

Situation of 26 January 2022 edition of the hours 14-next update 28-01-2022 hours 14, forecaster: MM

reliability: 80%

Chance of small triggered avalanches at high altitudes, generally with high overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2000 m  
T.average 1000: 2 °C  
T.average 2000: 0 °C

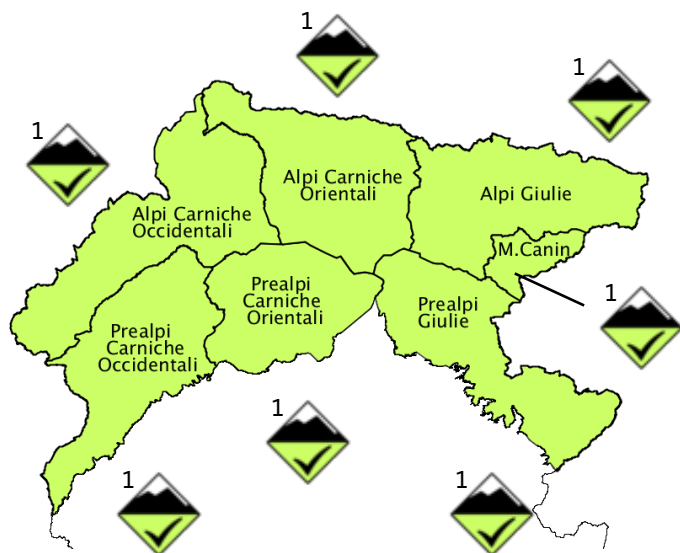

**Weather by OSMER - ARPA FVG:**  
Clear skies, freezing temperatures at about 2000 m, night temps inversion in valleys. Mild daytime temps.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	57	0,0	1	7
VARMOST M.TE SIMONE	1870	62	0,0	1	7
SELLA NEVEA - LIVINAL LUNC	1837	141	0,0	1	3
PIANCAVALLO	1280	37	0,0	-3	1
TARVISIO	800	22	0,0	-8	3

**Snow cover conditions and avalanche danger:** The snowpack is generally stable and well bonded on most slopes. In shadier areas, hard and frozen snow slabs are present, as well as areas with loose artificial snow. On slopes most exposed to the sun, it is characterized by superficial layers. In the south, in the Prealps, little or no snow is present. Avalanche danger is 1 (low) throughout the territory. At high altitudes on very steep slopes, with the presence of wind-blown snow accumulations, in localized areas, and especially at northern exposures, chance of triggered small avalanches, mainly with high overload. Natural avalanches are also possible from areas exposed to the sun, especially from slopes and near rocks. Beware of areas with hard or frozen snow. Assess risk of slipping and falling.

Forecast for Thursday 27 January 2022, reliability: 80%

Chance of small triggered avalanches at high altitudes, generally with high overload.

Thermal Zero: 2500 m  
T.average 1000: 2 °C  
T.average 2000: 2 °C

**Weather by OSMER - ARPA FVG:**  
Variable early morning skies, then clear or partly cloudy with mild temperatures at high altitudes.

**Snow cover conditions and avalanche danger:** Variable early morning skies, then clear or partly cloudy with mild temperatures at high altitudes which, on sunnier slopes, may favor natural avalanche activity, especially near rocky areas. Avalanche danger will be 1 (low) throughout the territory. At high altitudes on very steep slopes, with the presence of wind-blown snow accumulations in localized areas, and especially at northern exposures, chance of triggered small avalanches, mainly with high overload. The most dangerous areas will be ridges, forks, and along very steep gullies, and also areas with little snow where there may be gaps at the base of the old snowpack. Beware of areas with hard or frozen snow. Assess risk of slipping and falling.

Forecast for Friday 28 January 2022, reliability: 70%

**Strong wind from N at high altitudes, chance of new wind-blown accumulations.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

NW 40  
km/h

Thermal Zero: 1200 m  
T.average 1000: 1 °C  
T.average 2000: -4 °C

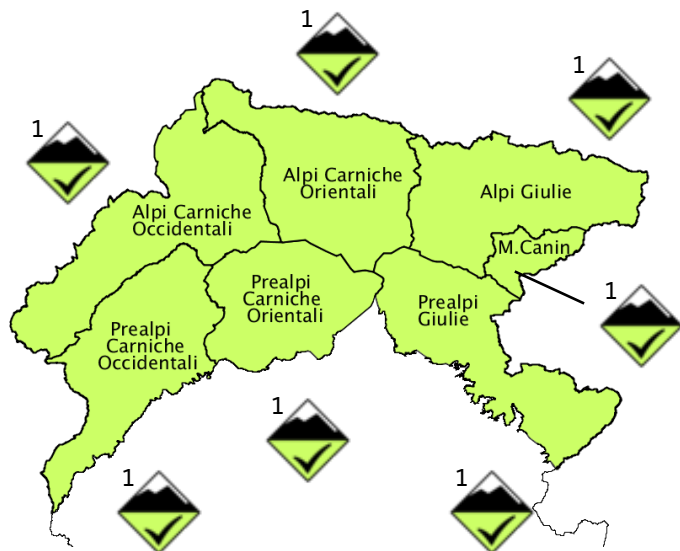

**Weather by OSMER - ARPA FVG:**

Cloudy skies with falling temperatures and moderate to strong NW wind at high altitudes.

**Snow cover conditions and avalanche danger:** Cloudy skies with sharply decreasing temperatures and moderate to high wind from the north west at high altitudes, which may favor the formation of new wind-blown snow accumulations, especially in areas most subject to wind, such as forks, ridges, and along gullies. Avalanche danger will be 1 (low) throughout the territory. At high altitudes on very steep slopes, with the presence of wind-blown snow accumulations, in localized areas, and especially at northern exposures, chance of triggered small avalanches, mainly with high overload. Beware of areas with hard or frozen snow. Assess risk of slipping and falling.

Forecast for Saturday 29 January 2022, reliability: 70%

**Chance of small triggered avalanches at high altitudes, generally with high overload.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

NW 20  
km/h

Thermal Zero: 1000 m  
T.average 1000: -1 °C  
T.average 2000: -5 °C

**Weather by OSMER - ARPA FVG:**

Variable skies.

**Snow cover conditions and avalanche danger:** Variable skies with a further slight drop in temperatures. Avalanche danger will be 1 (low) throughout the territory. At high altitudes on very steep slopes, with the presence of wind-blown snow accumulations, in localized areas, and especially at northern exposures, chance of triggered small avalanches, mainly with high overload. The most dangerous areas will be ridges, forks, and along very steep gullies, and also areas with little snow where there may be gaps at the base of the old snowpack.
