

Situation of 15 February 2021 edition of the hours 14-next update 17-02-2021 hours 14, forecaster: MM

reliability: 80%

Chance of both natural and triggered avalanches, even with low overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 500 m
T.average 1000: -6 °C
T.average 2000: -8 °C

Weather by OSMER - ARPA FVG:

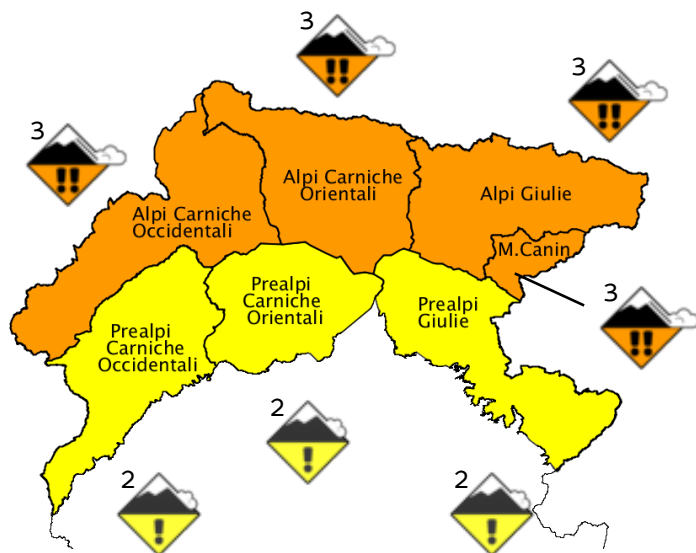

In the morning, clear or partly cloudy skies with haze. Extended frost during the night. Slightly rising temperatures.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	276	0	-10	0
VARMOST M.TE SIMONE	1870	186	0	-12	-4,3
SELLA NEVEA - LIVINAL LUNC	1837	447	0	-13	-10
PIANCAVALLO	1280	83	0	-12	-2,6
TARVISIO	800	45	0	-14	1

Snow cover conditions and avalanche danger: Strong winds in recent days have led to the formation of new snow accumulations, which can be unstable, due to the presence of fragile inner layers. On the Alps, beyond the treeline, avalanche danger is 3 (considerable): at all exposures, triggered slabs are also possible with the passage of single skiers-hikers. These can be generally medium-sized and, in some cases, they may be larger, especially in the Canin area. On the Prealps and Alps below the tree line, avalanche danger is 2 (moderate): triggered small- and medium-sized avalanches are possible, mainly with a strong overload, but also with weak, especially on steep slopes. Chance of small natural avalanches throughout, including ground avalanches and on steep grassy slopes. Careful attention should be given to the presence of cracks in the snowpack and the presence of icy areas.

Forecast for Tuesday 16 February 2021, reliability: 70%

Chance of both triggered avalanches, even with low overload, and slip avalanches.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1500 m
T.average 1000: -2 °C
T.average 2000: 0 °C

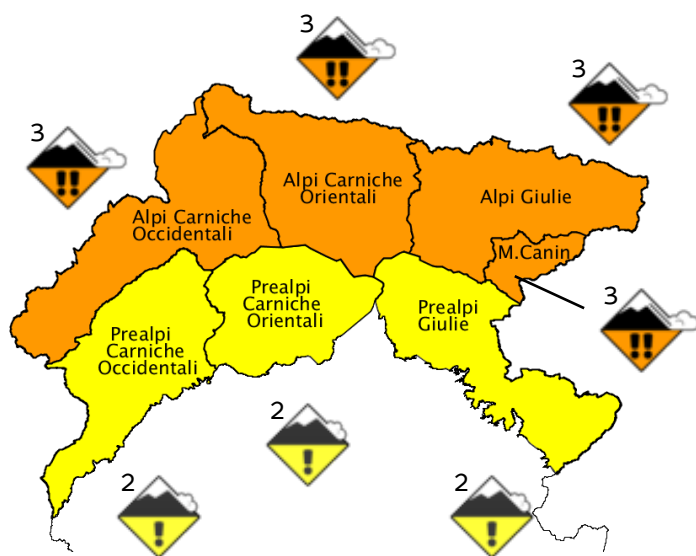

Weather by OSMER - ARPA FVG:

Mostly cloudy skies. Rise in freezing point during the day.

