

Situation of 03 February 2021 edition of the hours 14-next update 05-02-2021 hours 14, forecaster: MA

reliability: 80%

Chance of both natural and triggered avalanches, locally with low overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1500 m  
T.average 1000: 2 °C  
T.average 2000: 0 °C

**Weather by OSMER - ARPA FVG:**

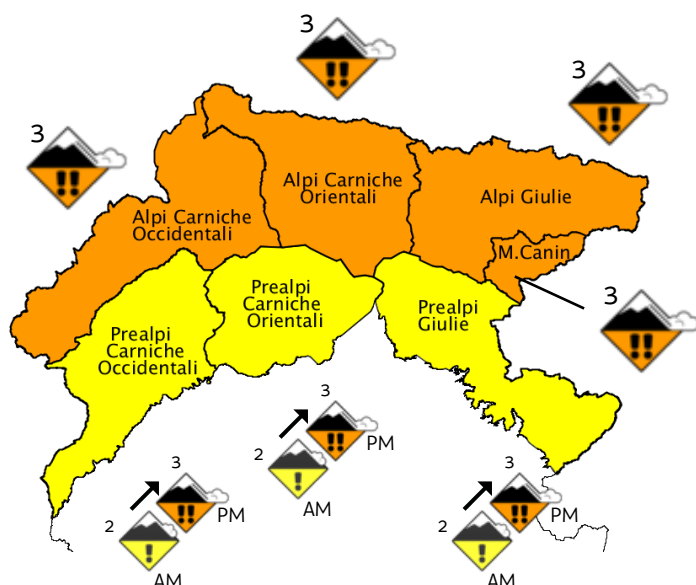

Overcast skies in the Prealps, improved weather in the Alps. Light rain or sleet in the Julian Prealps.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	274	0	-4,5	3,5
VARMOST M.TE SIMONE	1870	186	0	-3	5
SELLA NEVEA - LIVINAL LUNC	1837	411	0	-3,5	4
PIANCAVALLO	1280	112	0	-1,5	3,5
TARVISIO	800	64	0	-4	5,5

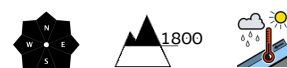

**Snow cover conditions and avalanche danger:** Snowpack tends to consolidate especially at medium altitudes and on southern slopes. In the Alps above 1,800 m, avalanche danger is 3 (considerable) while, below this altitude and in the Prealps, avalanche danger is 2 (moderate), possibly increasing to 3 (considerable) during warmer hours: in areas with wind-blown accumulations, at all exposures above 1,800 m, chance of triggered slab avalanches, generally medium-sized, mainly with high overload. Low overload not excluded on steep slopes on the Alps and during the warm hours also on the Prealps, with possible, even large-sized, avalanches. Also during warmer hours, especially at medium altitudes and at all exposures, small- and medium-sized natural avalanches are possible along the usual steep slopes. On steep grassy slopes, especially on southern slopes, chance of occasional large slip avalanches.

Forecast for Thursday 04 February 2021, reliability: 70%

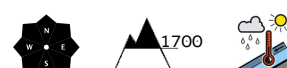

Chance of both natural and triggered avalanches, locally with low overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2300 m  
T.average 1000: 5 °C  
T.average 2000: 1 °C

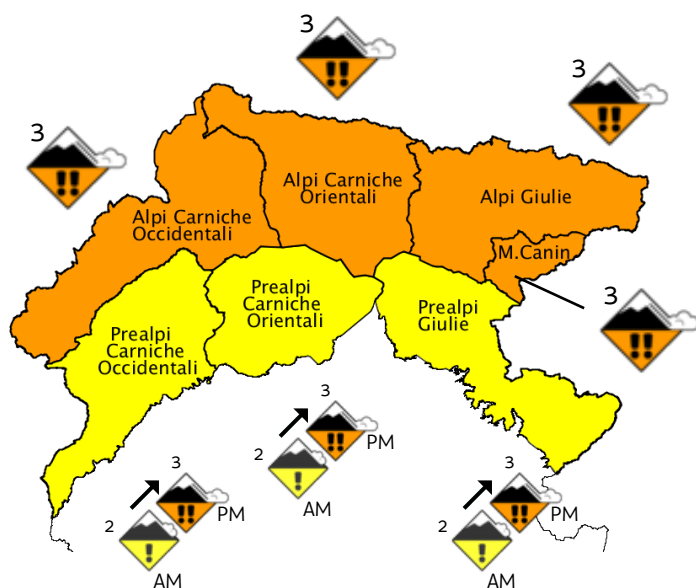

**Weather by OSMER - ARPA FVG:**

Usually cloudy or variable skies.

