

Situation of 10 January 2022 edition of the hours 14-next update 12-01-2022 hours 14, forecaster: MA

reliability: 80%

**Avalanche danger 2 (moderate), due to the presence of locally unstable wind-blown accumulations.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 700 m  
T.average 1000: -2 °C  
T.average 2000: -7 °C

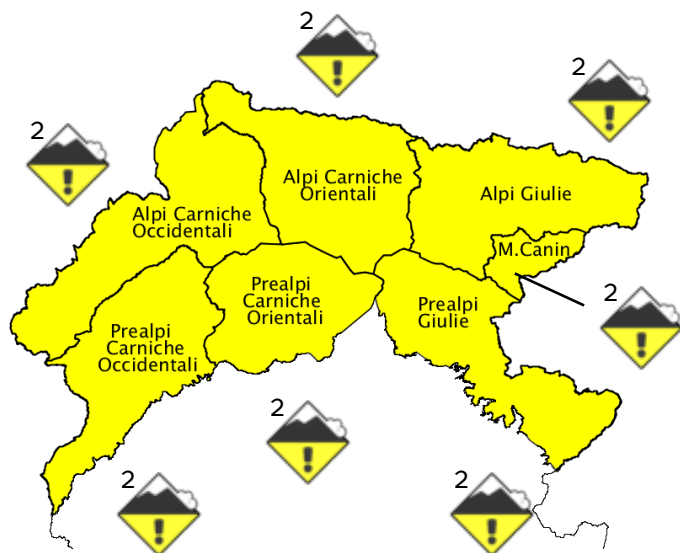

**Weather by OSMER - ARPA FVG:**  
Variable in the morning, then partly cloudy skies. Strong NE wind at high altitudes.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
PIANCAVALLO	1280	38	0	-7	-1
TARVISIO	800	48	0	-7	-2
SELLA NEVEA - LIVINAL LUNC	1837	155	0	-7,5	-4
RIFUGIO TAMAI - ZONCOLAN	1750	66	0	-6,5	-3
VARMOST M.TE SIMONE	1870	70	0	-7	-3

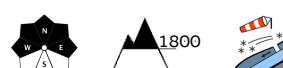

**Snow cover conditions and avalanche danger:** Variable skies with wind at high altitudes, which can cause further snow accumulations, especially along gullies, passes, and ridges. Low temperatures still favor the formation of weak layers within the snowpack. Avalanche danger is 2 (moderate) above approximately 1800 m and 1 (low) below this altitude, throughout the entire mountain territory. Wind-blown accumulations above 1800 m, especially locally at northern aspects on very steep slopes, can be triggered by high overload, giving rise to small- and medium-sized avalanches. Low overload is not excluded locally, especially in the north on extreme slopes. Beware of areas with old layers of hard or frozen snow.

Forecast for Tuesday 11 January 2022, reliability: 70%

**Avalanche danger 2 (moderate), due to the presence of locally unstable wind-blown accumulations.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

