

Situation of 24 December 2021 edition of the hours 14-next update 27-12-2021 hours 14, forecaster: AM

reliability: 80%

Chance of triggered avalanches in the Alps, usually with high overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2500 m
T.average 1000: 0 °C
T.average 2000: 1 °C

Weather by OSMER - ARPA FVG:

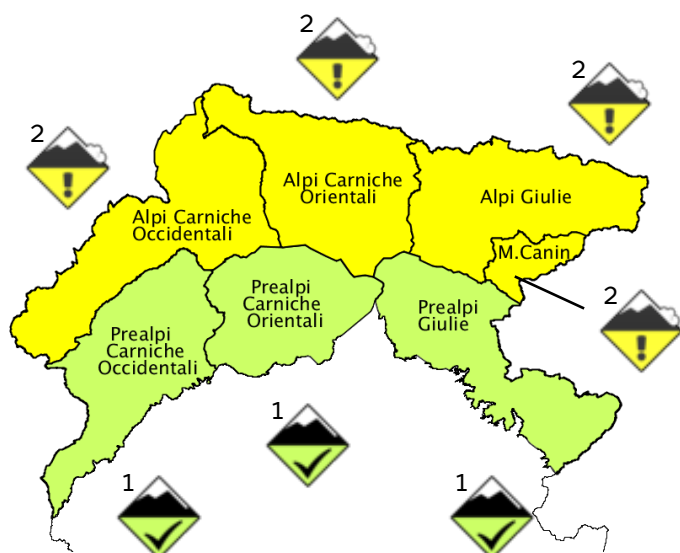

Variable weather in innermost areas. Cloudy, chance of precipitation in the Pre-Alps.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
PIANCAVALLO	1280	34	0	-8	-1
TARVISIO	800	41	0	-11	2
SELLA NEVEA - LIVINAL LUNC	1837	119	0	-4,5	1,5
RIFUGIO TAMAI - ZONCOLAN	1750	45	0	-7	0
VARMOST M.TE SIMONE	1870	48	0	-5	2,5

Snow cover conditions and avalanche danger: Variable skies and freezing temperatures at 2400 m. More cloud cover expected in the Pre-Alps. The snowpack is slowly consolidating but still contains several fragile layers. In the Alps, avalanche danger is 2 (moderate). On very steep slopes above approximately 1900-2000 m, in areas with old wind-blown accumulations, and especially at northern exposures and on steep slopes, chance of triggered avalanches with high overload, causing small- and medium-sized isolated avalanches. In the Pre-Alps, danger is 1 (weak). Some triggered avalanches are possible on the steep slopes in summit areas of northern exposures.

Forecast for Saturday 25 December 2021, reliability: 70%

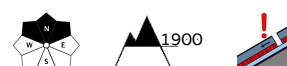

Chance of triggered avalanches in the Alps, usually with high overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2100 m
T.average 1000: 1 °C
T.average 2000: 1 °C

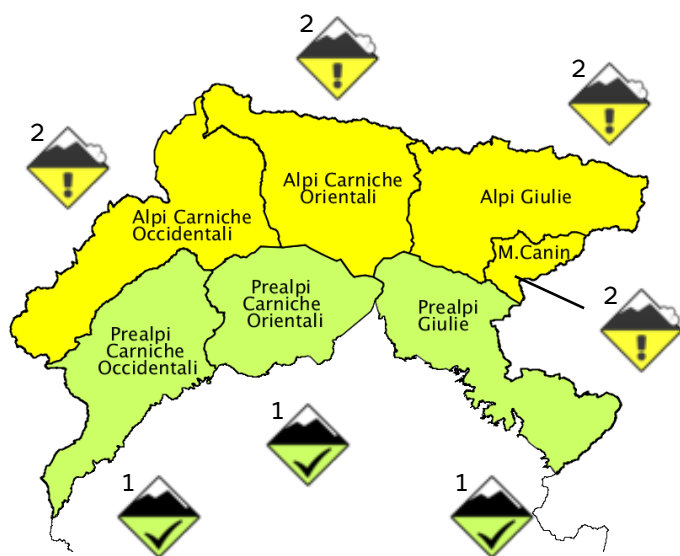

Weather by OSMER - ARPA FVG:

Generally cloudy skies, chance of some light precipitation in the East, snow level 1300-1600.

