

Situation of 29 March 2021 edition of the hours 14-next update 31-03-2021 hours 14, forecaster: MM

reliability: 80%

Increasing temperatures with possible natural and triggered avalanches on steep slopes.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2700 m
T.average 1000: 9 °C
T.average 2000: 4 °C

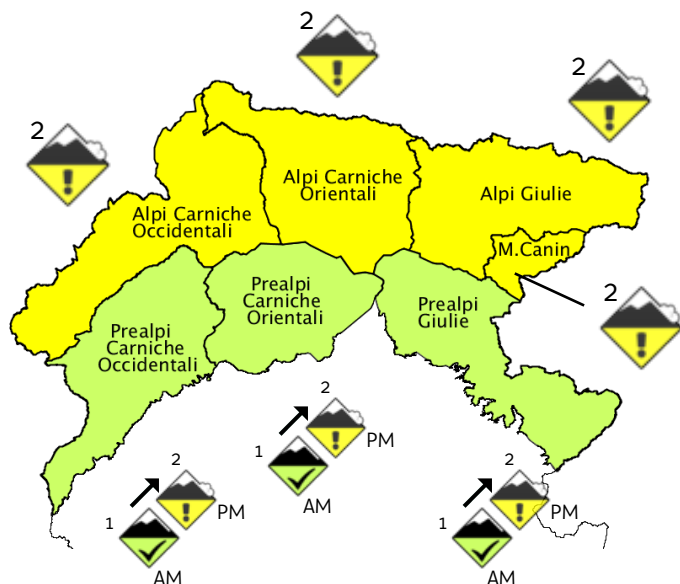

Weather by OSMER - ARPA FVG:
Variable skies in the Prealps, slightly cloudy in the Alps.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
PIANCAVALLO	1280	58,0	0	-nd	-nd
TARVISIO	800	10,0	0	-1,2	9,3
SELLA NEVEA - LIVINAL LUNC	1837	422,0	0	-0,1	4,7
RIFUGIO TAMAI - ZONCOLAN	1750	248,0	0	0,6	3,8
VARMOST M.TE SIMONE	1870	140,0	0	0,1	8,0

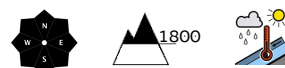

Snow cover conditions and avalanche danger: Cloudy skies with increasing temperatures. In the Alps and Canin area, avalanche danger is 2 (moderate); above 1800-1900 m, especially on shady slopes. Isolated wind-drifted accumulations of snow are still present which, if mainly stressed with a high overload, can cause triggered avalanches. During the warmest hours, at all exposures on very steep slopes, avalanches can even occur with the passage of single skiers-hiker. These can, in some cases, reach medium size. On the Prealps, avalanche danger is 1 (weak) in the morning, increasing to 2 (moderate) from late morning: in the north, on very steep slopes and in very isolated areas, small triggered avalanches are possible, especially with high overload. Throughout the territory, from late morning, on steep sunny slopes, chance of small- and medium-sized natural avalanches of wet snow, and/or slip avalanches on steep grassy slopes.

Forecast for Tuesday 30 March 2021, reliability: 80%

Further rise in temperatures with possible natural and triggered avalanches.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

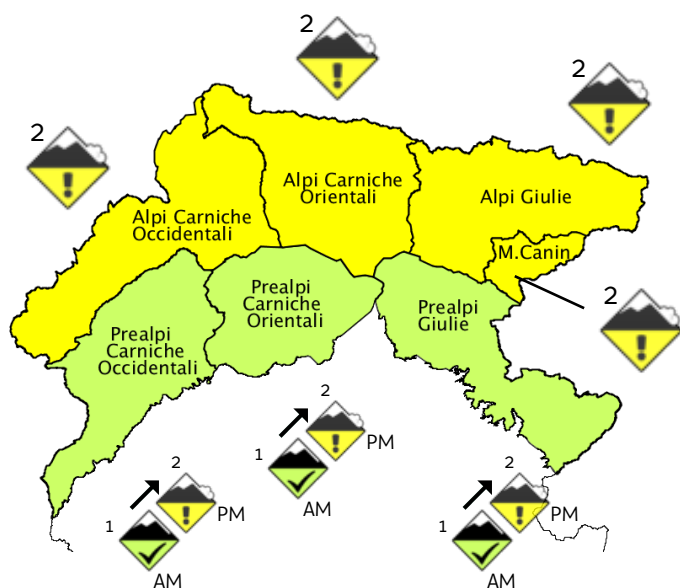

Thermal Zero: 3000 m
T.average 1000: 11 °C
T.average 2000: 7 °C

Weather by OSMER - ARPA FVG:
Clear or partly cloudy skies.

