

Situation of 26 April 2022 edition of the hours 14-next update 27-04-2022 hours 14, forecaster: MM

reliability: 80%

Avalanche danger 2 (moderate) on the Alps, 1 (low) on the Pre-Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2200 m
T.average 1000: 8 °C
T.average 2000: 1 °C

Weather by OSMER - ARPA FVG:

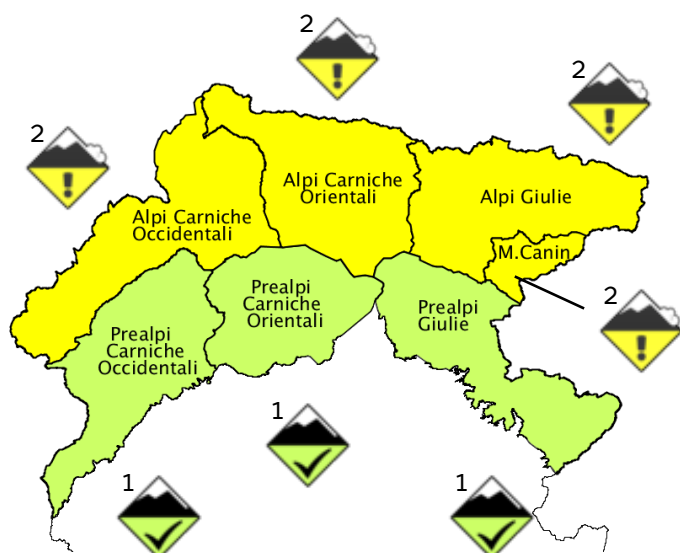

Cloudy skies and precipitation still possible.
From the afternoon, abundant rain, with
snow up to approx.1500 m.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
PIANCAVALLO	1280	0	0	4	5
TARVISIO	800	0	0	6	17
SELLA NEVEA - LIVINAL LUNC	1837	184	6	1	10,5
RIFUGIO TAMAI - ZONCOLAN	1750	20	1	0	2,5
VARMOST M.TE SIMONE	1870	4	1	1	6

Snow cover conditions and avalanche danger: Continued moderate to heavy rainfall, more insistent in the Canin area, with snow above 2000 m, falling to 1500 m in the evening. In the Alps, avalanche danger is 2 (moderate). At high altitudes, wind-blown snow accumulations have formed. Others may form with the expected precipitation. In particular, on very steep northern slopes above 2000 m, especially on the Julian Alps and in the Canin area, chance of triggered small- and locally medium-sized avalanches, even with a low overload. Snow may detach from rock walls due to weak dry cohesion. On the Prealps, avalanche danger is 1 (low). Throughout the territory, under 2000 m, small- to medium-sized avalanches of wet or damp snow are possible.

Forecast for Wednesday 27 April 2022, reliability: 80%

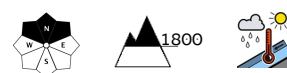

Avalanche danger 2 (moderate) on the Alps, 1 (low) on the Pre-Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2200 m
T.average 1000: 8 °C
T.average 2000: 1 °C

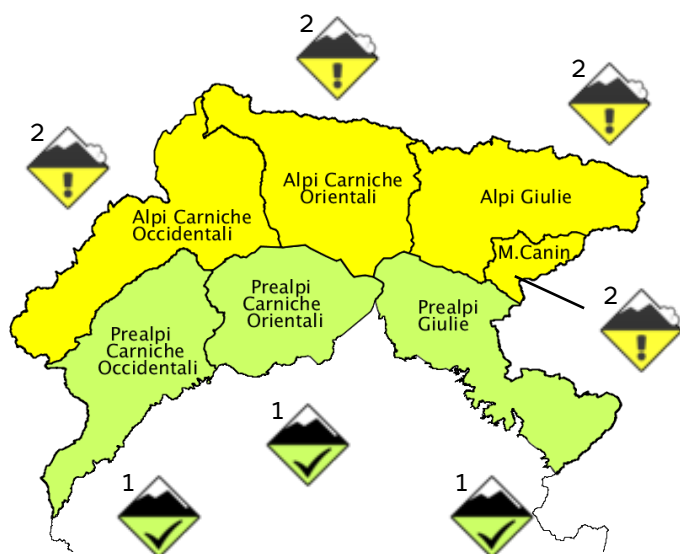

Weather by OSMER - ARPA FVG:

During the day, variable skies with clearings,
and afternoon clouds and local showers,
especially in the Prealps.

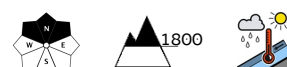

Snow cover conditions and avalanche danger: Variable skies. In the Alps, avalanche danger will be 2 (moderate). Especially on very steep slopes, usually over 2000 m, on the Julian Alps and in the Canin, chance in the morning of triggered small and locally dry-snow avalanches, even with a low overload. During the day, due to a rise in daytime temperatures and sunshine, natural avalanche activity will resume on very steep slopes with small- and medium-size, damp- or wet-snow avalanches. During warmer hours, triggered small- and medium-sized avalanches are possible even with the passage of skiers. On the Prealps, avalanche danger will be 1 (low), since there is little snow present.

Forecast for Thursday 28 April 2022, reliability: 70%

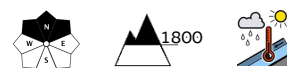

Avalanche danger 2 (moderate) on the Alps, 1 (low) on the Pre-Alps.

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2200 m
T.average 1000: 10 °C
T.average 2000: 2 °C

Weather by OSMER - ARPA FVG:

Clear or slightly cloudy skies. In the afternoon, variably cloudy weather will continue.

Snow cover conditions and avalanche danger: Cloudy or clear skies and rising temperatures. In the Alps, avalanche danger will be 2 (moderate). In the early morning, on very steep northern slopes over 2000 m, especially in the Julian and Canin Alps, chance of triggered small- and locally medium-sized avalanches, generally with high overload. During the day, due to the daytime rise in temperatures and sunshine, spontaneous avalanche activity will resume on very steep slopes with small- and medium-sized avalanches of damp or wet snow. During warmer hours, triggered small- and medium-sized avalanches may also take place, even with the passage of individual skier. On the Prealps, avalanche danger will be 1 (low), since there is little snow present.
