

Situation of 06 December 2019 edition of the hours 14-next update 09-12-2019 hours 14, forecaster: AMMM

reliability: 80%

Possible human triggered avalanches on the Alps,even with low additional load locally.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2600 m
T.average 1000: 2 °C
T.average 2000: 3 °C

Weather by OSMER - ARPA FVG:

Clear or little cloudy or variable skies,
thermal inversion from the afternoon and
night frost in the valleys.

| Station | quota (m) | snow depth (cm) | fresh snow (cm) | Tmin (°C) | Tmax (°C) |
|----------------------------|-----------|-----------------|-----------------|-----------|-----------|
| RIFUGIO TAMAI - ZONCOLAN | 1750 | 97 | 0 | -5 | 6 |
| VARMOST M.TE SIMONE | 1870 | 90 | 0 | -1 | 7 |
| SELLA NEVEA - LIVINAL LUNC | 1837 | 230 | 0 | -2 | 5 |
| PIANCAVALLO | 1280 | 0 | 0 | -4 | 4 |
| TARVISIO | 800 | 0 | 0 | -4 | 3 |

Snow cover conditions and avalanche danger: Good weather, still strong thermal inversion and freezing point above 2500 m. On the Alps, avalanche danger will be 2 (moderate): during hottest hours, on sunny slopes, small and medium-sized natural avalanches will be possible from the steepest walls and slopes above 1800-1900 m. On grassy slopes, in areas with crevices, even gliding avalanches can occur. In areas with wind-drifted deposits, on very steep slopes, the human triggered avalanches, generally medium-sized, can occur locally even with low additional load. On Prealps, avalanche danger will be 1 (low): small natural avalanches will be possible from the walls and the steepest slopes at the highest altitudes during hot hours. Possible small human triggered avalanches with high additional load on the steep slopes. Pay attention to icy section everywhere.

Forecast for Saturday 07 December 2019, reliability: 80%

Possible human triggered avalanches on the Alps,even with low additional load locally.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2300 m
T.average 1000: 2 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:

Cloudy early in the morning, mainly good
weather during the day.

Snow cover conditions and avalanche danger: Still good weather, and strong thermal inversion and freezing point above 2300 m. On the Alps, avalanche danger will be 2 (moderate): during hottest hours, on sunny slopes, small and medium-sized natural avalanches will be possible from the steepest walls and slopes above 1800-1900 m. On grassy slopes, in areas with crevices, even gliding avalanches can occur. In areas with wind-drifted deposits, on very steep slopes, the human triggered avalanches, generally medium-sized, can occur locally even with low additional load. On Prealps, avalanche danger will be 1 (low): small natural avalanches will be possible from the walls and the steepest slopes at the highest altitudes during hot hours. Possible small human triggered avalanches with high additional load on the steep slopes. Pay attention to icy section everywhere.

Forecast for Sunday 08 December 2019, reliability: 80%

Possible human triggered avalanches on the Alps, even with low additional load locally.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2000 m
T.average 1000: 2 °C
T.average 2000: 0 °C

Weather by OSMER - ARPA FVG:

Clear or little cloudy skies, increase in cloudiness from the evening.

Snow cover conditions and avalanche danger: Clear or cloudy skies with worsening from evening. On the Alps, avalanche danger will be 2 (moderate): during hottest hours, on sunny slopes, small and medium-sized natural avalanches will be possible from the steepest walls and slopes above 1800-1900 m. On grassy slopes, in areas with crevices, even gliding avalanches can occur. In areas with wind-drifted deposits, on very steep slopes, the human triggered avalanches, generally medium-sized, can occur locally even with low additional load. On Prealps, avalanche danger will be 1 (low): small natural avalanches will be possible from the walls and the steepest slopes at the highest altitudes during hot hours. Possible small human triggered avalanches with high additional load on the steep slopes. Pay attention to icy section everywhere.

Forecast for Monday 09 December 2019, reliability: 70%

Slight snowfall expected above around 800-1000 m.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1500 m
T.average 1000: 2 °C
T.average 2000: -2 °C

Weather by OSMER - ARPA FVG:

Moderate snowfall above 800 m on Julian Alps, slighter and above 1000 m elsewhere.

Snow cover conditions and avalanche danger: Slight to moderate snowfall is expected in the Julian Alps and slight to very slight in the rest of the mountain area, which will not change the danger level, but which may make the existing wind-drifted snow deposits less visible. On the Alps, avalanche danger will be 2 (moderate): during hottest hours, on sunny slopes, small and medium-sized natural avalanches will be possible from the steepest walls and slopes above 1800-1900 m. On grassy slopes, in areas with crevices, even gliding avalanches can occur. In areas with wind-drifted deposits, on very steep slopes, the human triggered avalanches, generally medium-sized, can occur locally even with low additional load. On Prealps, avalanche danger will be 1 (low), small natural avalanches will be possible from the walls and the steepest slopes at the highest altitudes. Possible small human triggered avalanches with high additional load on the steep slopes. Pay attention to icy section everywhere.
