

Situation of 07 February 2020 edition of the hours 14-next update 10-02-2020 hours 14, forecaster: MM

reliability: 80%

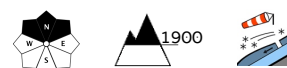

Possible human triggered avalanches on the Alps, even with low additional load.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1700 m
T.average 1000: 2 °C
T.average 2000: -1 °C

Weather by OSMER - ARPA FVG:

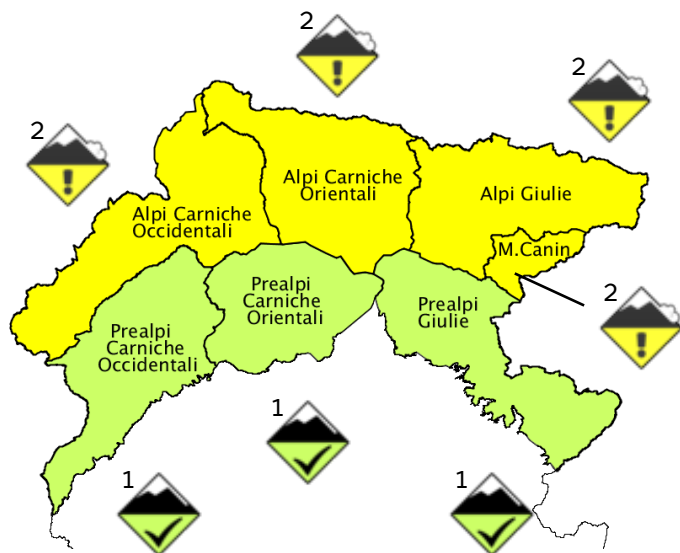

Clear skies with extensive night frosts.
Freezing at 1700 m with inversions in the lower layers, especially at night

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	82	0	-5	3
VARMOST M.TE SIMONE	1870	70	0	-4	3
SELLA NEVEA - LIVINAL LUNC	1837	265	0	-6	1
PIANCAVALLO	1280	0	0	-3	3
TARVISIO	800	0	0	-7	8

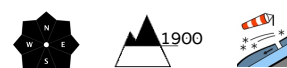

Snow cover conditions and avalanche danger: In the last few days strong winds at high altitude have affected the mountain territory. The erosive action of the wind has created new wind-drifted snow deposits, especially below the ridges, crossings. In areas with snow carried by the wind large areas of hard, icy snow alternate. On the Alps and the Canin area the danger is 2 (moderate): in all aspects in the deposit areas generally located above 1900 m, human triggered slabs of small or medium in size mainly with high additional load, it is possible. On the steepest slopes the human triggering is not excluded when the individual skier-hiker passes. On the Pre-Alps the danger is 1 (low): at the highest altitudes small human triggering is possible with high additional load on the steep slopes in the northern aspects.

Forecast for Saturday 08 February 2020, reliability: 80%

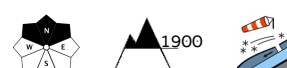

Possible human triggered avalanches on the Alps, even with low additional load.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1500 m
T.average 1000: 0 °C
T.average 2000: -1 °C

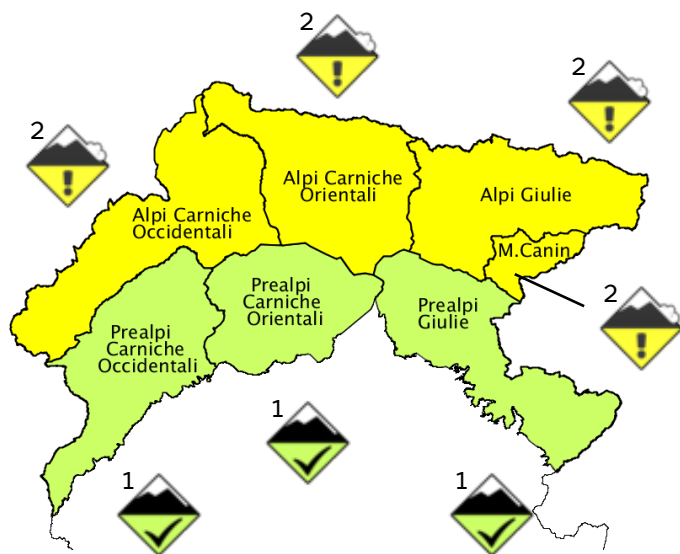

Weather by OSMER - ARPA FVG:

Clear skies.

