

Situation of 28 March 2022 edition of the hours 14-next update 30-03-2022 hours 14, forecaster: MM

reliability: 80%

Chance of wet-snow avalanches during warmer hours, generally small in size.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2600 m
T.average 1000: 10 °C
T.average 2000: 3 °C

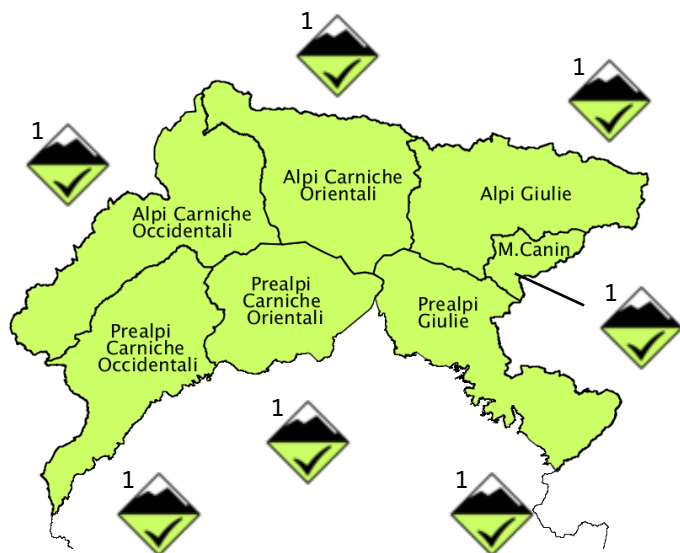

Weather by OSMER - ARPA FVG:
Mostly clear skies.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	38	0	3,5	10
VARMOST M.TE SIMONE	1870	20	0	2,5	11,5
SELLA NEVEA - LIVINAL LUNC	1837	160	0	2,5	10
PIANCAVALLO	1280	25	0	1,5	11
TARVISIO	800	0	0	-2	21

Snow cover conditions and avalanche danger: Skies are mostly clear. The snow cover in the morning is stable and well consolidated. With a daytime rise in temperatures and the heat of the sun, the snow cover will tend to become wet and weaken on the surface. Beware of hard, icy surfaces. Avalanche danger will be 1 (low) throughout the territory. During warmer hours of the day along very steep snow-covered slopes to the south and north below 2000-2100 m, chance wet-snow avalanches, generally small in size, or medium in size only at an isolated level. During warmer hours and on steep slopes, wet-snow avalanches can break away when skiing.

Forecast for Tuesday 29 March 2022, reliability: 80%

Chance of wet-snow avalanches during warmer hours, generally small in size.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2500 m
T.average 1000: 7 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:
Generally cloudless skies.

Snow cover conditions and avalanche danger: Skies are generally cloudless. The snow cover in the morning is stable and well consolidated. With a daytime rise in temperatures and the heat of the sun, the snow cover will tend to become wet and weaken on the surface. Beware of hard, icy surfaces. Avalanche danger will be 1 (low) throughout the territory. During warmer hours of the day along very steep snow-covered slopes to the south and north below 2000-2100 m, chance wet-snow avalanches, generally small in size, or medium in size only at an isolated level. Forecast for Wednesday 30 March 2022, reliability: 70%

Weak snowfall expected starting in the afternoon/evening.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

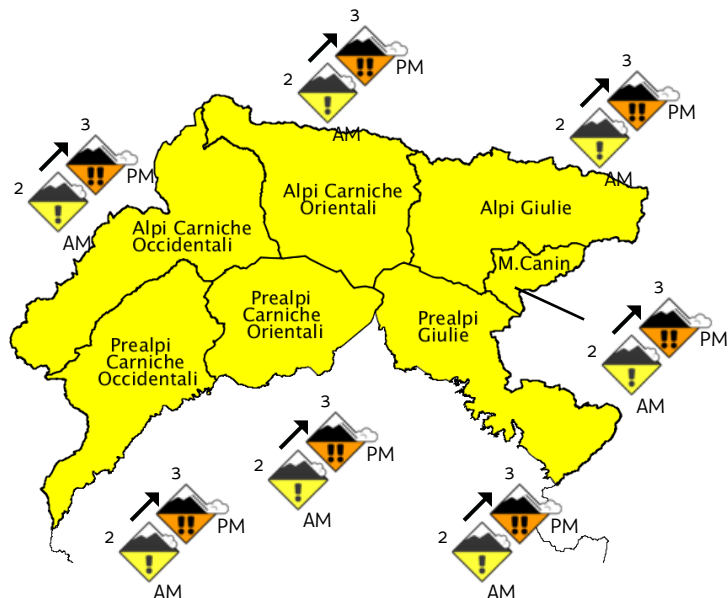

Thermal Zero: 2000 m
T.average 1000: 6 °C
T.average 2000: 0 °C

Weather by OSMER - ARPA FVG:
Cloudy skies with light snowfall starting in the afternoon/evening.

Snow cover conditions and avalanche danger: Weak precipitation is expected starting in the afternoon and more likely towards the evening. Snow above 1400 m. Avalanche danger will continue to remain 1 (low) throughout the territory. Above 2000 m, on very steep northern slopes in shady areas, chance of generally small avalanches, in isolated cases, mainly with a high overload, due to the presence of fragile layers within the snow cover on a local level. Starting in the afternoon into the evening, fresh-snow avalanches are possible on the highest slopes, with weak cohesion.

Forecast for Thursday 31 March 2022, reliability: 60%

Increased risk of avalanches due to new snowfall.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2000 m
T.average 1000: 5 °C
T.average 2000: 0 °C

Weather by OSMER - ARPA FVG:
Moderate to abundant snowfall at approximately 1200 m. Moderate SW winds at high altitudes.

Snow cover conditions and avalanche danger: Moderate to abundant precipitation is expected throughout the entire mountain territory, snowfall generally over 1200 m and in the valley of the Tarvisian area. At high altitudes, moderate southwestern winds will blow. The expected avalanche danger will be 2 (moderate), increasing to 3 (considerable) during the day.
