

Situation of 12 May 2021 edition of the hours 14-next update 14-05-2021 hours 14, forecaster: MM

reliability: 80%

Chance of wet-snow avalanches, natural and triggered, also due to passage of single skiers-hikers.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

NE 20

T max T min

Thermal Zero: 2500 m  
T.average 1000: 11 °C  
T.average 2000: 3 °C

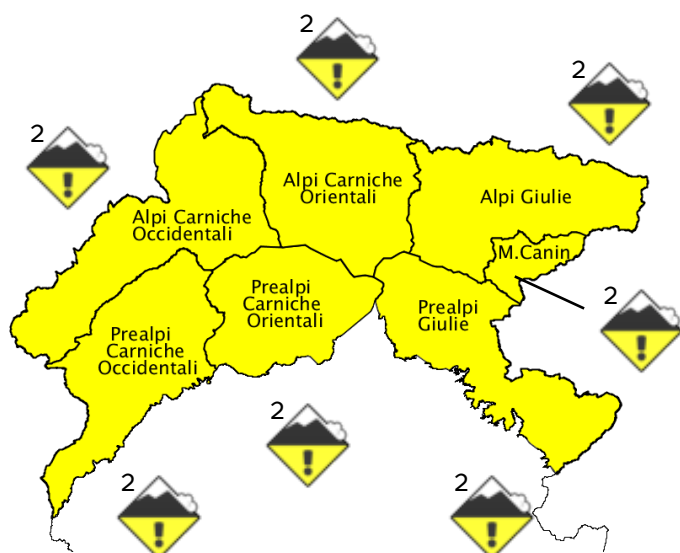

**Weather by OSMER - ARPA FVG:**  
Overcast skies with scattered rain.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
PIANCAVALLO	1280	-nd	-nd	-nd	-nd
TARVISIO	800	26,0	98,0	9,4	22,3
SELLA NEVEA - LIVINAL LUNC	1837	357,0	53,0	2,7	10,9
RIFUGIO TAMAI - ZONCOLAN	1750	162,0	12,0	2,4	10,5
VARMOST M.TE SIMONE	1870	56,0	40,0	2,5	9,1

**Snow cover conditions and avalanche danger:** The mountain area was affected by abundant rainfall, snow only at very high altitudes. The greatest criticality is caused by a heavier snowpack due to rain. Avalanche danger is 2 (moderate): at all exposures of steep slopes, chance of both natural and triggered wet-snow avalanches; the latter on very steep slopes can also originate from the passage of single skiers-hikers. Avalanches may be generally small or medium in size and, in isolated cases, even large, especially in the Alps. At higher altitudes, mainly near rock formations, recent loose-snow avalanches are possible. On the Prealps, danger is confined to the highest altitudes of snow-covered slopes.

Forecast for Thursday 13 May 2021, reliability: 80%

Chance of wet-snow avalanches, natural and triggered, also due to passage of single skiers-hikers.

T.average 1000: 10 °C  
T.average 2000: 2 °C

**Weather by OSMER - ARPA FVG:**  
Variable skies with chance of showers, abundant in the afternoon on the Prealps.

**Snow cover conditions and avalanche danger:** Variable skies with scattered showers and thunderstorms, with more abundant rain possible in the Prealps. The snowpack will not be well-consolidated due to rain. Avalanche danger will be 2 (moderate): at all exposures of steep slopes, chance of both natural and triggered wet-snow avalanches; the latter on very steep slopes can also originate with the passage of single skiers-hikers. Avalanches will be generally small or medium in size and, in isolated cases, even large, especially in the Alps. At higher altitudes, mainly near rock formations, recent loose-snow avalanches will be possible. On the Prealps, danger will be confined to the highest altitudes of snow-covered slopes.

Forecast for Friday 14 May 2021, reliability: 70%

Chance of wet-snow avalanches, natural and triggered, even due to the passage of single skiers-hikers.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2300 m  
T.average 1000: 9 °C  
T.average 2000: 1 °C

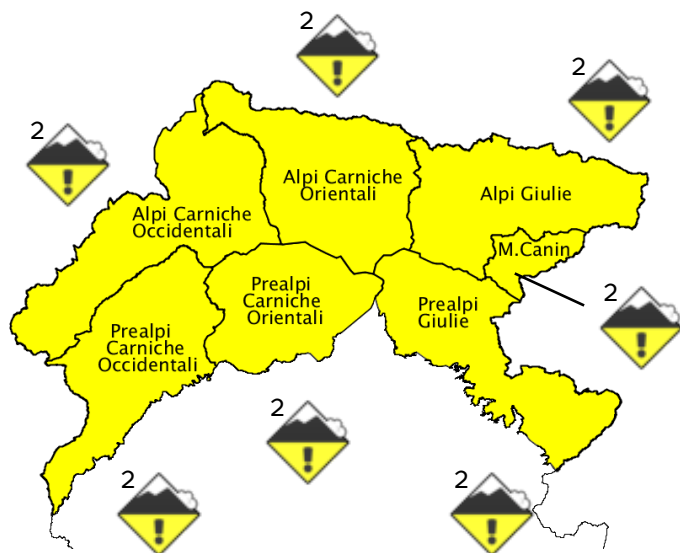

**Weather by OSMER - ARPA FVG:**

Variable cloudiness with chance of showers and scattered thunderstorms.

**Snow cover conditions and avalanche danger:** Cloudy to variable skies with the possibility of showers, which will not allow for a good consolidation of the snowpack. Avalanche danger will be 2 (moderate): on very steep slopes, chance of both natural and triggered wet-snow avalanches; the latter could also originate with the passage of single skiers-hikers. Avalanches will be generally small or medium in size, in isolated cases even large, especially in the Alps. At higher altitudes, mainly near rock formations, recent loose-snow avalanches will be possible. On the Prealps, avalanche danger will be confined to the highest altitudes of snow-covered slopes.

Forecast for Saturday 15 May 2021, reliability: 70%

Chance of wet-snow avalanches, natural and triggered, also due to the passage of single skiers-hikers.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2300 m  
T.average 1000: 9 °C  
T.average 2000: 2 °C

**Weather by OSMER - ARPA FVG:**

Variable cloudiness with chance of showers and scattered thunderstorms, especially from the afternoon.

**Snow cover conditions and avalanche danger:** Continued unstable weather with chance of showers and scattered thunderstorms. The snowpack will not be well-consolidated due to rain. Avalanche danger will be 2 (moderate): on very steep slopes, chance of both natural and triggered wet-snow avalanches; the latter could also originate with the passage of single skiers-hiker. Avalanches will be generally small or medium in size and, in isolated cases, even large, especially in the Alps. At higher altitudes, mainly near rock formations, recent loose-snow avalanches will be possible. On the Prealps, danger will be confined to the highest altitudes of snow-covered slopes.
