

Situation of 28 January 2022 edition of the hours 14-next update 28-01-2022 hours 14, forecaster: MM

reliability: 80%

**Strong NW wind at high altitude, with possible formation of new wind-blown accumulations**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

NW 50  
km/h

Thermal Zero: 1200 m  
T.average 1000: 1 °C  
T.average 2000: -7 °C

**Weather by OSMER - ARPA FVG:**

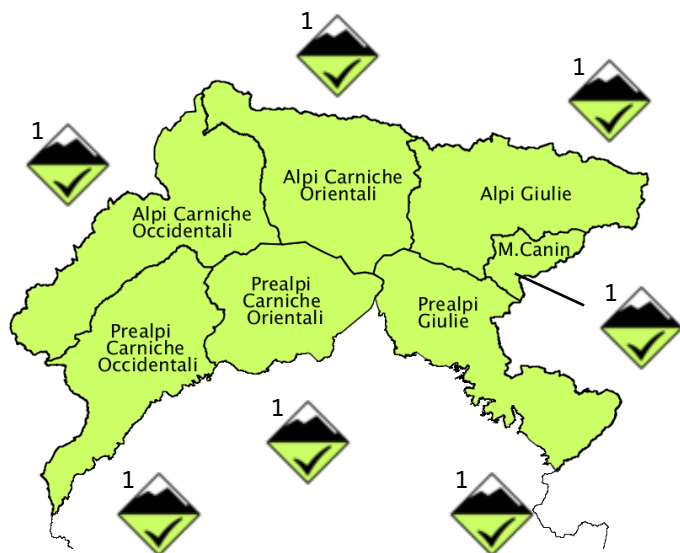

Cloudy skies over Alps with cold, moderate NW wind, strong at high altitudes. Wind chill above 1700 m.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	58	0,0	-4	3
VARMOST M.TE SIMONE	1870	60	0,0	-3	5
SELLA NEVEA - LIVINAL LUNC	1837	140	0,0	-4	4
PIANCAVALLO	1280	40	0,0	-3	6
TARVISIO	800	20	0,0	-5	5

**Snow cover conditions and avalanche danger:** The snowpack is generally stable and well consolidated on most slopes. In shadier areas, hard and frozen snow slabs are present, as well as areas with loose artificial snow. On slopes most exposed to the sun, it is characterized by superficial layers. In the south, in the Prealps, little or no snow is present. During the day, strong NW winds at high altitudes are expected, which could lead to the formation of new accumulations of wind-blown snow, especially in areas most subject to wind, such as ridges, forks, and along gullies. Avalanche danger is 1 (low) throughout the territory. At high altitudes on very steep slopes, with the presence of wind-blown snow accumulations, in localized areas, and especially at northern exposures, chance of triggering small avalanches, mainly with high overload. Beware of areas with hard or frozen snow. Assess risk of slipping and falling.

Forecast for Saturday 29 January 2022, reliability: 80%

**At high altitudes, chance of triggered small avalanches is possible, generally with high overload.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

N 20  
km/h

Thermal Zero: 1200 m  
T.average 1000: 0 °C  
T.average 2000: -4 °C

**Weather by OSMER - ARPA FVG:**

Overcast during the night and in the morning, variable during the day.

**Snow cover conditions and avalanche danger:** Overcast sky at night and in the morning, variable during the day. Avalanche danger will be 1 (low) throughout the territory. At high altitudes, on very steep slopes, with the presence of wind-blown accumulations of snow, in localized areas, and especially at northern exposures, chance of triggered small avalanches, mainly with high overload. The most dangerous areas will be ridges, forks, and along very steep gullies, as well as areas with little snow where there may also be gaps at the base of the old snowpack. Beware of areas with hard or frozen snow. Assess risk of slipping and falling.

Forecast for Sunday 30 January 2022, reliability: 70%

At high altitudes, chance of triggered small avalanches, generally with high overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

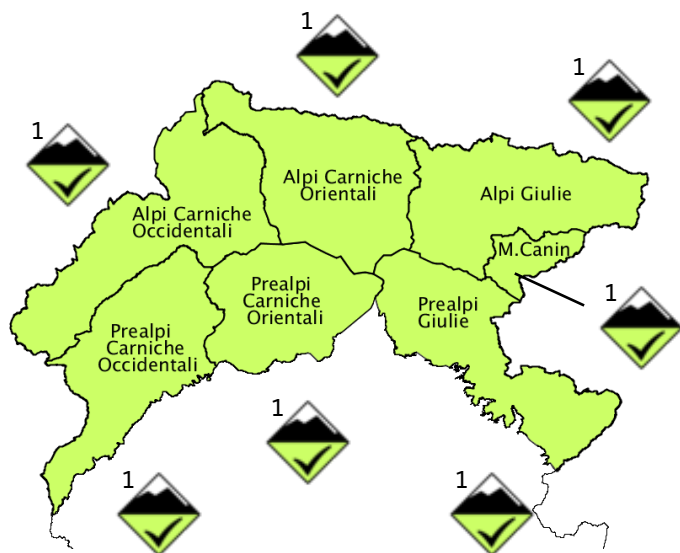

Thermal Zero: 1800 m  
T.average 1000: 4 °C  
T.average 2000: -1 °C

**Weather by OSMER - ARPA FVG:**  
Clear or partly cloudy skies. Moderate to high NW wind at high altitudes.

**Snow cover conditions and avalanche danger:** Clear or partly cloudy skies with slightly rising temperatures and moderate to locally high NW wind at high altitudes, which may favor the formation of new wind-blown accumulations. Avalanche danger will be 1 (low) throughout the territory. At high altitudes, on very steep slopes, with the presence of wind-blown accumulations, in localized areas, and especially at northern exposures, chance of triggered small avalanches, mainly with high overload. The most dangerous areas will be ridges, forks, and along very steep gullies, as well as areas with little snow where there may also be gaps at the base of the old snowpack. Beware of areas with hard or frozen snow. Assess risk of slipping and falling.

Forecast for Monday 31 January 2022, reliability: 70%

At high altitudes, chance of triggered small avalanches, generally with high overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1200 m  
T.average 1000: 1 °C  
T.average 2000: -2 °C

**Weather by OSMER - ARPA FVG:**  
Variable skies.

**Snow cover conditions and avalanche danger:** Variable skies, with a slight drop in temperatures. Avalanche danger will be 1 (low) throughout the territory. At high altitudes, on very steep slopes, with the presence of wind-blown accumulations, in localized areas, and especially at northern exposures, chance of triggered small avalanches, mainly with high overload. The most dangerous sites will be ridges, forks, and along very steep gullies, as well as areas with little snow, where there may also be gaps at the base of the old snowpack. Beware of areas with hard or frozen snow. Assess risk of slipping and falling.