Snow cover conditions and avalanche danger: Cloudy skies, possible weak precipitation in eastern areas (0-10 cm) of new snow above approximately 1300-1600 m, which will not affect the degree of avalanche danger. In the Alps, avalanche danger will be 2 (moderate). Above approximately 1900 m, especially at northern exposures, continued chance of triggered small-sized avalanches and isolated medium-sized avalanches on very steep slopes, mainly with high overload. In the Pre-Alps, avalanche danger will be 1 (weak). Chance of triggered avalanches on steep slopes in summit areas. In the areas affected by possible snowfall, isolated avalanches from the steepest slopes and rocky crags are possible. Beware of the risk of slipping on already present hard, smooth surfaces, flattened out by the wind, especially if covered with a light layer of new snow.

Forecast for Sunday 26 December 2021, reliability: 60%

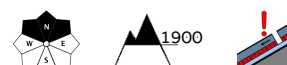

Chance of triggered avalanches in the Alps, usually with high overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1800 m
T.average 1000: 1 °C
T.average 2000: -1 °C

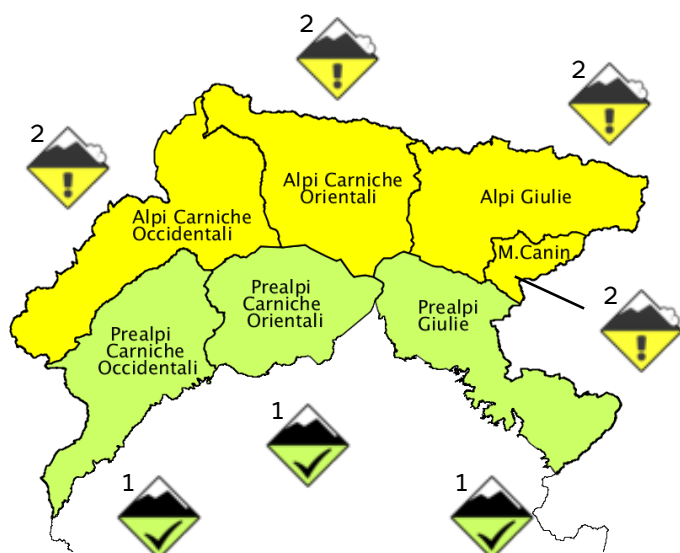

Weather by OSMER - ARPA FVG:

Cloudy skies with possible precipitation, especially in the East. Snow over approx. 1200 m.

Snow cover conditions and avalanche danger: Continuous cloudy skies and uncertain forecast. Weak precipitation on the Julian Alps and Canin area (0-10cm), possible snow depth approximately 1000-1200 m, which will not affect the degree of avalanche danger. In the Alps, avalanche danger will be 2 (moderate). Above approximately 1900 m, especially at northern exposures, continued chance of triggered small-sized avalanches and isolated medium-sized avalanches on very steep slopes, mainly with high overload. In the Pre-Alps, avalanche danger will be 1 (weak). Chance of triggered avalanches on steep slopes in summit areas. In the areas affected by possible snowfall, isolated avalanches from the steepest slopes and rocky crags are possible. Beware of the risk of slipping on already present hard, smooth surfaces, flattened out by the wind, especially if covered with a light layer of new snow.

Forecast for Monday 27 December 2021, reliability: 60%

Chance of triggered avalanches in the Alps, usually with high overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1500 m
T.average 1000: 1 °C
T.average 2000: -2 °C

Weather by OSMER - ARPA FVG:

Cloudy skies with possible weak snowfall. Snow at approx. 1000 m.

Snow cover conditions and avalanche danger: Continuous cloudy skies and uncertain forecast. Weak precipitation on the Julian Alps and Canin area (0-10 cm), possible snow depth approximately 1000-1200 m, which will not affect the degree of avalanche danger. In the Alps, avalanche danger will be 2 (moderate). Above approximately 1900 m, especially at northern exposures, continued chance of triggered small-sized avalanches and isolated medium-sized avalanches on very steep slopes, mainly with high overload. In the Pre-Alps, avalanche danger will be 1 (weak). Chance of triggered avalanches on steep slopes in summit areas. In the areas affected by possible snowfall, isolated avalanches from the steepest slopes and rocky crags are possible. Beware of the risk of slipping on already present hard, smooth surfaces, flattened out by the wind, especially if covered with a light layer of new snow.
