

Situation of 22 January 2020 edition of the hours 14-next update 24-01-2020 hours 14, forecaster: MD

reliability: 80%

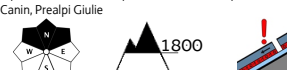

Moderate danger in the Julian Alps and Western Carnic Pre-Alps for small detachable slabs.

Prealpi Carniche occ., Alpi Giulie

Alpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., M. Canin, Prealpi Giulie

Thermal Zero: 2800 m
T.average 1000: 4 °C
T.average 2000: 4 °C

Weather by OSMER - ARPA FVG:

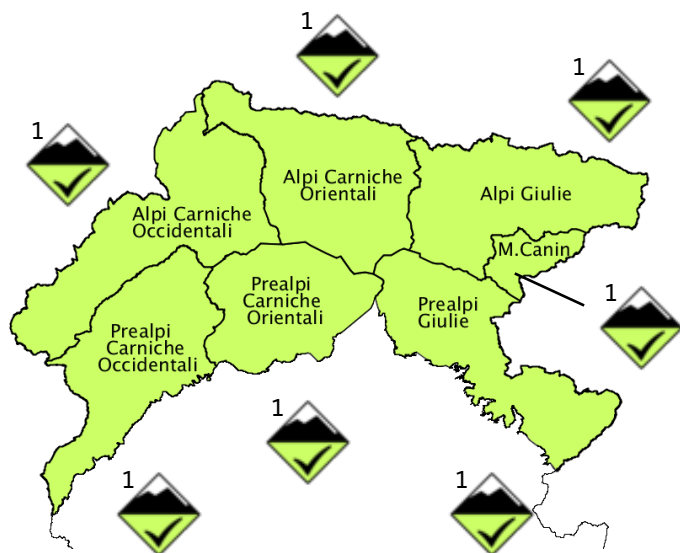

Clear skies, considerable thermal inversion at night in valleys with frosts. Mild at altitude, freezing point at 2800

| Station | quota (m) | snow depth (cm) | fresh snow (cm) | Tmin (°C) | Tmax (°C) |
|----------------------------|-----------|-----------------|-----------------|-----------|-----------|
| RIFUGIO TAMAI - ZONCOLAN | 1750 | 87 | 0 | -1 | 8 |
| VARMOST M.TE SIMONE | 1870 | 110 | 0 | 1 | 7 |
| SELLA NEVEA - LIVINAL LUNC | 1837 | 259 | 0 | 2 | 5 |
| PIANCAVALLO | 1280 | 2 | 0 | 0 | 8 |
| TARVISIO | 800 | 6 | 0 | -8 | 4 |

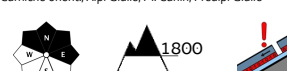

Snow cover conditions and avalanche danger: Freezing point at 2800 m with strong thermal inversion in the valleys. On the western Carnic Prealps and Julian Alps, the avalanche danger is 2 (moderate) due to small snow deposits under the ridges and the steepest gullies exposed to the North detachable even with low additional load. On the Carnic Alps, Eastern Carnic Prealps, Canin and on the Julian Prealps, the danger is 1 (low) and small human triggered slabs can occur with high additional load and at the northern aspects on the steepest areas under the ridges. Everywhere, natural avalanche activity is minimal and limited to a few loose snow avalanches of small size from the steepest sunny slopes. Pay attention to icy areas where it is possible to run into ruinous falls.

Forecast for Thursday 23 January 2020, reliability: 80%

Low danger everywhere, possible human triggered avalanches with high additional load on steep slopes.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2800 m
T.average 1000: 3 °C
T.average 2000: 2 °C

