

Situation of 03 January 2020 edition of the hours 14-next update 07-01-2020 hours 14, forecaster: GA

reliability: 80%

Possible human triggering with high additional load to the North above 2000 m.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 3000 m
T.average 1000: 4 °C
T.average 2000: 4 °C

Weather by OSMER - ARPA FVG:
Generally variable skies. Improvement at night.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	88	0	-1	7,6
VARMOST M.TE SIMONE	1870	110	0	0	7,7
SELLA NEVEA - LIVINAL LUNC	1837	255	0	-1	5
PIANCAVALLO	1280	0	0	-1	8
TARVISIO	800	3	0	-7	4

Snow cover conditions and avalanche danger: The snowpack is bonding. On the northern slopes, potentially dangerous wind-drifted deposits are located at the maximum altitudes. On the Alps the avalanche danger is 2 (moderate): early in the morning, human triggered avalanche generally of medium size may occur generally with high additional load in areas with wind-drifted deposits on very steep slopes above 2000-2200 m in the Northern aspects. During hottest hours triggering is not excluded locally even with low additional load. Always during hot hours, natural wet snow avalanches triggering are possible, both with loose snow and with small and medium-sized slabs. On the Prealps the danger is 1 (low): some small triggering both natural and human triggering are possible, generally with high additional load, on very steep slopes on the top areas.

Forecast for Saturday 04 January 2020, reliability: 80%

Possible human triggering with high additional load to the North above 2000 m.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

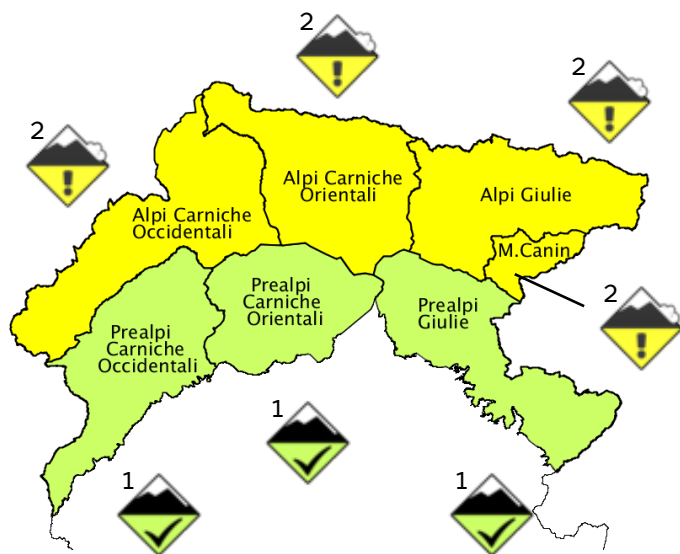

Thermal Zero: 1800 m
T.average 1000: 4 °C
T.average 2000: -1 °C

Weather by OSMER - ARPA FVG:
Clear or little cloudy skies. Decrease in temperatures compared to previous days.

Snow cover conditions and avalanche danger: Expected nice weather with freezing point at 1800 m. On the Alps, the avalanche danger will be 2 (moderate): on the very steep slopes in the Northern aspects, above 2000-2200 m, it will still be possible slab human triggered avalanches locally, generally of medium size and especially with high additional load, in the areas with wind-drifted deposits. Natural avalanche activity will be decreasing and will be limited to small triggering from extreme slopes. Locally on grassy slopes, isolated gliding avalanches on steeper meadows are not excluded. On the Prealps, the danger will be 1 (low): some small human triggering, with high additional load, on extreme slopes at the maximum altitudes is possible.

Forecast for Sunday 05 January 2020, reliability: 80%

Possible human triggering with high additional load to the North above 2000 m. Watch out for ice!

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1200 m
T.average 1000: 1 °C
T.average 2000: -6 °C

