

Situation of 27 January 2021 edition of the hours 14-next update 29-01-2021 hours 14, forecaster: MM

reliability: 80%

Avalanche danger 3 (considerable) throughout the territory.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 600 m
T.average 1000: -4 °C
T.average 2000: -9 °C

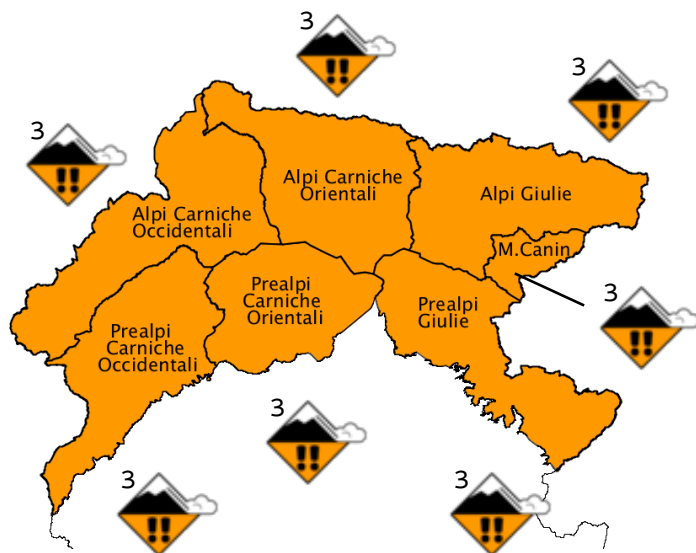

Weather by OSMER - ARPA FVG:
Variable cloud cover due to the passage of high-altitude clouds from NE. Cold temperatures.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	273	0	-9	-7
VARMOST M.TE SIMONE	1870	196	0	-11	-5
SELLA NEVEA - LIVINAL LUNC	1837	460	0	-9	-8
PIANCAVALLO	1280	100	0	-7,6	1
TARVISIO	800	69	0	-12	1

Snow cover conditions and avalanche danger: In recent days, strong winds at high altitudes from the north have affected the mountain territory causing the formation of new and unstable accumulations of snow, especially along gullies, areas under ridges and forks, with sudden changes in slope and, in general, in all leeward areas. On the Alps and Prealps, avalanche danger is 3 (considerable): small- to medium- sized natural avalanches are possible on the steepest slopes. On steep grassy slopes, especially on sunny slopes, chance of larger ground avalanches. At all exposures, on steep slopes above the tree line, slab avalanches, in isolated cases even large ones, also with the passage of single skiers-hikers, are possible. On the Alps, continued chance of avalanches affecting roads. Excursions require a careful choice of itinerary, especially at higher altitudes.

Forecast for Thursday 28 January 2021, reliability: 80%

Avalanche danger 3 (considerable) throughout the territory.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

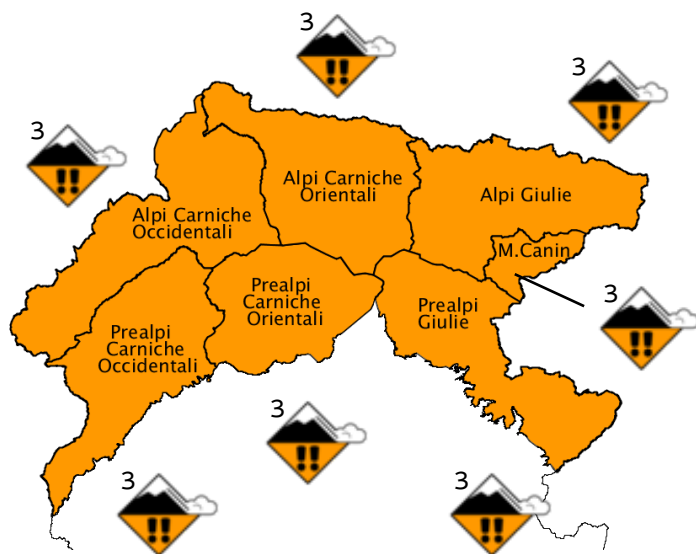

Thermal Zero: 700 m
T.average 1000: -3 °C
T.average 2000: -3 °C

Weather by OSMER - ARPA FVG:
In the morning, cold and clear, then variably cloudy.

