

Situation of 17 February 2021 edition of the hours 14-next update 19-02-2021 hours 14, forecaster: MM

reliability: 80%

**Chance of both natural and triggered avalanches, generally with high overload.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

NW 20  
km/h

T max T min

Thermal Zero: 2000 m  
T.average 1000: 2 °C  
T.average 2000: 0 °C

**Weather by OSMER - ARPA FVG:**

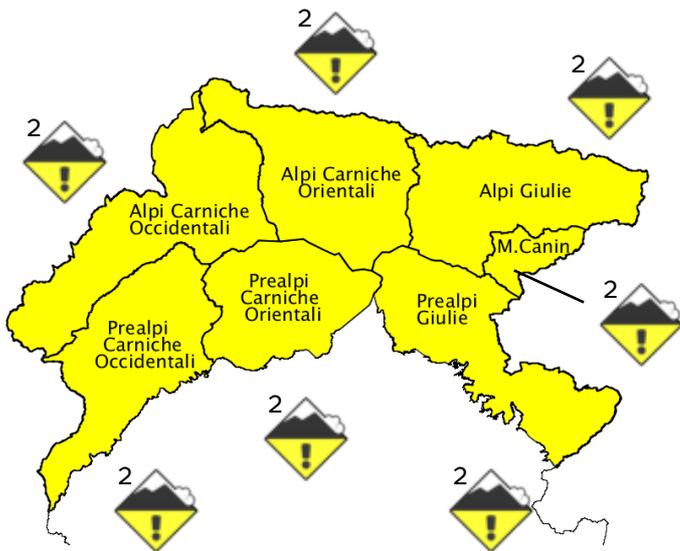

Variable cloudiness in the morning, improving during the day with clear or partly cloudy skies.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
PIANCAVALLO	1280	79,0	0	-5,2	1,7
TARVISIO	800	37,0	0	-0,5	6,8
SELLA NEVEA - LIVINAL LUNC	1837	438,0	0	1,5	7,4
RIFUGIO TAMAI - ZONCOLAN	1750	273,0	0	0,0	9,5
VARMOST M.TE SIMONE	1870	182,0	0	1,1	9,4

**Snow cover conditions and avalanche danger:** Expected rising temperatures that will lead to an increase in natural avalanches, but will also decrease the presence of fragile layers within the snowpack, making wind-blown accumulations less stable, especially on shaded slopes at high altitudes. On the Alps and Prealps, avalanche danger is 2 (moderate): at all exposures, triggered slabs and loose snow may occur, mainly with high overload but. on northerly-exposed, very steep slopes, and also on other slopes during warmer hours, the chance of generally medium-sized, triggered slabs, even with the passage of single skiers-hikers still exists. Small- and medium-sized natural avalanches are possible throughout, especially near rock formations on sunny slopes. Continued chance of triggered ground avalanches on southern, steep grassy slopes. Pay careful attention to the presence of cracks in the snowpack.

Forecast for Thursday 18 February 2021, reliability: 80%

**Chance of both natural and triggered avalanches, generally with high overload.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

NW 20  
km/h

T max T min

Thermal Zero: 2000 m  
T.average 1000: 2 °C  
T.average 2000: 0 °C

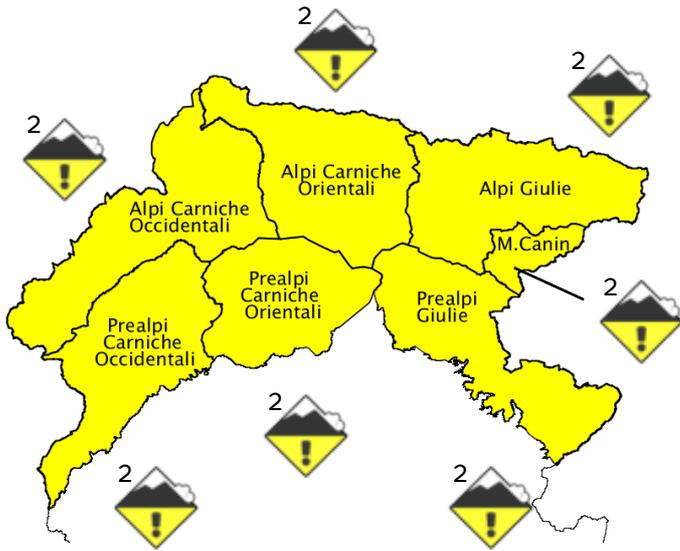

**Weather by OSMER - ARPA FVG:**

Usually clear or slightly cloudy skies over the Alps, from partly cloudy to variable over the Prealps.