Snow cover conditions and avalanche danger: Clear skies with freezing point at 1500 m. On the Alps and the Canin area the danger will be 2 (moderate): generally above 1900 m, in all aspects in deposit areas mainly located under the ridges, crossings and along the channels, human triggered slabs of small or medium in size mainly with high additional load, will be possible. On the steepest slopes the human triggering is not excluded when the individual skier-hiker passes. On the Pre-Alps the danger will be 1 (low): at the highest altitudes small human triggering will be possible with high additional load on the steep slopes in the northern aspects. Everywhere pay attention to the presence of icy areas and areas with very stiff and wind-smoothed snow.

Forecast for Sunday 09 February 2020, reliability: 70%

Possible human triggered avalanches on the Alps, even with low additional load.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

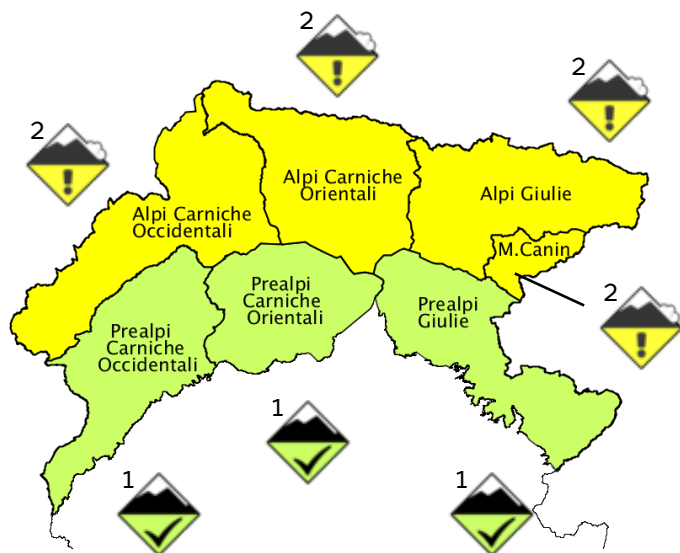

Thermal Zero: 1200 m
T.average 1000: 0 °C
T.average 2000: -2 °C

Weather by OSMER - ARPA FVG:
Little cloudy skies.

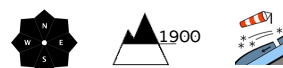

Snow cover conditions and avalanche danger: Little cloudy skies with freezing point at 1200 m. On the Alps and the Canin area the danger will be 2 (moderate); generally above 1900 m, in all aspects in areas with wind-drifted snow mainly located under the ridges, crossings and along the channels, human triggered slabs of small or medium in size mainly with high additional load, will be possible. On the steepest slopes the human triggering is not excluded when the individual skier-hiker passes. On the Pre-Alps the danger will be 1 (low): at the highest altitudes small human triggering will be possible with high additional load on the steep slopes in the northern aspects. Everywhere pay attention to the presence of icy areas and areas with very stiff and wind-smoothed snow.

Forecast for Monday 10 February 2020, reliability: 70%

Possible human triggered avalanches on the Alps, even with low additional load.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1400 m
T.average 1000: 2 °C
T.average 2000: -2 °C

Weather by OSMER - ARPA FVG:
Overcast with light snowfall over 800 m. approx.

Snow cover conditions and avalanche danger: Light snowfall is expected over the entire mountain range. The largest quantities will be in the eastern areas with maximum thicknesses of 5-10 cm. On the Alps and the Canin area the danger will be 2 (moderate); generally above 1900 m, in all aspects in areas with wind-drifted snow mainly located under the ridges, crossings and along the channels, human triggered slabs of small or medium in size mainly with high additional load, will be possible. On the steepest slopes the human triggering is not excluded when the individual skier-hiker passes. Natural loose triggered snow from the rocky walls and very steep slopes will be possible. On the Pre-Alps the danger will be 1 (low): at the highest altitudes small human triggering will be possible with high additional load on the steep slopes in the northern aspects. Everywhere pay attention to the presence of icy areas.
