

Situation of 11 April 2022 edition of the hours 14-next update 13-04-2022 hours 14, forecaster: GA

reliability: 80%

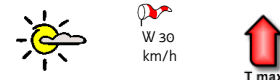

Avalanche danger 2 (moderate) on Alps and in Canin area, 1 (low) in Prealps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2500 m
T.average 1000: 4 °C
T.average 2000: 0 °C

Weather by OSMER - ARPA FVG:

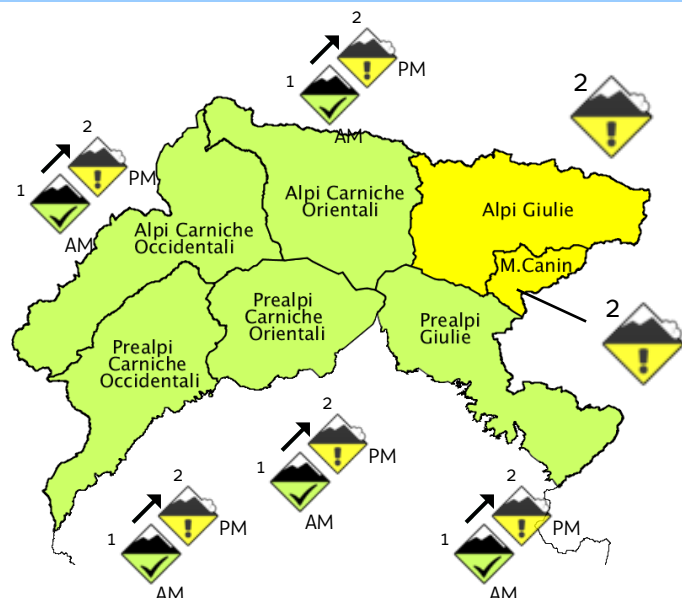

Clear or slightly cloudy skies, milder during day at high altitudes, increasing freezing point at approx. 3000 m.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
RIFUGIO TAMAI - ZONCOLAN	1750	52	0	-4	-1
VARMOST M.TE SIMONE	1870	15	0	-3,5	3
SELLA NEVEA - LIVINAL LUNC	1837	185	0	-4,5	1
PIANCAVALLO	1280	7	0	-1	4
TARVISIO	800	0	0	-5	13

Snow cover conditions and avalanche danger: On Saturday, 20 to 40 cm of new snow fell at 1800 m. Higher temperatures locally where storms were more intense. The new snow has consolidated well with the old snow. Wind at high altitudes has formed new accumulations in basins, gullies, and near the ridges. Significant increase in temperatures today in the afternoon. Avalanche danger is 2 (moderate) on the Julian Alps and in the Canin area above 1800 m and on the Carnic Alps above approximately 2300 m. In these areas, on very steep southern slopes, natural damp- or wet-snow avalanches. Triggered slab avalanches are possible on steep slopes, generally with high overload. Expected avalanche phenomena will be medium in size. On the Prealps, Alps, and Canin area below above mentioned altitudes, avalanche danger is 1 (low). Chance of wet-snow avalanches, generally small in size.

Forecast for Tuesday 12 April 2022, reliability: 80%

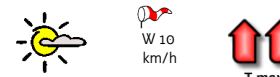

Avalanche danger 2 on Julian Alps and in Canin area, 1 elsewhere; increase during the day.

Alpi Giulie, M. Canin

Alpi Carniche occ., Prealpi Carniche occ., Prealpi Carniche orient., Alpi Carniche orient., Prealpi Giulie