Snow cover conditions and avalanche danger: NW wind is still expected, which will lead to the formation of additional new snow accumulations, as well as making those already present less evident which, especially at high altitudes, are still unstable. On the Alps and Prealps, avalanche danger will be 3 (considerable): small- medium-sized natural avalanches are possible on steeper slopes. On steep grassy slopes, especially on sunny slopes, chance of larger ground avalanches and, in known sites, they could still affect manmade areas. At all exposures, on steep slopes above the tree line, slab avalanches, in isolated cases even large ones, also with the passage of single skiers-hikers, are possible. Excursions require a careful choice of itinerary, especially at higher altitudes. Beware of the possible presence of cracks in the snowpack (glide cracks).

Forecast for Friday 29 January 2021, reliability: 70%

Avalanche danger 3 (considerable) throughout the territory.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

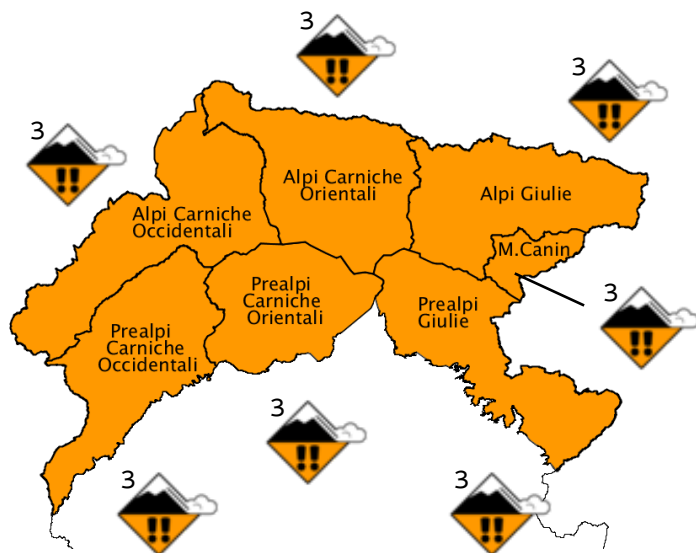

Thermal Zero: 800 m
T.average 1000: 1 °C
T.average 2000: -1 °C

Weather by OSMER - ARPA FVG:
Variable to cloudy skies, possible weak snowfall above about 600 m. Inversions.

Snow cover conditions and avalanche danger: A slight rise in temperatures and some weak snowfall, is expected. Especially at high altitudes, at all exposures, unstable and not always clearly visible accumulations of wind-blown snow. On the Alps and Prealps, avalanche danger will be 3 (considerable): small-medium-sized natural avalanches are possible on steeper slopes. On steep grassy slopes, especially on sunny slopes, chance of larger ground avalanches and, in known sites, they could still affect manmade areas. At all exposures, on steep slopes above the tree line, slab avalanches, in isolated cases even large ones, also with the passage of single skiers-hikers, are possible. Excursions require a careful choice of itinerary, especially at higher altitudes. Beware of the possible presence of cracks in the snowpack (glide cracks).

Forecast for Saturday 30 January 2021, reliability: 70%

Avalanche danger 3 (considerable) throughout the territory.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 800 m
T.average 1000: 3 °C
T.average 2000: -1 °C

Weather by OSMER - ARPA FVG:
Cloudy skies, possible weak snowfall at 500-800 m. Inversions at high altitudes.

Snow cover conditions and avalanche danger: Possible weak snowfall that makes accumulations of unstable wind-blown snow at high altitudes less visible. On the Alps and Prealps, avalanche danger will be 3 (considerable): small- medium-sized natural avalanches are possible on steeper slopes. On steep grassy slopes, especially on sunny slopes, chance of larger ground avalanches and, in known sites, they could still affect manmade areas. At all exposures, on steep slopes above the tree line, slab avalanches, in isolated cases even large ones, also with the passage of single skiers-hikers, are possible. Excursions require a careful choice of itinerary, especially at higher altitudes. Beware of the possible presence of cracks in the snowpack (glide cracks).
