

Situation of 26 November 2021 edition of the hours 14-next update 29-11-2021 hours 14, forecaster: MM

reliability: 80%

Weak to moderate snowfall over the Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1800 m
T.average 1000: 4 °C
T.average 2000: -1 °C

Weather by OSMER - ARPA FVG:

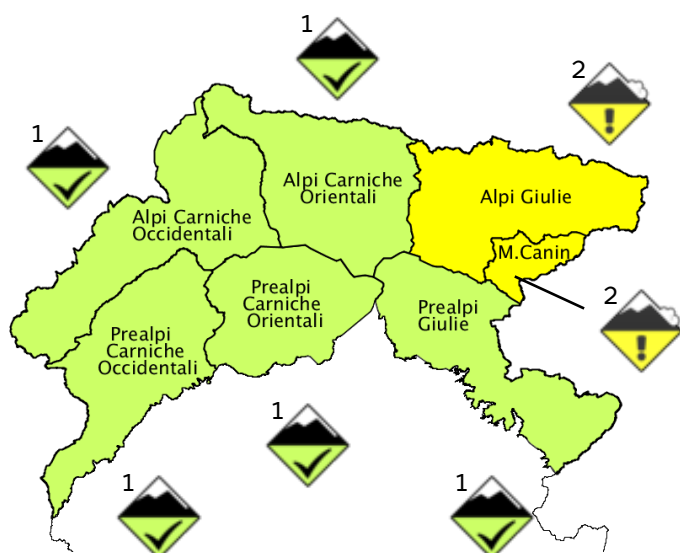

Cloudy sky with snow above approx. 1400 m.
Only rainfall likely on the Prealps.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	11,0	3,0	-1,0	1,3
VARMOST M.TE SIMONE	1870	6,0	2,0	-1,0	2,3
SELLA NEVEA - LIVINAL LUNC	1837	32,0	5,0	0,0	1,5
PIANCAVALLO	1280	1,0	1,0	1,0	3,6
TARVISIO	800	1,0	1,0	0,0	5,0

Snow cover conditions and avalanche danger: The mountain area is affected by light to moderate precipitation, with snow above approximately 1,400 m. In the Alps, above approximately 1800 m, avalanche danger is 1 (low). In isolated cases, on very steep slopes, chance of small avalanches, generally with a high overload. Natural avalanche activity is limited to fresh-snow avalanches from steeper slopes and rock formations and walls. Beware of areas where old snow is still present, since it may not offer optimal adherence for the new snow expected. On the Pre-Alps, precipitation will be mostly rain, so snow will not be present, except at higher altitudes.

Forecast for Saturday 27 November 2021, reliability: 70%

Additional snowfall is expected, more abundant in the east.

Alpi Giulie, M. Canin

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Prealpi Giulie

Thermal Zero: 1300 m
T.average 1000: 2 °C
T.average 2000: -3 °C

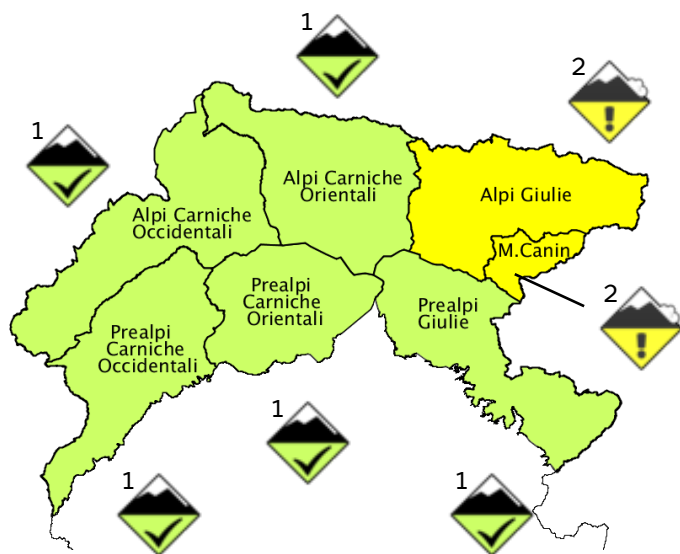

Weather by OSMER - ARPA FVG:

Overcast sky with more abundant snowfall in the east and less in the west.

