

Situation of 06 April 2022 edition of the hours 14-next update 08-04-2022 hours 14, forecaster: MA

reliability: 80%

Julian Alps and Canin area: avalanche danger 3 in afternoon; 2 throughout remaining of the territory

Alpi Giulie, M. Canin

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Prealpi Giulie

Thermal Zero: 2300 m
T.average 1000: 6 °C
T.average 2000: 0 °C

Weather by OSMER - ARPA FVG:

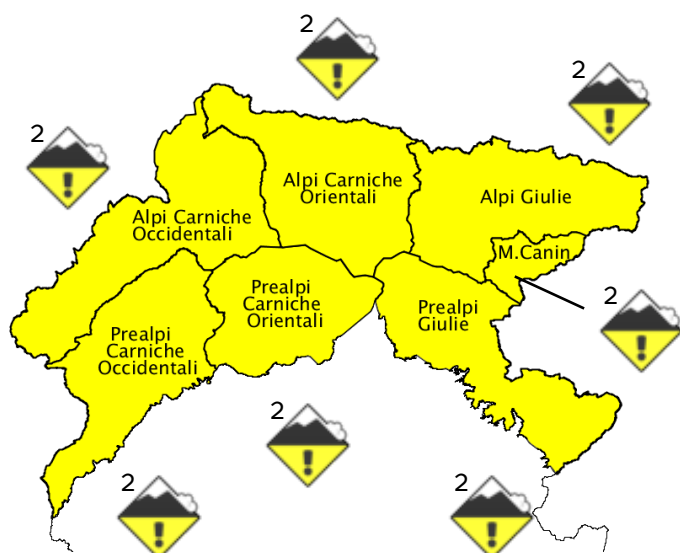

Slightly cloudy in Tarvisio. In the Prealps and Carnia region, mainly cloudy. Moderate SW wind at high altitude.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	72	0	-3	4
VARMOST M.TE SIMONE	1870	36	0	2,5	10
SELLA NEVEA - LIVINAL LUNC	1837	200	0	1	9
PIANCAVALLO	1280	38	0	-0,5	4
TARVISIO	800	0	0	-0,5	13

Snow cover conditions and avalanche danger: Due to a significant increase in temperature in the afternoon, avalanche danger is 3 (considerable) in the Julian Alps and in Canin area. Above the treeline on very steep slopes, chance of natural small- and medium-sized damp- or wet-snow, also large in certain areas, especially on sunny slopes. Triggered small- or medium- sized avalanches are also possible, even with the passage of individual skiers or hikers. In the Carnic Alps and Prealps, avalanche danger is 2 (moderate). Avalanche phenomena are generally small, but several larger avalanches are not excluded. On steep southern grassy slopes, glide avalanches are also possible throughout.

Forecast for Thursday 07 April 2022, reliability: 70%

Avalanche danger 2 (moderate) throughout the entire mountain territory.

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Alpi Giulie, M. Canin, Prealpi Giulie

Thermal Zero: 2500 m
T.average 1000: 7 °C
T.average 2000: 2 °C

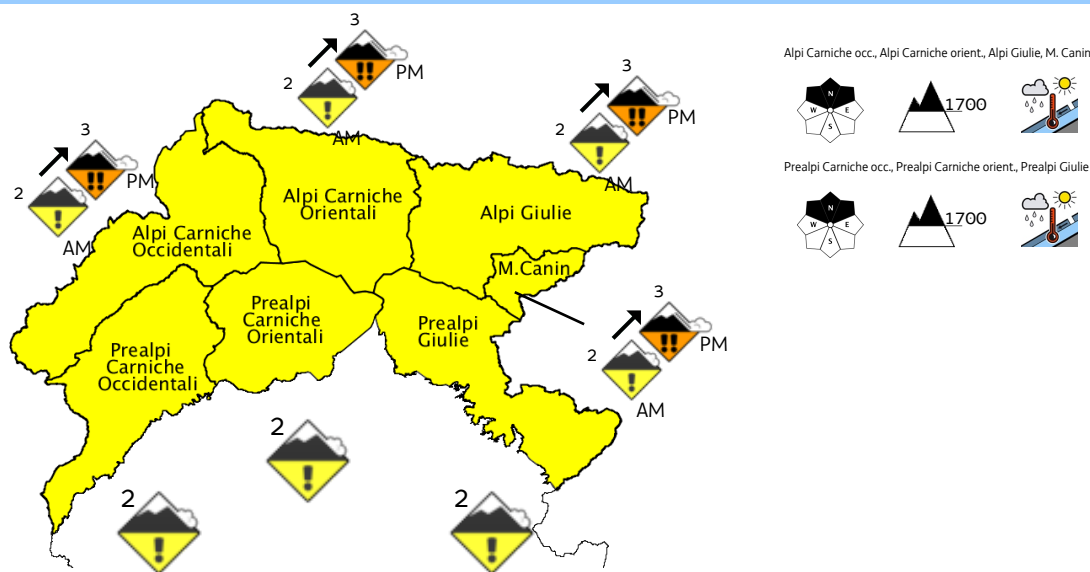

Weather by OSMER - ARPA FVG:

Variable skies with humid atmosphere towards evening: covered skies.

