

Situation of 18 February 2022 edition of the hours 14-next update 21-02-2022 hours 14, forecaster: MM

reliability: 80%

**Chance of natural and triggered avalanches, also with low overload.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2800 m  
T.average 1000: 5 °C  
T.average 2000: 1 °C

**Weather by OSMER - ARPA FVG:**

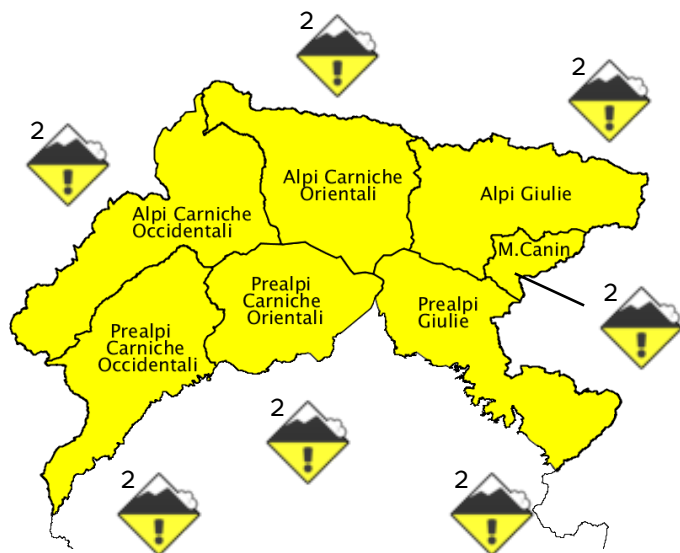

Slightly cloudy skies in the morning, increasing in the afternoon, especially in the Prealps.

| Station                    | quota (m) | snow depth (cm) | fresh snow (cm) | Tmin (°C) | Tmax (°C) |
|----------------------------|-----------|-----------------|-----------------|-----------|-----------|
| PIANCAVALLO                | 1280      | 53              | 0               | -2        | 2,5       |
| TARVISIO                   | 800       | 29              | 0               | -3        | 7         |
| SELLA NEVEA - LIVINAL LUNC | 1837      | 177             | 0               | 0,5       | 6,5       |
| RIFUGIO TAMAI - ZONCOLAN   | 1750      | 86              | 0               | -3,5      | 5         |
| VARMOST M.TE SIMONE        | 1870      | 78              | 0               | 1         | 8,5       |

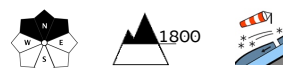

**Snow cover conditions and avalanche danger:** The snowpack is slowly consolidating. On shadier slopes, there are still areas with wind-blown accumulations that are still unstable. In the afternoon, a possible new rise in temperatures is expected, with consequent natural avalanche activity on sunny slopes. Generally, beyond the treeline, avalanche danger is 3 (considerable) throughout the territory. On steep, shadier slopes, chance of triggered avalanches, even of medium size. Triggered avalanches are not excluded on higher slopes, even with the passage of singleskiers/hikers. Below the treeline, avalanche danger is generally lower and, in the Prealps, it is limited to higher altitudes of northern slopes. On steep grassy slopes, chance of glideavalanches.

Forecast for Saturday 19 February 2022, reliability: 70%

**Chance of triggered avalanches, locally also with low overload.**

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2000 m  
T.average 1000: 4 °C  
T.average 2000: -2 °C

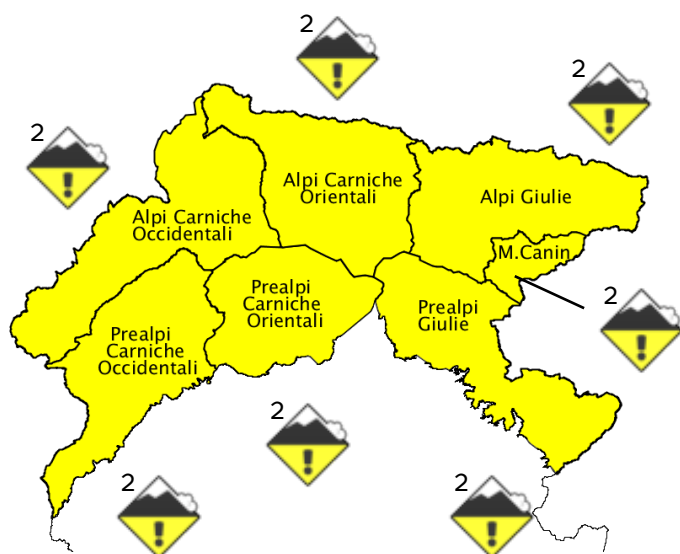

**Weather by OSMER - ARPA FVG:**

Cloudy to overcast skies with possible weak precipitation in the evening, especially in the Julian Alps.

