

Situation of 09 February 2022 edition of the hours 14-next update 11-02-2022 hours 14, forecaster: GA

reliability: 90%

Chance of triggered small avalanches at high altitudes, generally with high overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 3200 m
T.average 1000: 5 °C
T.average 2000: 6 °C

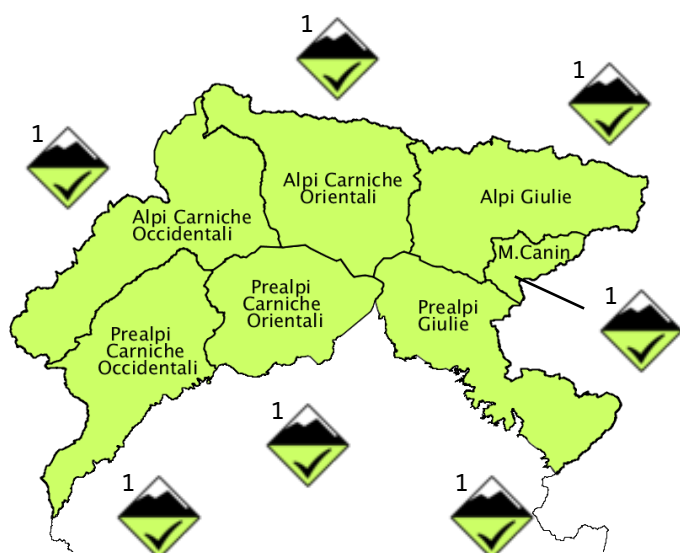

Weather by OSMER - ARPA FVG:
Stable weather with clear or partly cloudy skies. Marked thermal inversion.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	47	0	-2,5	5
VARMOST M.TE SIMONE	1870	56	0	-1,5	5,5
SELLA NEVEA - LIVINAL LUNC	1837	148	0	-3,5	5
PIANCAVALLO	1280	32	0	-4	4,5
TARVISIO	800	31	0	-4,5	9

Snow cover conditions and avalanche danger: The snowpack is generally stable and well consolidated, mainly characterized by superficial layers of varying hardness and wind-blown accumulations. Areas with superficial loose snow remain in shaded areas in the woods. On southern slopes, little or no snow present up to high altitudes. Avalanche danger is 1 (low) throughout the entire mountain area. On very steep slopes, in areas located especially at higher altitudes, chance of triggered small slab avalanches, with a generally high additional load. With the warmer weather on steeper southern slopes, chance of small natural avalanches.

Forecast for Thursday 10 February 2022, reliability: 90%

At high altitude, on very steep slopes, chance of locally unstable wind-blown accumulations.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

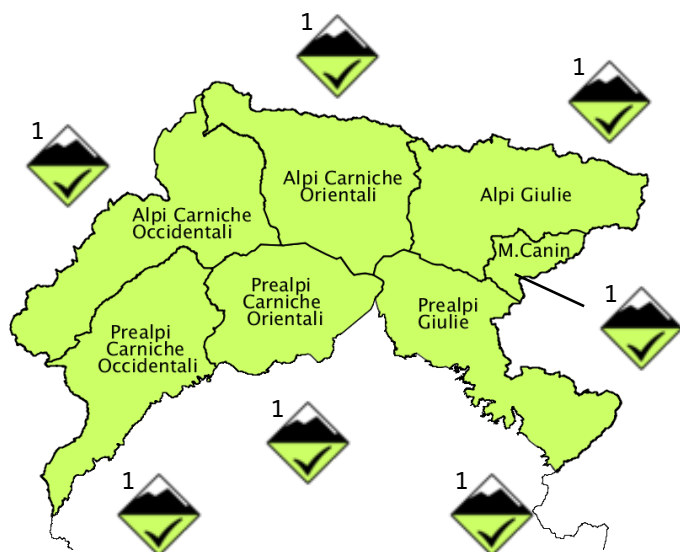

Thermal Zero: 3200 m
T.average 1000: 1 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:
Clear in the morning, cloudy in the afternoon, starting in the Prealps. Chance of very weak snowfall over 1000 m.

Snow cover conditions and avalanche danger: Good weather in the morning with increased cloudiness in the afternoon, starting on the Prealps. Starting in the evening, chance of very weak snowfall above 1000m. Avalanche danger will be 1 (low) throughout the entire mountain territory. At high altitudes, on very steep slopes, snow deposits present in localized areas that, if overloaded, may still originate several small avalanches, with a generally high additional load. Assess risk of slipping and falling. Beware of areas with hard or frozen snow. Wet snowfall is still possible on steeper southern slopes.

Forecast for Friday 11 February 2022, reliability: 80%

At high altitudes, on very steep slopes, chance of locally unstable wind-blown accumulations.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

N 40
km/h

Thermal Zero: 1400 m
T.average 1000: 2 °C
T.average 2000: -2 °C

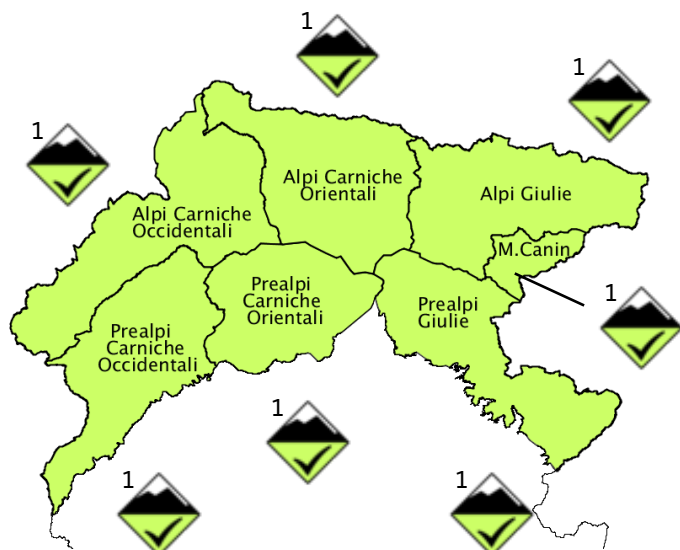

Weather by OSMER - ARPA FVG:

During the night, weak precipitation on the Julian Pre-Alps. Cloudy in the morning. Clear in the afternoon.

Snow cover conditions and avalanche danger: During the night, chance of weak precipitation on the Julian Pre-Alps. In the morning, cloudy too overcast skies. Clearing, starting in the afternoon from Carnia. The expected low rainfall will not affect the avalanche danger, which will continue to be 1 (weak) throughout. At high altitudes, on very steep slopes with wind-blown accumulations, in localized areas, and especially at northern exposures, chance of triggered small avalanches with a generally high additional overload. Beware of areas with hard or frozen snow. Assess risk of slipping and falling.

Forecast for Saturday 12 February 2022, reliability: 80%

At high altitudes, on very steep slopes, chance of locally unstable wind-blown accumulations.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

N 20
km/h

Thermal Zero: 700 m
T.average 1000: -3 °C
T.average 2000: -6 °C

Weather by OSMER - ARPA FVG:

Clear skies, with colder temperatures.

Snow cover conditions and avalanche danger: Clear skies with falling temperatures. Avalanche danger will continue to be 1 (low) throughout the mountain area. At high altitudes, on very steep slopes, with the presence of wind-blown accumulations, in localized areas, and especially at northern exposures, chance of triggered small avalanches with a generally high additional overload. Beware of areas with hard or frozen snow. Assess risk of slipping and falling.