Snow cover conditions and avalanche danger: Variable skies in the morning, cloudy in the afternoon. Freezing temperatures at 2500. Avalanche danger will be 2 (moderate) throughout the mountain territory. In the morning, on very steep northern slopes at high altitudes, chance of triggered avalanches with high overload, which extends into the warmer hours on very steep slopes above the treeline at all exposures, with small- or medium-sized avalanches on a local level, even with the passage of a individual skiers or hikers. During warmer hours, natural small- and medium-sized wet-snow avalanches are possible, especially on sunny slopes. On steep southern grassy slopes, chance of avalanches throughout.

Forecast for Friday 08 April 2022, reliability: 60%

On Alps: avalanche danger 2 rising to 3; 2 throughout remaining territory.

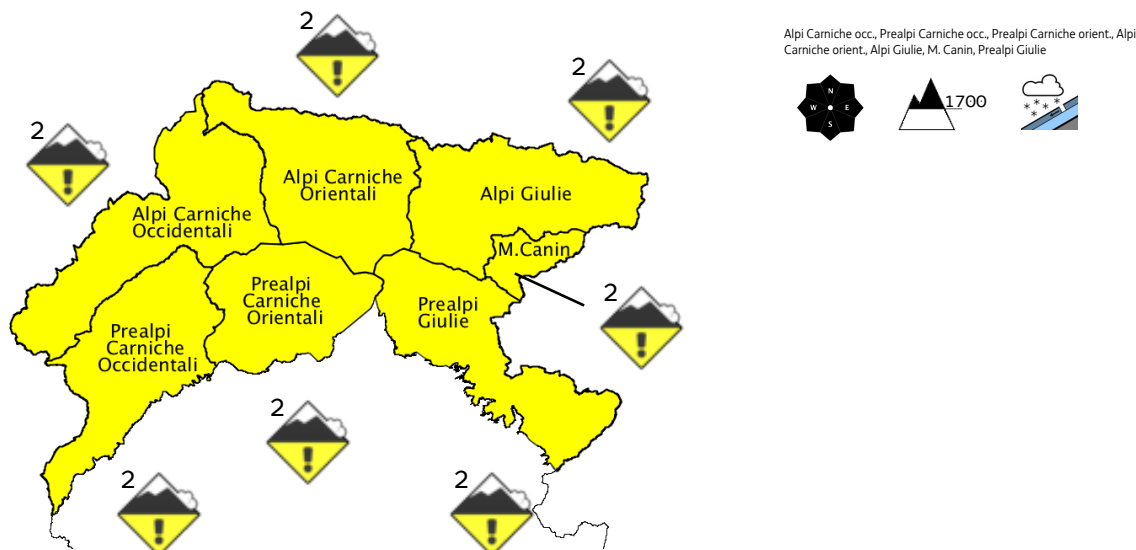

Thermal Zero: 2800 m
T.average 1000: 8 °C
T.average 2000: 3 °C

Weather by OSMER - ARPA FVG:
Covered skies with light rain from the afternoon and moderate SW winds at high altitudes.

Snow cover conditions and avalanche danger: Cloudy skies with light rainfall at the highest altitudes. Extremely damp and heavy snow cover. Avalanche danger will be 2 (moderate) rising to 3 (considerable) on the Alps during the day. With a rise in daytime temperature and rain during the day, above the treeline on very steep slopes, chance of natural and triggered avalanches, even with the passage of individual skiers or hikers. Avalanches will be small and medium in size, and in several cases large, especially on northern slopes with high overloaded. On the Prealps, avalanche danger will be 2 (moderate). Avalanches will be generally small, but larger ones are not excluded on northern slopes. On steep southern grassy slopes, chance of glide avalanches throughout.

Forecast for Saturday 09 April 2022, reliability: 60%

Avalanche danger 2 (moderate) throughout the mountain territory

Thermal Zero: 1800 m
T.average 1000: 5 °C
T.average 2000: -2 °C

Weather by OSMER - ARPA FVG:
Overcast skies with chance of light snowfall up to approximately 1200 m.

Snow cover conditions and avalanche danger: Overcast skies and decreasing temperatures. Predicted weak snowfall over 1200 m with moderate-strong winds. Avalanche danger will be 2 (moderate) throughout the mountain territory.
