

Situation of 29 November 2021 edition of the hours 14-next update 01-11-2021 hours 14, forecaster: MA

reliability: 80%

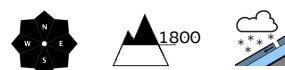

Chance of triggered avalanches in the Alps, locally even with low overload

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

N 40  
km/h

Thermal Zero: 900 m  
T.average 1000: -4 °C  
T.average 2000: -8 °C

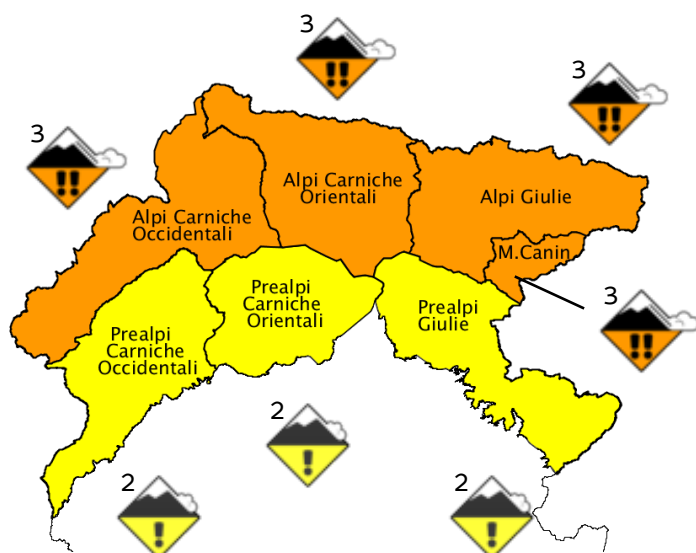

**Weather by OSMER - ARPA FVG:**  
Generally cloudy skies with decreasing temperatures.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	41	5	-9	-4
VARMOST M.TE SIMONE	1870	54	12	-9	-1
SELLA NEVEA - LIVINAL LUNC	1837	120	27	-9	-3
PIANCAVALLO	1280	16	5	-6	1
TARVISIO	800	23	8	-1	2

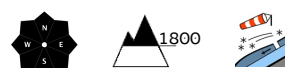

**Snow cover conditions and avalanche danger:** The mountain area was affected by abundant precipitation, snow even at low altitudes. In the Alps and in the Canin area, avalanche danger is 3 (considerable). Generally above 1800 m, chance of medium-sized natural, loose-snow avalanches from rocky walls and very steep slopes. Furthermore, at all exposures, in areas with wind-blown accumulations, especially under ridges, passes, and along gullies, chance of medium-sized slab avalanches and, in some cases, even large-sized, mainly with heavy overload, is not excluded. On steep slopes, even with low overload. On the Prealps, avalanche danger is 2 (moderate). On higher slopes small-sized and also several medium-sized avalanches, mainly with high overload, are possible.

Forecast for Tuesday 30 November 2021, reliability: 60%

Avalanche danger 3 (considerable) in the Alps and 2 (moderate) in the Prealps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Thermal Zero: 700 m  
T.average 1000: -3 °C  
T.average 2000: -7 °C

**Weather by OSMER - ARPA FVG:**  
Mostly variable skies, very cold at night and in the morning.

**Snow cover conditions and avalanche danger:** Mostly variable skies and continued falling temperatures. The expected low temperatures will not favor the consolidation of the snowpack. On the Alps and in the Canin area, avalanche danger will be 3 (considerable). Generally above 1800 m, chance of medium-sized natural, loose-snow avalanches from rocky walls and very steep slopes. Furthermore, at all exposures, in areas with wind-blown accumulations, especially under ridges, passes, and along gullies, chance of medium-sized slab avalanches and, in some cases, even large-sized, mainly with heavy overload, is not excluded. On steep slopes, even with low overload. On the Prealps, avalanche danger is 2 (moderate). On higher slopes, small-sized and also several medium-sized avalanches, mainly with high overload, are possible.

Forecast for Wednesday 01 December 2021, reliability: 60%

**Avalanche danger 3 (considerable) in the Alps and 2 (moderate) in the Prealps.**

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2200 m  
T.average 1000: 1 °C  
T.average 2000: -1 °C

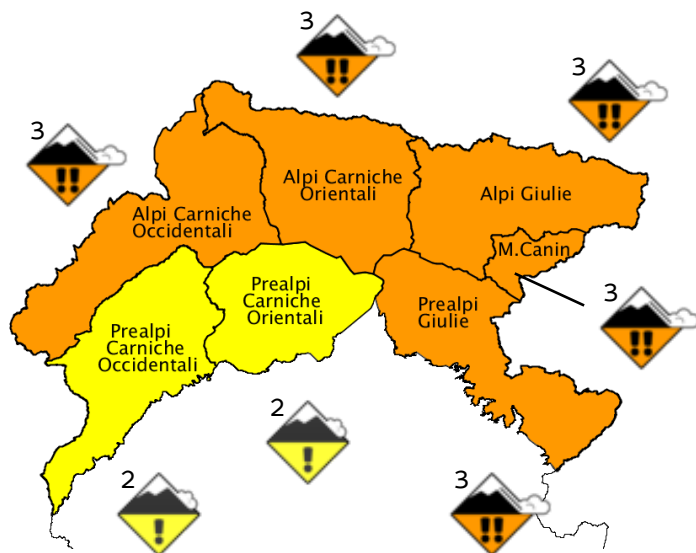

**Weather by OSMER - ARPA FVG:**

Clear or partly cloudy skies, continued cold at lower altitudes. Moderate SW wind at high altitudes.

**Snow cover conditions and avalanche danger:** Generally clear or partly cloudy skies, with slightly rising temperatures. On the Alps and in the Canin area, avalanche danger will be 3 (considerable). Generally above 1800 m, chance of medium-sized natural, loose-snow avalanches from rocky walls and very steep slopes. Furthermore, at all exposures, in areas with wind-blown accumulations, especially under ridges, passes, and along gullies, a chance of medium-sized slab avalanches and, in some cases, even large-sized, mainly with heavy overload, is not excluded. On steep slopes, even with low overload. On the Prealps, avalanche danger is 2 (moderate). On higher slopes, small-sized and also several medium-sized avalanches, mainly with high overload, are possible.

Forecast for Thursday 02 December 2021, reliability: 60%

**Avalanche danger 3 (considerable): Canin Alps and Julian Prealps, and 2 (moderate): Carnic Prealps.**

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Prealpi Carniche occ., Prealpi Carniche orient.

Thermal Zero: 1400 m  
T.average 1000: -2 °C  
T.average 2000: -7 °C

**Weather by OSMER - ARPA FVG:**

Overcast skies with moderate rainfall in the west, abundant snow in the east at 500-700 m.

**Snow cover conditions and avalanche danger:** New snowfall is expected, more significant in the east (20/50 cm), less in the west (10/20 cm). New snow and old wind-blown accumulations already present at high altitudes will be the main source of danger. On the Alps, Canin Alps, and Julian Pre-Alps, avalanche danger will be 3 (considerable). Chance of medium-sized and, in some cases, large-sized natural avalanches from rocky walls and very steep slopes. Both medium- and large-sized triggered avalanches are possible, on steep slopes, even with low overload. On the Carnic Prealps, avalanche danger will be 2 (moderate). On high slopes, chance of small-sized and, in some cases, even medium-sized loose-snow avalanches, both natural and triggered, are possible, the latter generally with high local overload and also with low overload.