Thermal Zero: 3300 m
T.average 1000: 6 °C
T.average 2000: 4 °C

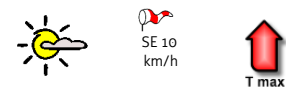

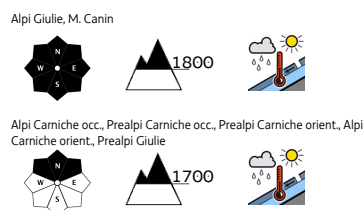

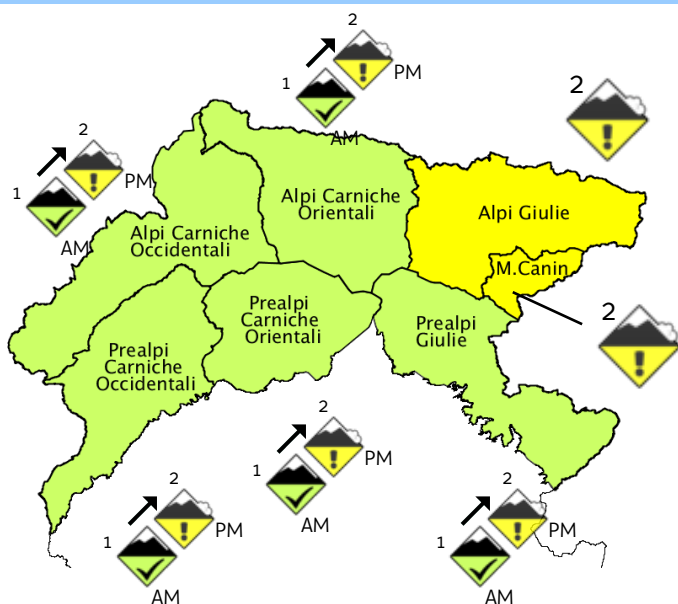

Weather by OSMER - ARPA FVG:

Slightly cloudy skies, hazy at high altitudes.
Increasing temperatures with freezing point
above approx. 3000m.

Snow cover conditions and avalanche danger: Slightly cloudy skies with freezing point at 3300 m. On the Julian Alps and in the Canin area, avalanche danger will be 2 (moderate). In the morning, snow cover will be mainly stable, except at maximum altitudes of northern slopes where, on an isolated level, the chance of triggered small- or medium-sized avalanches still exists, generally with high overload. With the heat of the sun and an increase in daytime temperature, natural avalanches of damp- or wet-snow on very steep slopes at all exposures are possible as early as late morning. The expected phenomena are mainly medium in size. During the warmer hours, triggered medium-sized slab avalanches are possible on steep slopes, even with the passage of individual skiers or hikers. On the Carnic and Prealps above the treeline, avalanche danger will be 1 (low) in the morning, increasing to 2 (moderate) from late morning. On very steep slopes, chance of damp- or wet-snow, small- or medium-sized avalanches.

Forecast for Wednesday 13 April 2022, reliability: 70%

Avalanche danger 2 on Julian Alps and in Canin area, 1 elsewhere; increase during the day.

Thermal Zero: 3500 m
T.average 1000: 8 °C
T.average 2000: 5 °C

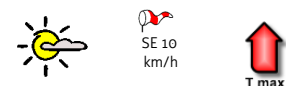

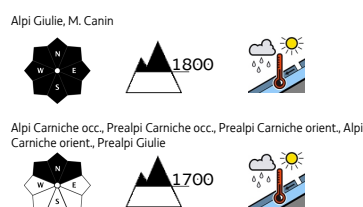

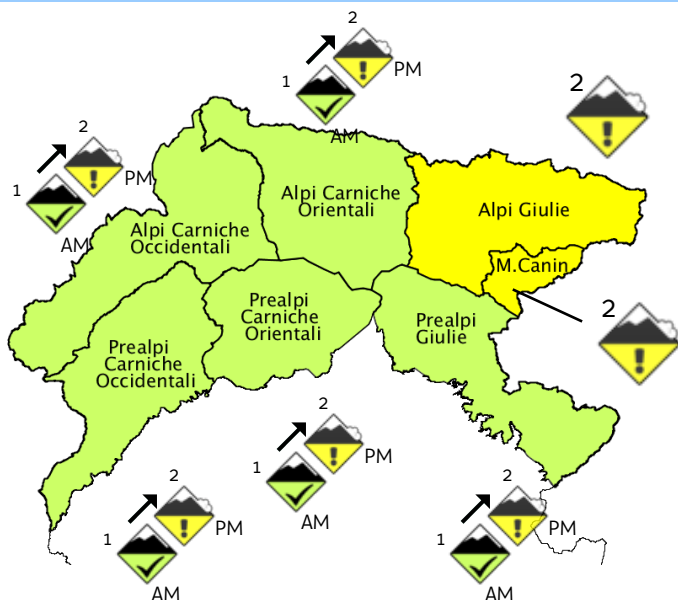

Weather by OSMER - ARPA FVG:

Slightly cloudy skies, hazy at high altitudes.
Increasing temperatures with freezing point
above approx 3500m.

Snow cover conditions and avalanche danger: Slightly cloudy, with freezing point at 3500 m. On the Julian Alps and in the Canin area, avalanche danger will be 2 (moderate).
