

Situation of 26 February 2021 edition of the hours 14-next update 01-03-2021 hours 14, forecaster: MA

reliability: 80%

From late morning, natural avalanches are likely due to rising temperatures.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 3000 m
T.average 1000: 9 °C
T.average 2000: 6 °C

Weather by OSMER - ARPA FVG:

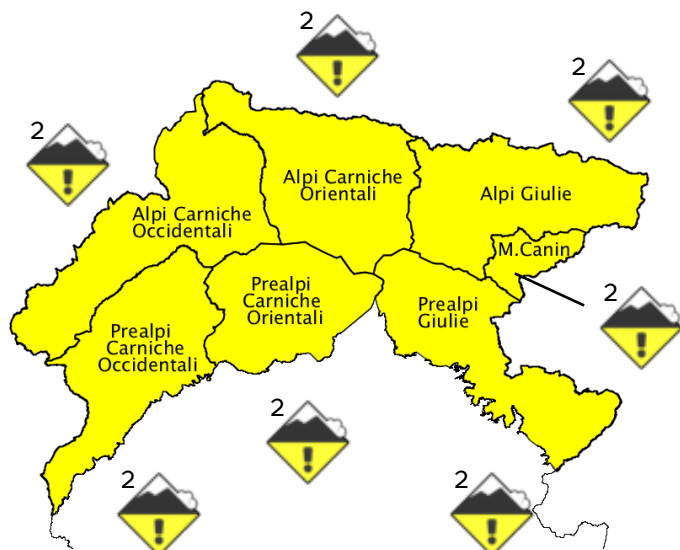

Mostly clear skies. Nighttime thermal inversion.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
PIANCAVALLO	1280	74,0	0	2,8	14,1
TARVISIO	800	7,0	0	-2,8	15,7
SELLA NEVEA - LIVINAL LUNC	1837	420,0	0	4,0	10,1
RIFUGIO TAMAI - ZONCOLAN	1750	258,0	0	5,5	13,9
VARMOST M.TE SIMONE	1870	165,0	0	4,1	12,7

Snow cover conditions and avalanche danger: Temperatures still high for this season. Avalanche danger will be 2 (moderate) until late morning, increasing to 3 (considerable) until evening: from late morning, chance of superficial natural avalanches, both with loose cohesion and slabs of damp or wet snow, as well as slip avalanches on steep grassy slopes, medium to large in size, at all exposures, but especially on sunny slopes. At maximum altitudes, in areas of accumulation, at NW to NE exposures, the triggering of medium-sized slabs may still occur, mainly with high overload, while from late morning throughout on steep slopes, the chance of triggered avalanches still exists, even with the passage of skiers. Several wet snow avalanches may affect man-made areas. Absolutely avoid grassy areas with glide cracks in the snowpack. Time excursions carefully.

Forecast for Saturday 27 February 2021, reliability: 70%

During warm hours, possible natural avalanches of damp or wet snow.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2000 m
T.average 1000: 6 °C
T.average 2000: 0 °C

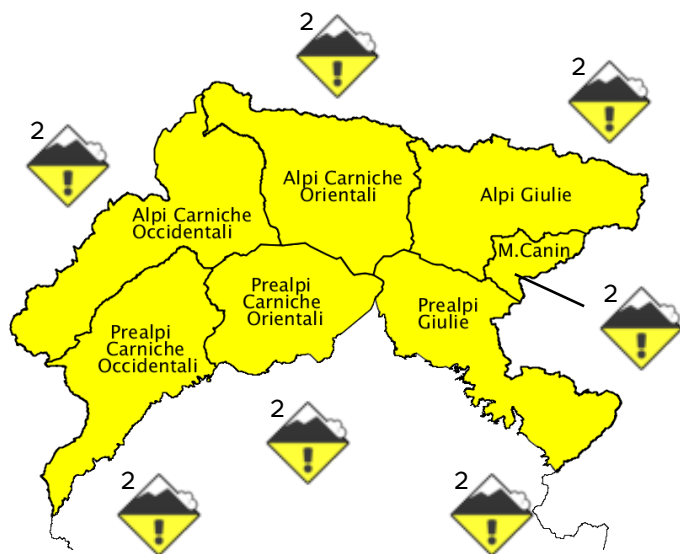

Weather by OSMER - ARPA FVG:

