

SNOW AVALANCHE REPORT n.54 the 30 March 2022

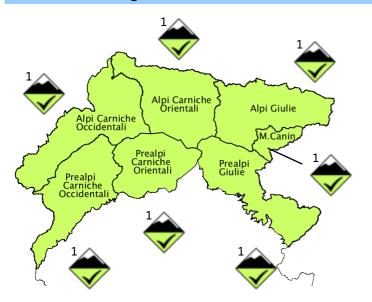

Situation of 30 March 2022 edition of the hours 14-next update 01-04-2022 hours 14, forecaster: MM

reliability: 90%

Weak snowfall starting in the afternoon.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi

SW 20 km/h

Thermal Zero: 2000 m T.average 1000: 6 °C T.average 2000: 0 °C

Weather by OSMER - ARPA FVG:

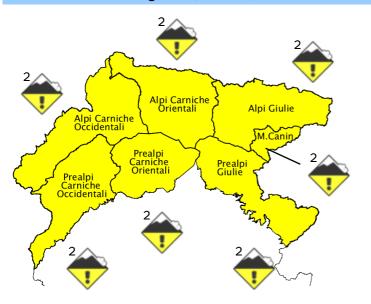

Overcast skies. Scattered showers, possible weak snowfall above 1500-1700 m, SW winds at highaltitudes.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	30	0	-1	5
VARMOST M.TE SIMONE	1870	11	0	-1	6
SELLA NEVEA - LIVINAL LUNC	1837	154	0	-2	3
PIANCAVALLO	1280	18	0	0	7
TARVISIO	800	0	0	3	18

Snow cover conditions and avalanche danger: Weak rainfall is expected starting in the afternoon and more likely towards the evening. Snowabove 1400 m. Avalanche danger will remain at 1 (low) throughout the territory. Above 2000 m,chance of generally small avalanches on very steep shady northern slopes, in isolated cases, with ahigh overload due to the localized presence of fragile layers within the snow cover. Starting in theafternoon/evening, fresh-snow avalanches with weak cohesion are possible on the highest slopes.

Forecast for Thursday 31 March 2022, reliability: 70%

Increase in avalanche danger to 2 (moderate) due to snowfall.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 1800 m T.average 1000: 6 °C T.average 2000: -1 °C

Weather by OSMER - ARPA FVG: Snowfall also abundant starting at 1200-1500 m.

Snow cover conditions and avalanche danger: Expected rainfall also abundant (30-35 cm), snowfall starting at 1200-1500 m throughout themountain. Avalanche danger will be 2 (moderate) on the Alps and Prealps beyond the treeline. Onsteep slopes, chance of both natural triggered avalanches, the latter mainly with a high overload. The avalanche phenomena will be generally small and medium in size and will mainly affect theslopes that were already covered with snow. In many areas, new snow will settle on the ground. Less snowfall under the treeline, therefore, avalanche danger will be 1 (low).

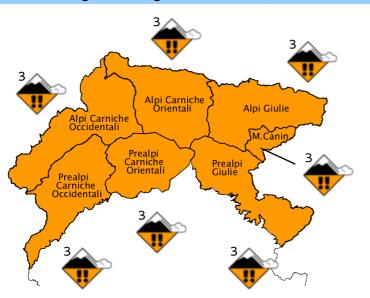

SNOW AVALANCHE REPORT n.54 the 30 March 2022

Forecast for Friday 01 April 2022, reliability: 70%

Avalanche danger increasing to 3 (considerable) above the treeline.

~ S\X/ 20

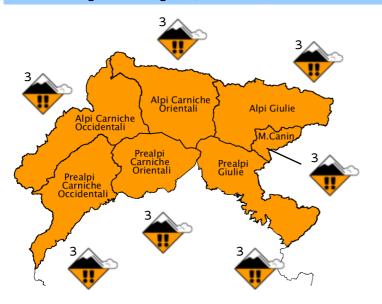

Thermal Zero: 1700 m T.average 1000: 5 °C T.average 2000: -1 °C

Weather by OSMER - ARPA FVG: Snowfall also abundant starting at 1000-1300 m.

Snow cover conditions and avalanche danger: More heavy snowfall (30-35 cm) during the day starting at 1000-1300 m. Avalanche danger on the Alps and Prealps will be 3 (considerable). On steep slopes, at all exposures, chance of both naturaland triggered avalanches, the latter on highest slopes, even with the passage of a single skiers orhikers. Avalanche phenomena will generally be medium in size, but larger avalanches are notexcluded, locally. The most dangerous areas are located on the northern slopes and, in particular, under walls, where there may still be weak layers inside the old snow cover. On steep grassy slopes, chance of glide avalanches. Less snowfall under the treeline, therefore, avalanche danger will be 2(moderate).

Forecast for Saturday 02 April 2022, reliability: 70%

Avalanche danger increasing to 3 (considerable) above the treeline.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

0 NE 20 km/h

Thermal Zero: 1200 m T.average 1000: 3 °C T.average 2000: -5 °C

Weather by OSMER - ARPA FVG: Weak snowfall starting at 600-800 m. Temperatures dropping.

Snow cover conditions and avalanche danger: Expected drop in temperatures and additional weak snowfall. The expected avalanche danger on theAlps and Prealps will be 3 (considerable) beyond the treeline and 2 (moderate) below.