**Snow cover conditions and avalanche danger:** Cloudy skies are expected with continued mild temperatures at high altitudes, which can favor natural avalanches, especially in the afternoon. On the Alps and Prealps, avalanche danger will be 2 (moderate): at all exposures, triggered slabs and loose snow may occur, mainly with high overload but. on northerly-exposed, very steep slopes, and also on other slopes during warmer hours, the chance of generally medium-sized, triggered slabs, even with the passage of single skiers-hikers still exists. Small- and medium-sized natural avalanches are possible throughout, especially near rock formations on sunny slopes. Continued chance of triggered ground avalanches on southern, steep grassy slopes. Pay careful attention to the presence of cracks in the snowpack.

Forecast for Friday 19 February 2021, reliability: 70%

Chance of both natural and triggered avalanches, generally with high overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2000 m  
T.average 1000: 2 °C  
T.average 2000: 0 °C

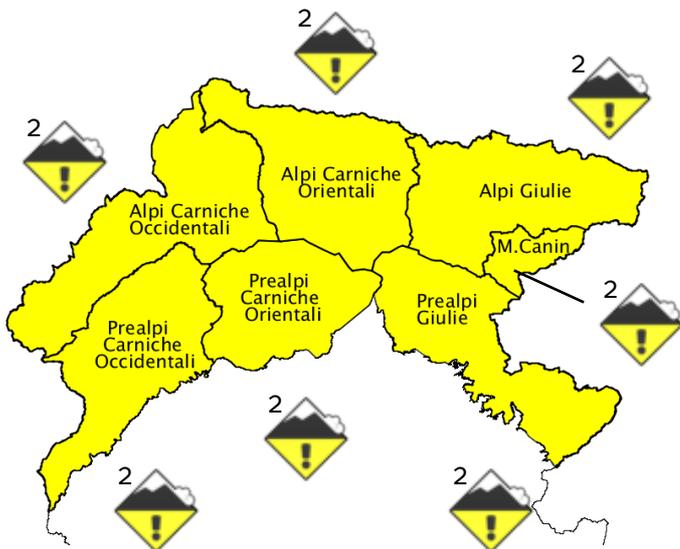

Weather by OSMER - ARPA FVG:

Slightly cloudy skies caused by haze, cloudier in the Prealps near plains.

**Snow cover conditions and avalanche danger:** Cloudy skies, caused by haze at high altitudes. Temperature inversions, especially at night. On the Alps and Prealps, avalanche danger will be 2 (moderate): at all exposures, triggered slabs and loose snow may occur, mainly with high overload but. on northerly-exposed, very steep slopes, and also on other slopes during warmer hours, the chance of generally medium-sized, triggered slabs, even with the passage of single skiers-hikers still exists. Small- and medium-sized natural avalanches are possible throughout, especially near rock formations on sunny slopes. Continued chance of triggered ground avalanches on southern, steep grassy slopes. Pay careful attention to the presence of cracks in the snowpack.

Forecast for Saturday 20 February 2021, reliability: 60%

Rising temperatures with consequent increase in natural avalanches.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2800 m  
T.average 1000: 3 °C  
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:

Clear or partly cloudy skies.

**Snow cover conditions and avalanche danger:** A continued rise temperatures is expected, which may lead to an increase in natural avalanches, especially on sunnier slopes. On the Alps and Prealps, avalanche danger will be 2 (moderate): at all exposures, triggered slabs and loose snow may occur, mainly with high overload but. on northerly-exposed, very steep slopes, and also on other slopes during warmer hours, the chance of generally medium-sized, triggered slabs, even with the passage of single skiers-hikers still exists. Small- and medium-sized natural avalanches are possible throughout, especially near rock formations on sunny slopes. Increased chance of triggered ground avalanches on southern, steep grassy slopes. Pay careful attention to the presence of cracks in the snowpack.