Snow cover conditions and avalanche danger: Clear skies with a further rise in temperatures and consequent increase in the possibility of avalanches, especially on sunnier slopes. On the Alps and in the Canin area, avalanche danger will be 2 (moderate); isolated wind-drifted accumulations of snow present at high altitudes, if stressed with a high overload, may cause small triggered avalanche. However, during the warmest hours, at all exposures on very steep slopes, avalanches can even occur with passage of single skiers-hikers, also reaching medium-size. In the Prealps, avalanche danger will be 1 (weak) in the morning, increasing to 2 (moderate) from late morning: in the north on the steepest slopes and in very isolated areas, small triggered avalanches are possible, generally with a high overload. Throughout the territory, from the morning, on steep sunny slopes, chance small- and medium-sized natural avalanches of wet snow, and/or slip avalanches on steep grassy slopes.

Forecast for Wednesday 31 March 2021, reliability: 70%

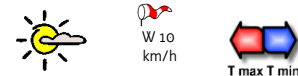

Continued high temperatures with possible natural and triggered avalanches on steep slopes.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

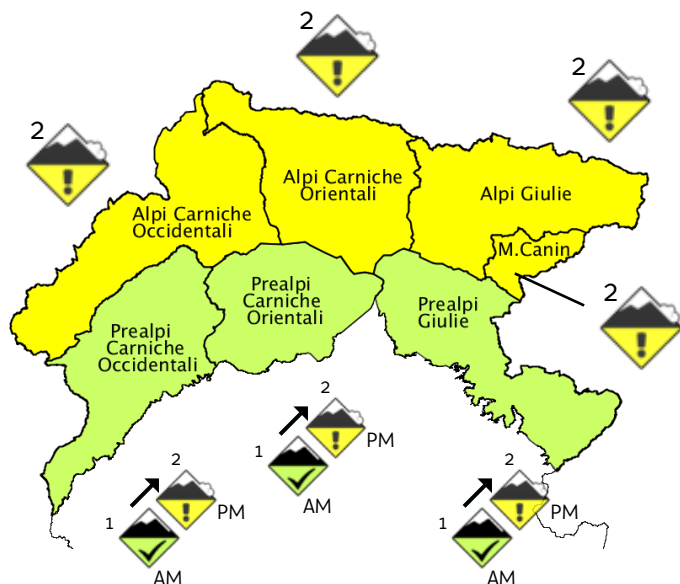

Thermal Zero: 3200 m
T.average 1000: 12 °C
T.average 2000: 6 °C

Weather by OSMER - ARPA FVG:
Clear or partly cloudy skies.

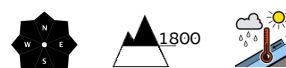

Snow cover conditions and avalanche danger: Clear skies and continued high temperatures will favor the possibility of avalanches, especially on sunnier slopes. On the Alps and in the Canin area, avalanche danger will be 2 (moderate): isolated wind-drifted accumulations of snow present at high altitudes, if stressed with a high overload, may cause small triggered avalanche. However, during the warmest hours, at all exposures on very steep slopes, avalanches can even occur with passage of single skiers-hikers, also reaching medium-size. In the Prealps, avalanche danger will be 1 (weak) in the morning, increasing to 2 (moderate) from late morning: in the north on the steepest slopes and in very isolated areas, small triggered avalanches are possible, generally with a high overload. Throughout the territory, from the morning, on steep sunny slopes, chance of small- and medium-sized natural avalanches of wet snow, and/or slip avalanches on steep grassy slopes.

Forecast for Thursday 01 April 2021, reliability: 70%

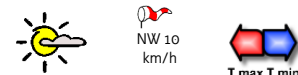

Continued high temperatures with possible natural and triggered avalanches on steep slopes.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 3100 m
T.average 1000: 11 °C
T.average 2000: 7 °C

Weather by OSMER - ARPA FVG:
Cloudy skies.

Snow cover conditions and avalanche danger: Clear skies and continued high temperatures will favor the possibility of avalanches, especially on sunnier slopes. On the Alps and in the Canin area, avalanche danger will be 2 (moderate): isolated wind-drifted accumulations of snow present at high altitudes, if stressed with a high overload, may cause small triggered avalanche. However, during the warmest hours, at all exposures on very steep slopes, avalanches can even occur with passage of single skiers-hikers, also reaching medium-size. In the Prealps, avalanche danger will be 1 (weak) in the morning, increasing to 2 (moderate) from late morning: in the north on the steepest slopes and in very isolated areas, small triggered avalanches are possible, generally with a high overload.
