

Situation of 25 March 2022 edition of the hours 14-next update 28-03-2022 hours 14, forecaster: GA

reliability: 80%

Chance of wet-snow avalanches during warmer hours, generally small in size.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2300 m
T.average 1000: 9 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:

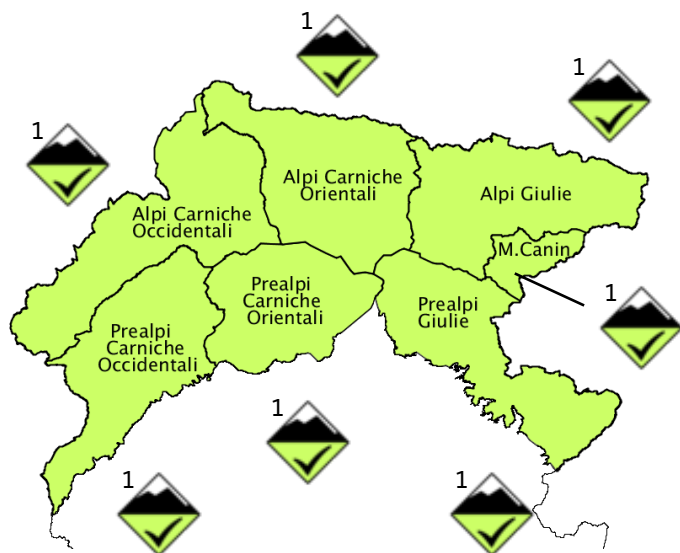

Sunny in morning with few clouds in the afternoon. Strong temperature variation during the day in the valley.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	52	0	3	11
VARMOST M.TE SIMONE	1870	34	0	2	12
SELLA NEVEA - LIVINAL LUNC	1837	171	0	2	10
PIANCAVALLO	1280	33	0	0	12
TARVISIO	800	0	0	-2	19

Snow cover conditions and avalanche danger: With a daytime rise in temperatures and the heat of the sun, the snow cover tends to weaken on the surface. On shady northern slopes at high altitudes, the heat does not significantly affect the snow cover. In the afternoon, chance damp- or wet-snow avalanches along very steep slopes throughout the snow-covered mountain area at all exposures. The expected phenomena are generally small in size, or medium in size only at an isolated level.

Forecast for Saturday 26 March 2022, reliability: 80%

Chance of wet-snow avalanches during warmer hours, generally small in size.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2300 m
T.average 1000: 9 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:

Clear or slightly cloudy skies.

Snow cover conditions and avalanche danger: Clear or slightly cloudy skies. The snow cover in the morning is stable and well consolidated. With a daytime rise in temperatures and the heat of the sun, the snow cover will tend to become wet and weaken on the surface. Beware of hard, icy surfaces. Avalanche danger will be 1 (low) throughout the territory. During warmer hours of the day along very steep snow-covered slopes to the south and north below 2000-2100 m, chance wet-snow avalanches, generally small in size, or medium in size only at an isolated level. During warmer hours and on steep slopes, wet-snow avalanches can break away when skiing.

Forecast for Sunday 27 March 2022, reliability: 80%

Chance of wet-snow avalanches during warmer hours, generally small in size.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

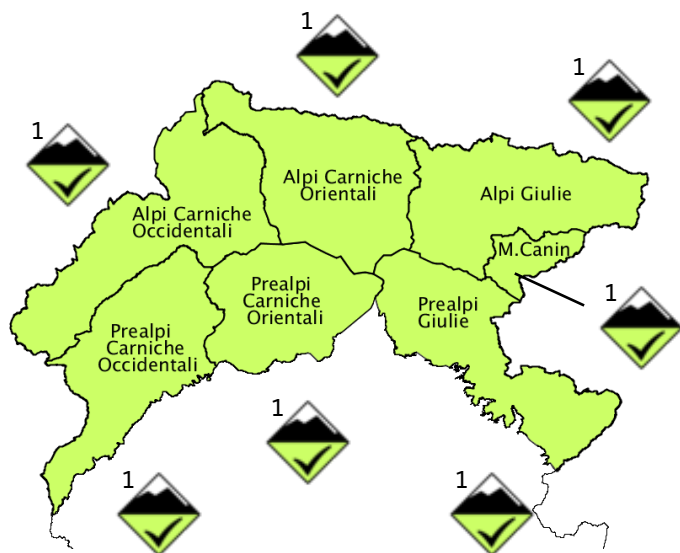

Thermal Zero: 2300 m
T.average 1000: 9 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:
Generally clear skies.

Snow cover conditions and avalanche danger: Clear skies. The snow cover in the morning is stable and well consolidated. With a daytime rise in temperatures and the heat of the sun, the snow cover will tend to become wet and weaken on the surface. Beware of hard, icy surfaces. Avalanche danger will be 1 (low) throughout the territory. During warmer hours of the day along very steep snow-covered slopes to the south and north below 2000-2100 m, chance wet-snow avalanches, generally small in size, or medium in size only at an isolated level. During warmer hours and on steep slopes, wet-snow avalanches can break away when skiing.

Forecast for Monday 28 March 2022, reliability: 80%

Chance of wet-snow avalanches during warmer hours, generally small in size.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2500 m
T.average 1000: 8 °C
T.average 2000: 3 °C

Weather by OSMER - ARPA FVG:
Clear skies in the morning, cloudy to variable in the afternoon.

Snow cover conditions and avalanche danger: Clear skies in the morning, greater variability in the afternoon. The snow cover in the morning will be stable and well consolidated. Beware of hard, icy surfaces. Avalanche danger will be 1 (low) throughout the territory. During warmer hours of the day along very steep snow-covered slopes to the south and north below 2000-2100 m, chance wet-snow avalanches, generally small in size, or medium in size only at an isolated level. During warmer hours and on steep slopes, wet-snow avalanches can break away when skiing.