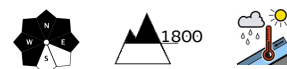

**Snow cover conditions and avalanche danger:** Variable skies over the Alps, cloudy over the Prealps. In the Alps above 1,800 m, avalanche danger will be 3 (considerable) while, below this altitude and in the Prealps, avalanche danger will be 2 (moderate), possibly increasing to 3 (considerable) during warmer hours: in areas with wind-blown accumulations at all exposures above 1,800 m, chance of triggered slab avalanches, generally medium-sized, mainly with high overload. Low overload not excluded on steep slopes on the Alps and during the warm hours also on the Prealps, with possible, even large-sized, avalanches. Also during warmer hours, especially at medium altitudes and at all exposures, small- and medium-sized natural avalanches are possible along the usual steep slopes. On steep grassy slopes, especially on southern slopes, chance of occasional large slip avalanches.

Forecast for Friday 05 February 2021, reliability: 60%

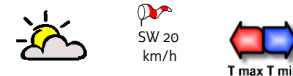

Chance of both natural and triggered avalanches, locally with low overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

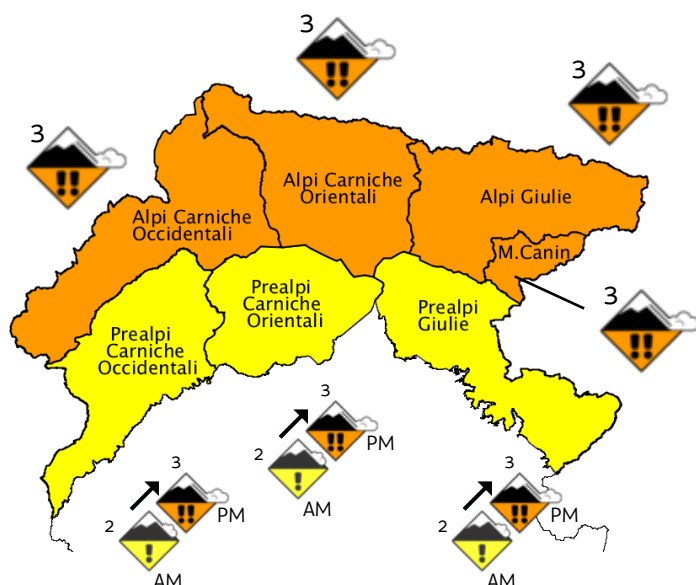

Thermal Zero: 2800 m  
T.average 1000: 5 °C  
T.average 2000: 1 °C

**Weather by OSMER - ARPA FVG:**  
Variable cloudy skies in the Prealps, chance of light scattered showers.

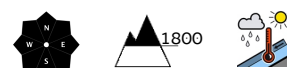

**Snow cover conditions and avalanche danger:** Generally variable skies. In the Alps above 1,800 m, avalanche danger will be 3 (considerable) while, below this altitude and in the Prealps, avalanche danger will be 2 (moderate), possibly increasing to 3 (considerable) during warmer hours: in areas with wind-blown accumulations at all aspects above 1,800 m, chance of triggered slab avalanches, generally medium-sized, mainly with high overload. Low overload not excluded on steep slopes on the Alps and during the warm hours also on the Prealps, with possible, even large-sized, avalanches. Also during warmer hours, especially at medium altitudes and at all exposures, small- and medium-sized natural avalanches are possible along the usual steep slopes. On steep grassy slopes, especially on southern slopes, chance of occasional large slip avalanches.

Forecast for Saturday 06 February 2021, reliability: 60%

Chance of both natural and triggered avalanches, locally with low overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 3000 m  
T.average 1000: 5 °C  
T.average 2000: 2 °C

**Weather by OSMER - ARPA FVG:**  
Variable to overcast skies, chance light showers and mist.

**Snow cover conditions and avalanche danger:** By Saturday, the freezing point and temperatures will rise at 3,000 m. In the Alps above 1,800 m, avalanche danger will be 3 (considerable) while, below this altitude and in the Prealps, avalanche danger will be 2 (moderate), possibly increasing to 3 (considerable) during warmer hours: in areas with wind-blown accumulations at all exposures beyond 1,800 m, chance of triggered slab avalanches, generally medium-sized, mainly with high overload. Low overload not excluded on steep slopes on the Alps and during the warm hours also on the Prealps, with possible, even large-sized, avalanches. Also during warmer hours, especially at medium altitudes and at all exposures, small- and medium-sized natural avalanches are possible along the usual steep slopes. On steep grassy slopes, especially on southern slopes, chance of occasional large slip avalanches.