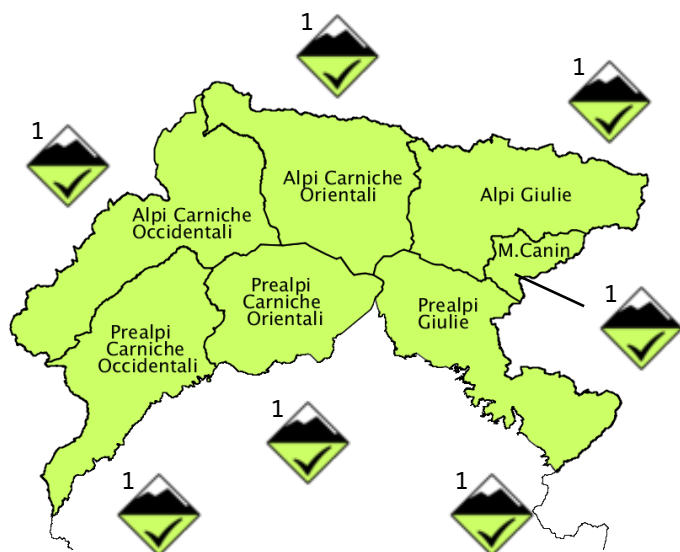

Weather by OSMER - ARPA FVG:

Clear skies with freezing point at 3000 m and considerable thermal inversion in the valleys bottom.

Snow cover conditions and avalanche danger: On Thursday the freezing point will be above 2800 m. Avalanche danger will be 1 (low) everywhere and the snowpack will be mostly stable and well bonded. Only on very steep areas exposed to the North, under the ridges, it will be possible to have small human triggered avalanches with high additional load in deposit areas. Also, small loose snow avalanches will be possible from the steepest sunny slopes during the hottest hours. Pay attention to icy area where you can slip.

Forecast for Friday 24 January 2020, reliability: 80%

Low danger everywhere, possible human triggered avalanches with high additional load on steep slopes.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 3000 m
T.average 1000: 2 °C
T.average 2000: 3 °C

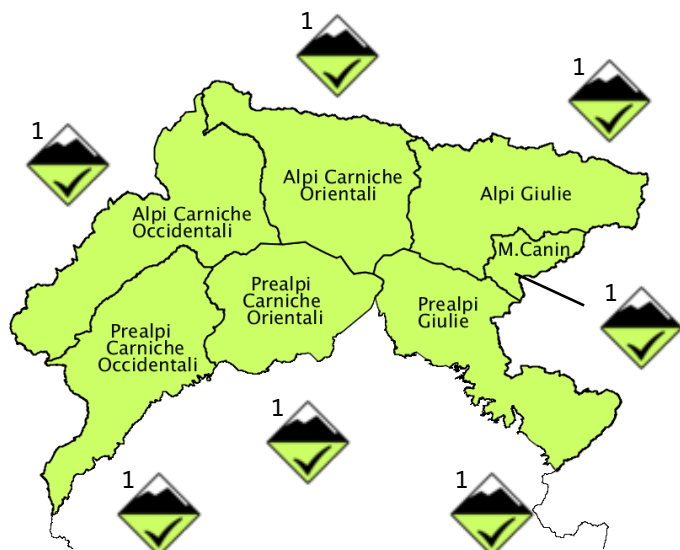

Weather by OSMER - ARPA FVG:

Almost clear skies with some clouds in the afternoon. Decrease in freezing point in the evening.

Snow cover conditions and avalanche danger: On Friday the freezing point will still be very high and no substantial changes are expected for the avalanche danger which will continue to be 1 (low) everywhere. The snowpack will be mostly stable and well bonded. Only on very steep areas exposed to the North, under the ridges, it will be possible to have small human triggered avalanches with high additional load in deposit areas. Also, small loose snow avalanches will be possible from the steepest sunny slopes during the hottest hours. Pay attention to icy area where you can slip.

Forecast for Saturday 25 January 2020, reliability: 80%

Low danger everywhere, possible human triggered avalanches with high additional load on steep slopes.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1700 m
T.average 1000: 1 °C
T.average 2000: -1 °C

Weather by OSMER - ARPA FVG:

Cloudy skies with possible sleet above 1200 m on the Prealps.

Snow cover conditions and avalanche danger: On Saturday the weather will be worsening with little chance of rainfalls and the freezing level will decrease to about 1700 m. The avalanche danger will continue to be 1 (low) everywhere. The snowpack will be mostly stable and well bonded. Only on very steep areas exposed to the North, under the ridges, it will be possible to have small human triggered avalanches with high additional load in deposit areas. Natural avalanche activity is almost absent and limited to some loose snow triggering from the steepest slopes exposed to the South. Pay attention to icy area where you can slip.