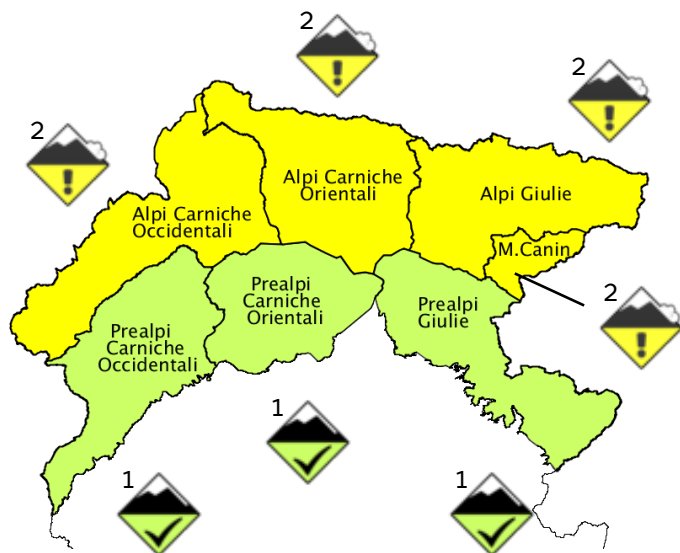

Weather by OSMER - ARPA FVG:

Clear skies with strong Northern winds to very strong at altitude. Significant decrease in temperature.

Snow cover conditions and avalanche danger: Nice weather with strong Northern winds to very strong at altitude and significant decrease in temperatures. On the Alps, the avalanche danger will be 2 (moderate): on the steep slopes in the Northern aspects, above 2000-2200 m, in areas with wind-drifted deposits it will still be possible human triggered avalanches, generally of medium size, especially with high additional load. Locally, despite the decrease in temperature, medium-sized gliding avalanches can still occur on extreme grassy slopes. On the Prealps the danger will be 1 (low): some small human triggering, with high additional load, on extreme slopes at maximum altitudes is possible. The expected decrease in temperatures will favor the formation of large frozen areas everywhere.

Forecast for Monday 06 January 2020, reliability: 80%

Possible human triggering especially with high additional load to the North above 2000 m.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1200 m
T.average 1000: -1 °C
T.average 2000: -2 °C

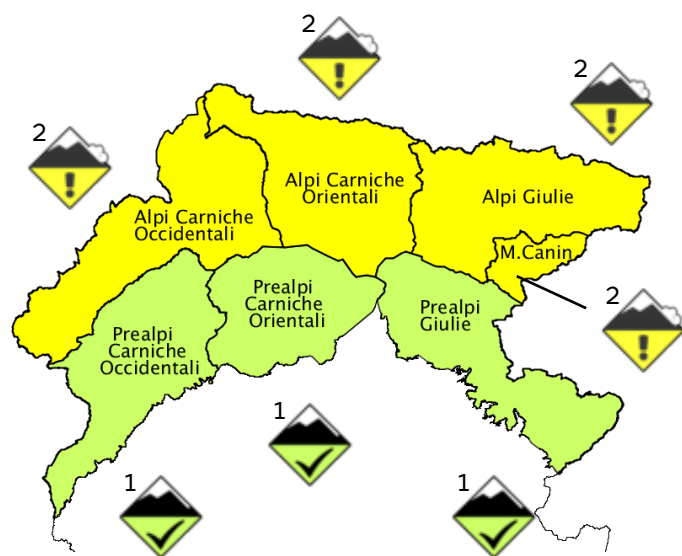

Weather by OSMER - ARPA FVG:

Clear skies.

Snow cover conditions and avalanche danger: Nice weather with freezing point at around 1200 m. On the Alps, the avalanche danger will be 2 (moderate): on the steep slopes in the Northern aspects, above 2000-2200 m, in areas with wind-drifted deposits human triggered avalanches will be possible, generally of medium size, especially with high additional load. Locally, low additional load on extreme slopes is not excluded. On the Prealps, the danger will be 1 (low): some small human triggering, with high additional load, on extreme slopes at maximum altitudes is possible. The possible presence of areas with ice is indicated everywhere.

Forecast for Tuesday 07 January 2020, reliability: 70%

Possible human triggering with high additional load to the North above 2000 m.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2000 m
 T.average 1000: 2 °C
 T.average 2000: 0 °C

Weather by OSMER - ARPA FVG:
 Clear skies.

Snow cover conditions and avalanche danger: Nice weather expected with increase in maximum temperatures at altitude. On the Alps, the avalanche danger will be 2 (moderate): on the steep slopes in the Northern aspects, above 2000-2200 m, in areas with wind-drifted deposits human triggered avalanches will be possible, generally of medium size, especially with high additional load. Locally, low additional load on extreme slopes is not excluded. On the Prealps, the danger will be 1 (low): some small human triggering, with high additional load, on extreme slopes at maximum altitudes is possible. The possible presence of areas with ice is indicated everywhere.