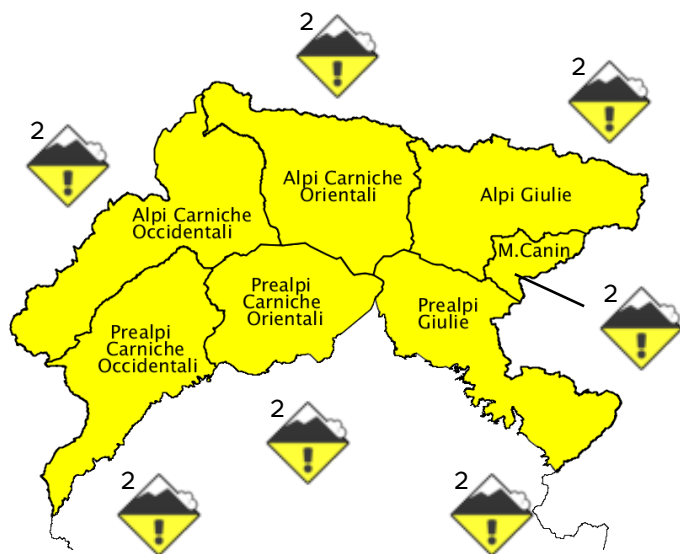

Thermal Zero: 700 m  
T.average 1000: -3 °C  
T.average 2000: -6 °C

**Weather by OSMER - ARPA FVG:**  
Mostly clear skies. Moderate to strong NE wind blowing at high altitudes.

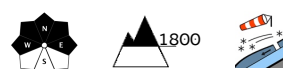

**Snow cover conditions and avalanche danger:** Clear skies and continued strong winds at high altitudes from North-East. This situation may cause further snow accumulations, especially along gullies, passes, and ridges. Avalanche danger will be 2 (moderate) above approximately 1800 m and 1 (low) below this altitude, throughout the entire mountain territory. Wind-blown accumulations above 1800 m, especially locally at northern exposures on very steep slopes, may be triggered by high overload, giving rise to small- and medium-sized avalanches. Low overload is not excluded locally, especially in the north on extreme slopes. Beware of areas with layers of hard or frozen snow.

Forecast for Wednesday 12 January 2022, reliability: 70%

**Avalanche danger 2 (moderate), due to the presence of locally unstable wind-blown accumulations.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

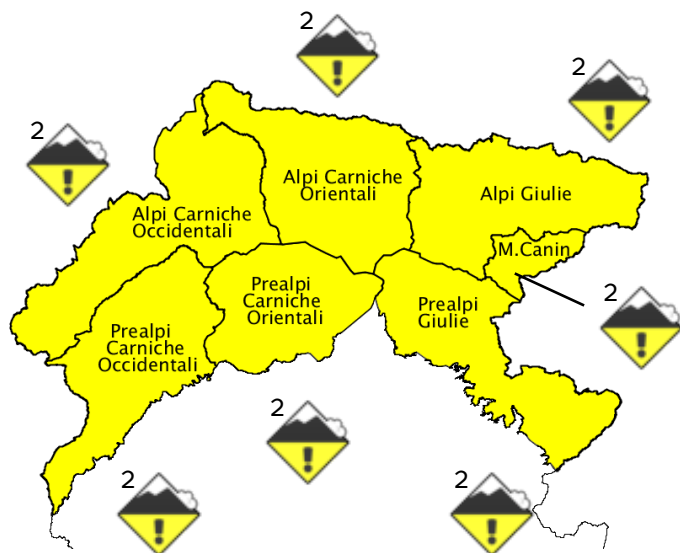

Thermal Zero: 800 m  
T.average 1000: -6 °C  
T.average 2000: -4 °C

**Weather by OSMER - ARPA FVG:**  
Mostly clear skies. Strong NE wind on high ridges in the morning.

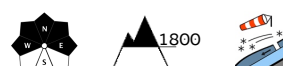

**Snow cover conditions and avalanche danger:** Continued clear skies and freezing temperatures at approximately 800 m and continued strong wind from NE at high altitudes. Avalanche danger will be 2 (moderate) above approximately 1800 m and 1 (low) below this altitude, throughout the entire mountain territory. The main avalanche danger will consist of wind-blown snow accumulations, oftentimes thick in higher gullies, but also in the basins and in slope changes. If overloaded, these may detach locally, even with the additional load of a single hiker or skier, especially on the highest slopes and in at northern exposures. The expected avalanches will be mainly medium-sized. Beware areas with layers of hard or frozen snow.

Forecast for Thursday 13 January 2022, reliability: 60%

**Avalanche danger 2 (moderate,) due to the presence of locally unstable wind-blown accumulations.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1700 m  
T.average 1000: -2 °C  
T.average 2000: -1 °C

**Weather by OSMER - ARPA FVG:**  
Mostly clear skies.

**Snow cover conditions and avalanche danger:** Clear skies, dry air, and increasing freezing temperatures from evening. This situation will not change the level of danger, which will be 2 (moderate) above approximately 1800 m and 1 (low) below this altitude, throughout the mountain territory. The main avalanche danger will continue to consist of wind-blown snow accumulations in gullies, basins, and slope changes. If overloaded, these may detach locally, even with the additional load of a single hiker or skier, especially on the highest slopes and at northern exposures. The expected avalanches will be mainly medium-sized. Beware of areas with layers of hard or frozen snow.
