

Situation of 17 January 2022 edition of the hours 14-next update 19-01-2022 hours 14, forecaster: GA

reliability: 90%

Low avalanche danger throughout the mountain area.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1500 m
T.average 1000: 2 °C
T.average 2000: -2 °C

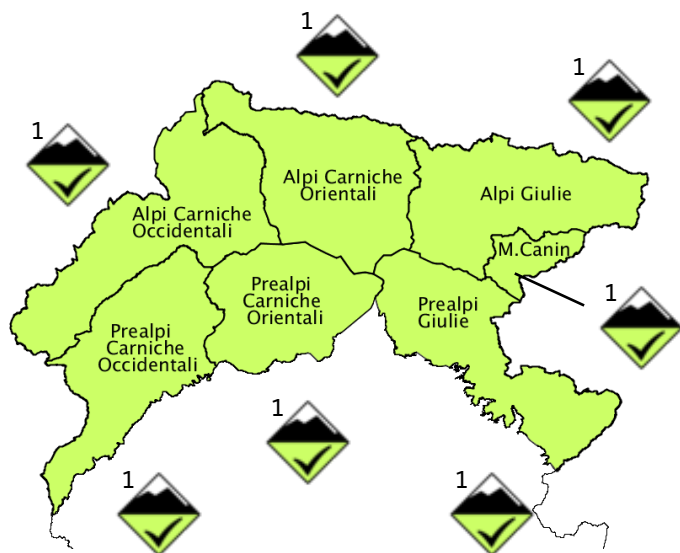

Weather by OSMER - ARPA FVG:
Generally cloudy skies due to fog.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	61	0	-3	4
VARMOST M.TE SIMONE	1870	63	0	-4	7
SELLA NEVEA - LIVINAL LUNC	1837	139	0	-3,5	3
PIANCAVALLO	1280	37	0	-3,5	6
TARVISIO	800	44	0	-10	4

Snow cover conditions and avalanche danger: The snowpack on southern slopes is mainly characterized by superficial layers while, in shaded slopes, in areas not affected by wind, it is still weakly consolidated. Elsewhere, it presents layers of varying hardness, also very compact ones. Avalanche danger is 1 (low) throughout the entire mountain area. On extreme slopes at northern exposures, in very localized areas characterized by wind-blown accumulations, especially at higher altitudes, chance of triggered slab avalanches with high overload, which can be small or occasionally medium in size. On steeper southern slopes, small natural avalanches caused by the heat of the sun are possible. Beware of areas with layers of hard or frozen snow.

Forecast for Tuesday 18 January 2022, reliability: 90%

Low avalanche danger throughout the mountain area.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1300 m
T.average 1000: 2 °C
T.average 2000: -4 °C

Weather by OSMER - ARPA FVG:
Clear skies.

Snow cover conditions and avalanche danger: Clear skies with freezing temperatures at 1300 m. Avalanche danger will be 1 (low) throughout the entire mountain territory. At northern exposures, in very localized areas, on extreme slopes characterized by wind-blown accumulations, especially at higher altitudes, chance of triggered small or occasionally medium-sized slab avalanches with high overload. On steeper southern slopes, small natural avalanches caused by the heat of the sun are possible. Beware of areas with layers of hard or frozen snow.

Forecast for Wednesday 19 January 2022, reliability: 80%

Low avalanche danger throughout the mountain area.

Thermal Zero: 1700 m
T.average 1000: 0 °C
T.average 2000: 0 °C

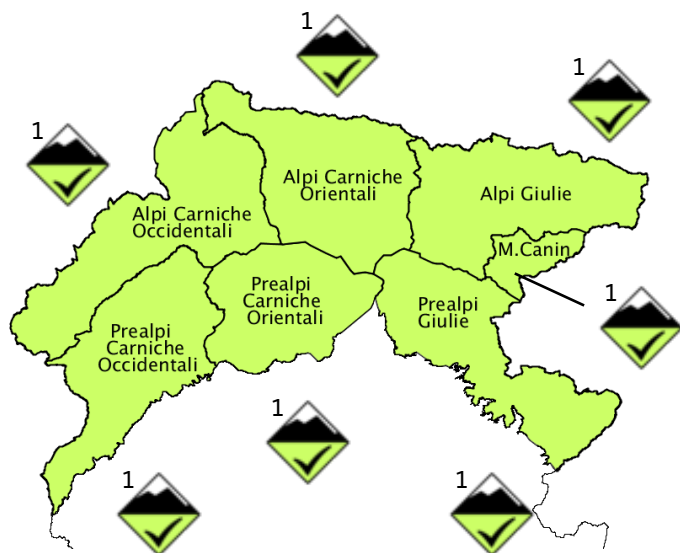

Weather by OSMER - ARPA FVG:

Generally cloudy skies, with more clouds in the afternoon in the Prealps.

Snow cover conditions and avalanche danger: Variable skies and freezing temperatures at around 1700 m. Avalanche danger will be 1 (low) throughout the entire mountain territory. At northern aspects, in very localized areas on extreme slopes characterized by wind-blown accumulations, especially at higher altitudes, chance of triggered small or occasionally medium-sized slab avalanches with high overload. On steeper southern slopes, small natural triggered avalanches are possible during the hottest hours. Beware of areas with layers of hard or frozen snow.

Forecast for Thursday 20 January 2022, reliability: 80%

Low avalanche danger throughout the mountain area.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 800 m
T.average 1000: -1 °C
T.average 2000: -6 °C

Weather by OSMER - ARPA FVG:

In the morning, cloudy to overcast skies, improving during the day from N. Moderate wind from N at high altitudes.

Snow cover conditions and avalanche danger: Cloudy skies with falling temperatures. Avalanche danger will continue to be 1 (low) throughout the mountain area. At northern exposures, in very localized areas on extreme slopes characterized by wind-blown accumulations, especially at higher altitudes, chance of triggered small or occasionally medium-sized slab avalanches with high overload. Beware of areas with layers of hard or frozen snow.
