natural and human triggered, especially during the hot hours.

Thermal Zero: 2000 m  
T.average 1000: 6 °C  
T.average 2000: 0 °C

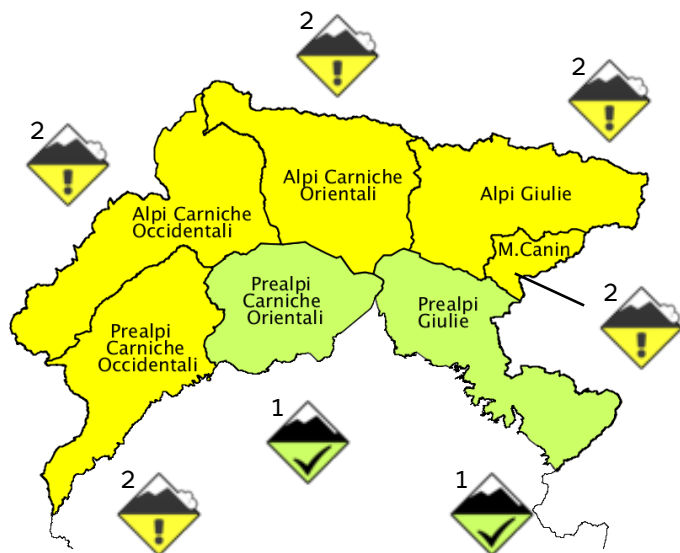

Weather by OSMER - ARPA FVG:

From cloudy to overcast skies. Weak rainfalls from afternoon more widespread in the evening. Snow above about 1500 m

**Snow cover conditions and avalanche danger:** Variable in the morning, overcast from the afternoon with weak and scattered rainfalls, more widespread in the evening, snowy above about 1500 m. On Alps and Western Carnic Pre-Alps danger will be 2 (moderate): above 1900 m on very steep slopes with deposits by wind mainly on the Southern sides, it will be possible the human triggering of slab avalanches generally of medium size especially with high additional load. From the afternoon, small and locally medium size natural avalanches will be possible, from steep slopes in all the sides. On the Julian and Eastern Carnic Pre-Alps the danger will be 1 (low). In the afternoon on the steep slopes small natural avalanches and local isolated small human triggering will be possible from the deposit areas by wind at the maximum altitudes.

Forecast for Thursday 09 May 2019, reliability: 70%

Possible avalanches both natural and human triggered, of medium size as well.

Alpi Carniche occ., Prealpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2000 m  
T.average 1000: 7 °C  
T.average 2000: 0 °C

Weather by OSMER - ARPA FVG:

Overcast skies with moderate rains, snow altitude above about 1500 m.

**Snow cover conditions and avalanche danger:** Overcast skies with moderate rainfalls, snowy above about 1500 m. 15-20 cm of new snow are expected at 1800 m. On Alps and Western Carnic Pre-Alps danger will be 2 (moderate): Above 1800 m natural avalanches will be possible, small and locally of medium size, from the steep slopes at all the sides. Still above such altitude, especially with high additional load it will be possible the human triggering of slab avalanches, generally of medium size, from very steep slopes. On the Eastern Julian and Carnic Pre-Alps the danger will be 1 (low). On the steep slopes small natural avalanches and local isolated small human triggering will be possible from the deposit areas by wind at the maximum altitudes.
