

Situation of 02 March 2022 edition of the hours 14-next update 04-03-2022 hours 14, forecaster: GA

reliability: 80%

To the north, at high altitudes, chance of triggered small avalanches, mainly with high overload.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 1300 m  
T.average 1000: 1 °C  
T.average 2000: -4 °C

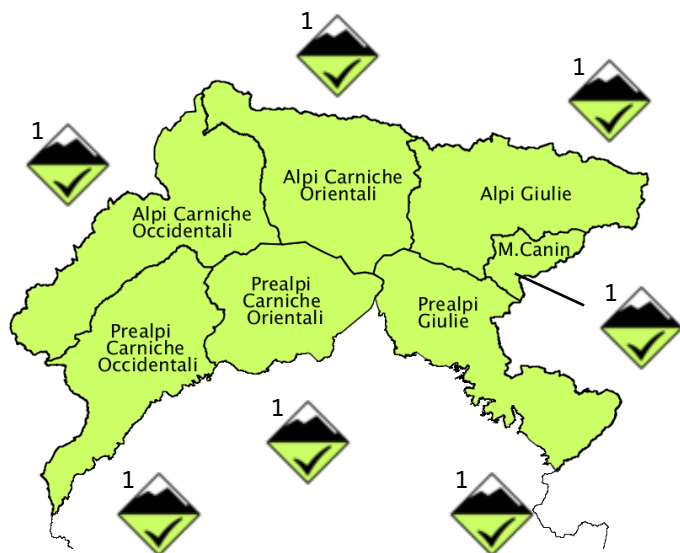

Weather by OSMER - ARPA FVG:  
Variable skies.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	73	0	-5	-1
VARMOST M.TE SIMONE	1870	66	0	-5	3,5
SELLA NEVEA - LIVINAL LUNC	1837	190	0	-6	1
PIANCAVALLO	1280	46	0	-6	2,5
TARVISIO	800	20	0	-9	7

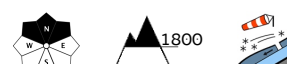

**Snow cover conditions and avalanche danger:** The snow cover is tending to consolidate. Wind-blown accumulations at high altitudes on an isolated level have not yet been well bonded with the old snow, especially on very steep shady slopes above approximately 1900 m. In the central part of the snow cover on shady slopes, fragile layers with large grains are present. In the Alps above 1900 m, avalanche danger is 2 (moderate). Beware of wind-blown accumulations at northern exposures, since snow may detach on an isolated level, especially with high overload, creating small avalanches. On an isolated level, on very steep shady slopes at high altitudes, avalanches are possible in old snow with angular crystals and high overload. In the Pre-Alps and Alps below 1900 m, avalanche danger is 1 (low). At a very isolated level on extreme northern slopes, chance of triggered small avalanches with high overload.

Forecast for Thursday 03 March 2022, reliability: 80%

To the north at high altitudes, chance of isolated triggered small avalanches with high overload.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1500 m  
T.average 1000: 2 °C  
T.average 2000: -3 °C

Weather by OSMER - ARPA FVG:  
Clear skies during the night, chance of very weak snowfall over 600 m.

**Snow cover conditions and avalanche danger:** Nice weather. Chance of very faint snowfall during the night. The snow cover is generally stable. Only a slight amount of snow is present in many areas. On sunny slopes, no snow is present below approximately 1700 m. Wind-blown accumulations at high altitudes are generally well bonded with the old snow. In the central part of the snow cover on shady slopes, fragile layers with large grains are present. Avalanche danger is generally 1 (low) throughout the entire mountain territory. Chance of small avalanches. On extreme steep shady slopes above 1800-2000 m, wind-blown accumulations on an isolated level can still detach, mainly with high overload. On a very isolated level and following high overload, avalanches may occur in the old snow. Beware of areas with hard or icy snow.

Forecast for Friday 04 March 2022, reliability: 80%

To the north at high altitudes, chance of isolated triggered small avalanches with high overload.

T.average 2000: -7 °C

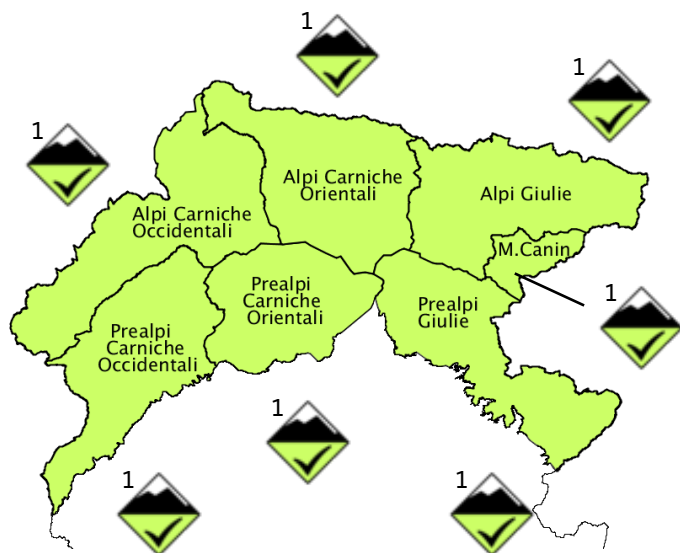

**Weather by OSMER - ARPA FVG:**

Good weather in the morning, chance of local precipitation in the afternoon in the Alps with snow above 600 m.

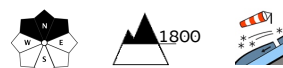

**Snow cover conditions and avalanche danger:** In the afternoon, chance of precipitation in the Prealps, with snowfall above 600m. Avalanche danger is generally 1 (low) throughout the entire mountain territory. Chance of small avalanches. On extreme steep shady slopes above 1800-2000 m, wind-blown accumulations on an isolated level may still detach, and mainly with high overload, on a very isolated level. Following high overload, chance of avalanches in the old snow. Beware of areas with hard or icy snow.

Forecast for Saturday 05 March 2022, reliability: 80%

To the north, at high altitudes, chance of isolated small avalanches with high overload.