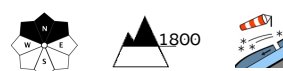

**Snow cover conditions and avalanche danger:** Cloudy to overcast skies with possible weak precipitation in the evening, especially in the Julian Alps. At high altitudes, there will still be areas with locally unstable wind-blown snow accumulations, especially near forks, along ridges and in gullies. Temperatures will be dropping compared to the past few days. Avalanche danger will be 2 (moderate) throughout the territory. On shadier steep slopes, chance of triggered small- and medium-sized avalanches, mainly with a high overload. Locally, on higher slopes, triggered avalanches are not excluded, even with the passage of single skiers/hikers. Below the treeline, avalanche danger will generally be lower and, in the Prealps, it will be limited to higher altitudes of northern slopes. Limited natural avalanche activity.

Forecast for Sunday 20 February 2022, reliability: 70%

Chance of triggered avalanches, locally even with low overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

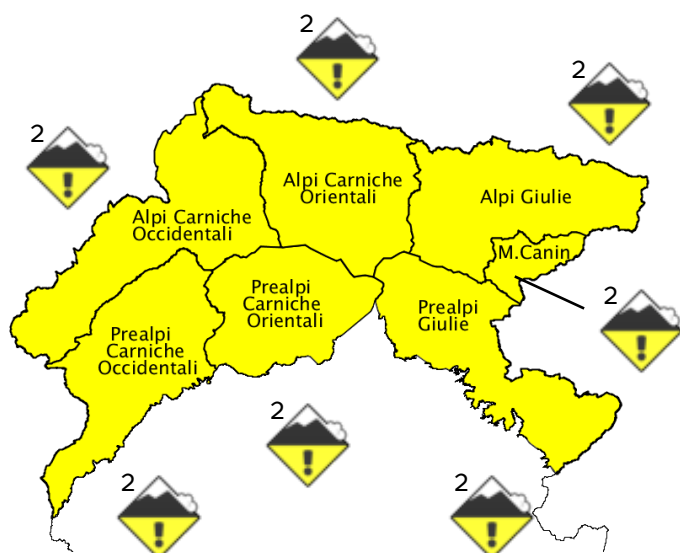

Thermal Zero: 1600 m  
T.average 1000: 2 °C  
T.average 2000: -1 °C

**Weather by OSMER - ARPA FVG:**  
Cloudy skies, mainly due to high altitude haze.

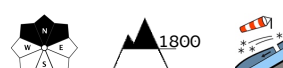

**Snow cover conditions and avalanche danger:** Cloudy skies, mainly due to high altitude haze. At high altitudes, there will still be areas with locally unstable wind-blown snow accumulations, especially near forks, along ridges, and in gullies. Avalanche danger will be 2 (moderate) throughout the territory. On shadier steep slopes, chance of triggered small- and medium-sized avalanches, mainly with a high overload. Locally, on higher slopes, triggered avalanches are not excluded, even with the passage of single skiers/hikers. Below the treeline, avalanche danger will generally be lower and, in the Prealps, it will be limited to higher altitudes of northern slopes. Natural activity will be limited to small avalanches from sunnier slopes, especially near rock formations.

Forecast for Monday 21 February 2022, reliability: 60%

Chance of triggered avalanches, locally even with low overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1600 m  
T.average 1000: 2 °C  
T.average 2000: -3 °C

**Weather by OSMER - ARPA FVG:**  
Variable to cloudy skies with some light precipitation during the day.

**Snow cover conditions and avalanche danger:** Variable to cloudy skies with some light precipitation during the day. At high altitudes, there will still be areas with locally unstable wind-blown snow accumulations, especially near forks, along ridges, and in gullies. Avalanche danger will be 2 (moderate) throughout the territory. On shadier steep slopes, chance of triggered small- and medium-sized avalanches, mainly with high overload. Locally, on higher slopes, triggered avalanches are not excluded, even with the passage of single skiers/hikers. Below the treeline, avalanche danger will generally be lower and, in the Prealps, it will be limited to higher altitudes of northern slopes. Natural avalanche activity will be very limited.