Mostly cloudy skies in the morning. Generally clear skies during the rest of the day. Decreasing maximum temperatures

Snow cover conditions and avalanche danger: Expected drop in maximum temperatures. This condition may favor a certain consolidation of the snowpack. In the Alps and Prealps, avalanche danger will be 2 (moderate): during warmer hours, chance of both superficial natural avalanches of damp or wet loose snow and slip avalanches on steep grassy slopes, usually small- and medium-sized, especially on sunny slopes. At maximum altitudes, in areas of accumulation, at northern exposures, the triggering of medium-sized slabs may still occur, especially with high overload. Grassy areas with glide cracks in the snowpack must still be avoided. Time excursions carefully.

Forecast for Sunday 28 February 2021, reliability: 60%

On steep grassy slopes, chance of slip avalanches from southern sides.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1700 m
T.average 1000: 2 °C
T.average 2000: -1 °C

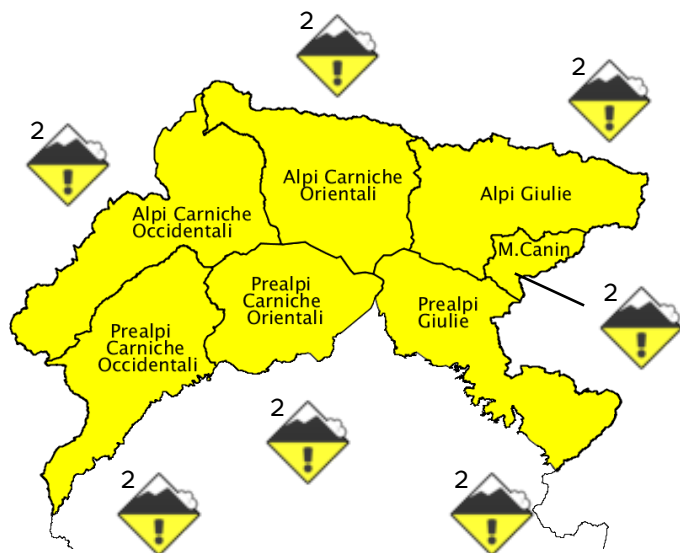

Weather by OSMER - ARPA FVG:

Generally clear skies. Decreasing temperatures.

Snow cover conditions and avalanche danger: Clear skies and temperatures further decreasing. In the Alps and Prealps, avalanche danger will be 2 (moderate): at maximum altitudes, at northern exposures, in areas of accumulation, the triggering of medium-sized slabs may still occur, especially with high overload. On steep grassy slopes, medium-sized and, only occasionally large-sized, slip avalanches are still possible, while natural avalanche activity will be contained and characterized by small phenomena on southern slopes. Areas with glide cracks in the snowpack must still be avoided. Pay careful attention to icy sections, especially in the early morning.

Forecast for Monday 01 March 2021, reliability: 60%

Possible natural avalanches of damp or wet snow during warm hours.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2500 m
T.average 1000: 5 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:

Clear skies. Slightly rising temperatures.

Snow cover conditions and avalanche danger: Continued favorable weather and clear skies with rising temperatures. In the Alps and Prealps, avalanche danger will be 2 (moderate): during warmer hours, chance of both superficial natural avalanches of damp or wet loose snow and slip avalanches on steep grassy slopes, usually small- and medium-sized, especially on sunny slopes. At maximum altitudes, in areas of accumulation, at northern exposures, the triggering of medium-sized slabs may still occur, especially with high overload. Grassy areas with glide cracks in the snowpack must still be avoided. Pay careful attention to icy sections in the early morning.