Snow cover conditions and avalanche danger: The snowpack will be moderately consolidated, due to the presence of unstable wind-blown accumulations. On the Alps beyond the tree line, avalanche danger will be 3 (considerable): at all exposures, triggered slabs are also possible with the passage of single skiers-hikers. These can be generally medium-sized and, in some cases, they may be larger, especially in the Canin area. On the Prealps and Alps below the tree line, avalanche danger is 2 (moderate): triggered small- and medium-sized avalanches are possible, mainly with a strong overload, but also with weak, especially on steep slopes. Chance of small natural avalanches throughout, especially near rocks on sunny slopes. The possibility of triggered ground avalanches on steep grassy slopes remains latent. Careful attention should be given to the presence of cracks in the snowpack and the presence of icy areas.

Forecast for Wednesday 17 February 2021, reliability: 70%

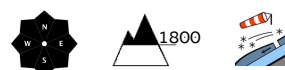

Chance of both triggered avalanches, even with low overload, and slip avalanches.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

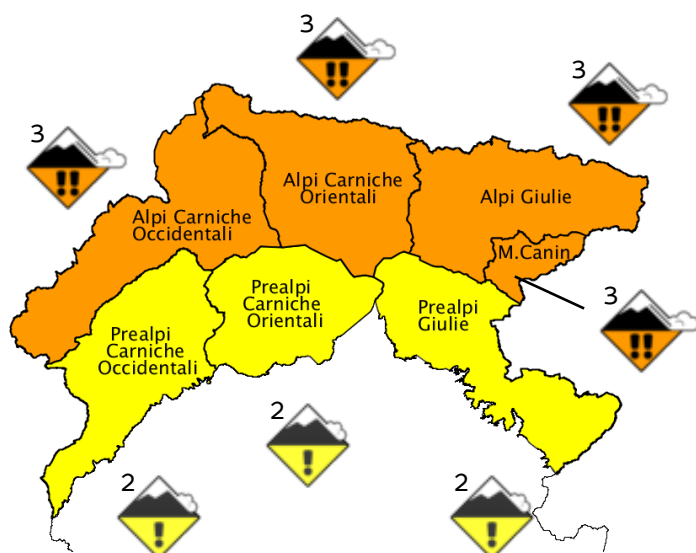

Thermal Zero: 2200 m
T.average 1000: 2 °C
T.average 2000: 1 °C

Weather by OSMER - ARPA FVG:
In the morning, partly cloudy or variable skies, followed by improving weather.

Snow cover conditions and avalanche danger: The snowpack, especially at high altitudes, will be moderately consolidated, due to the presence of unstable wind-blown accumulations. On the Alps beyond the tree line, avalanche danger will be 3 (considerable): at all exposures, triggered slabs are also possible with the passage of single skiers-hikers. These can be generally medium-sized and, in some cases, they may be larger, especially in the Canin area. On the Prealps and Alps below the tree line, avalanche danger is 2 (moderate): triggered small- and medium-sized avalanches are possible, mainly with a strong overload, but also with weak, especially on steep slopes. Chance of small natural avalanches throughout, especially near rocks on sunny slopes. The possibility of triggered ground avalanches on steep grassy slopes remains latent. Careful attention should be given to the presence of cracks in the snowpack and the presence of icy areas.

Forecast for Thursday 18 February 2021, reliability: 60%

Chance of both triggered avalanches, even with low overload, and slip avalanches.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1800 m
T.average 1000: 2 °C
T.average 2000: -1 °C

Weather by OSMER - ARPA FVG:
Cloudy skies.

Snow cover conditions and avalanche danger: The snowpack, especially at high altitudes, will be moderately consolidated, due to the presence of unstable wind-blown accumulations. On the Alps beyond the tree line, avalanche danger will be 3 (considerable): at all exposures, triggered slabs are also possible with the passage of single skiers-hikers. These can be generally medium-sized and, in some cases, they may be larger, especially in the Canin area. On the Prealps and Alps below the tree line, avalanche danger is 2 (moderate): triggered small- and medium-sized avalanches are possible, mainly with a strong overload, but also with weak, especially on steep slopes. Small natural avalanches will be possible throughout. The possibility of triggered ground avalanches on steep grassy, south-facing slopes remains latent. Careful attention should be given to the presence of cracks in the snowpack and the presence of icy areas.