Snow cover conditions and avalanche danger: Snowfall is still expected, more significant in the east (25-35 cm) and less in the west (10-20 cm). On the Julian Alps and Canin area, above approximately 1,800 m, avalanche danger will be 2 (moderate). Chance of small- to medium-sized natural, loose-snow avalanches from rock formations and very steep slopes. Chance of trigger avalanches, even of medium size, on very steep slopes, mainly with a strong overload. Beware of areas with old snow, since the snowpack could be less consolidated. On the Carnic Alps and Pre-Alps, the avalanche danger will be 1 (low). On high slopes, chance of small natural and triggered, loose-snow avalanches, the latter generally with a strong overload.

Forecast for Sunday 28 November 2021, reliability: 70%

Chance of avalanches, even of medium size, in the Julian and Canin Alps.

Alpi Giulie, M. Canin

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Prealpi Giulie

Thermal Zero: 1000 m
T.average 1000: 0 °C
T.average 2000: -5 °C

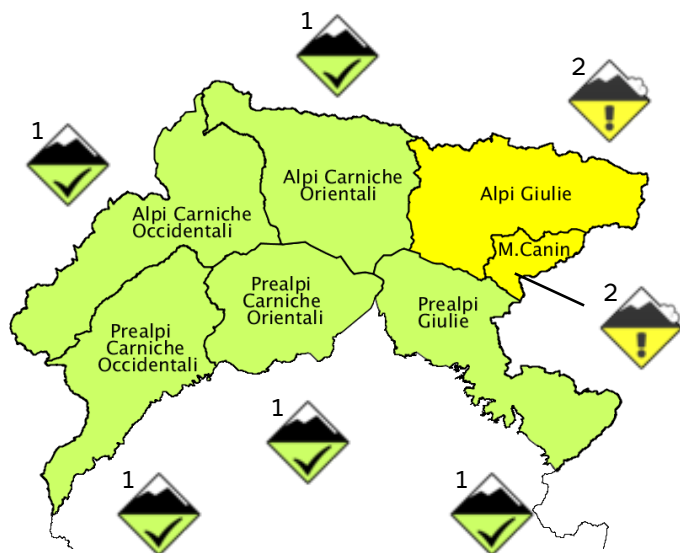

Weather by OSMER - ARPA FVG:

Light snowfall during the night, variable during the day.

Snow cover conditions and avalanche danger: During the night, light snowfall will still affect the mountain area, and skies will be variable during the day. On the Julian Alps and Canin area, above approximately 1800 m, avalanche danger will be 2 (moderate). Chance of small- to medium-sized natural, loose-snow avalanches from rock formations and walls, as well as very steep slopes. Chance of triggered avalanches, even of medium size, on very steep slopes, mainly with a strong overload. Beware of areas with old snow, since the snowpack could be less consolidated. On the Carnic Alps and Pre-Alps, avalanche danger will be 1 (low). On high slopes, chance of small natural and triggered, loose-snow avalanches, the latter generally with a strong overload.

Forecast for Monday 29 November 2021, reliability: 70%

Chance of avalanches, even of medium size, in the Julian and Canin Alps.

Alpi Giulie, M. Canin

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Prealpi Giulie

Thermal Zero: 900 m
T.average 1000: -4 °C
T.average 2000: -8 °C

Weather by OSMER - ARPA FVG:

Clear skies with falling temperatures.

Snow cover conditions and avalanche danger: Clear skies with a sharp drop in temperatures. On the Julian Alps and Canin area, above approximately 1800 m, avalanche danger will be 2 (moderate). Chance of triggered avalanches, even of medium size, on very steep slopes, mainly with a strong overload. Natural avalanche activity will be decreasing. Beware of areas with old snow, since the snowpack could be less consolidated. On the Carnic Alps and Pre-Alps, avalanche danger will be 1 (low). On higher slopes, chance of small avalanches, generally with a strong overload. Natural activity will be very limited.
