

Situation of 27 April 2022 edition of the hours 14-next update 29-04-2022 hours 14, forecaster: MA

reliability: 80%

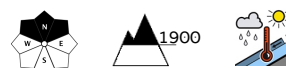

On the Alps the danger is 2 (moderate) on the Pre-Alps 1 (weak).

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2200 m  
T.average 1000: 8 °C  
T.average 2000: 1 °C

**Weather by OSMER - ARPA FVG:**

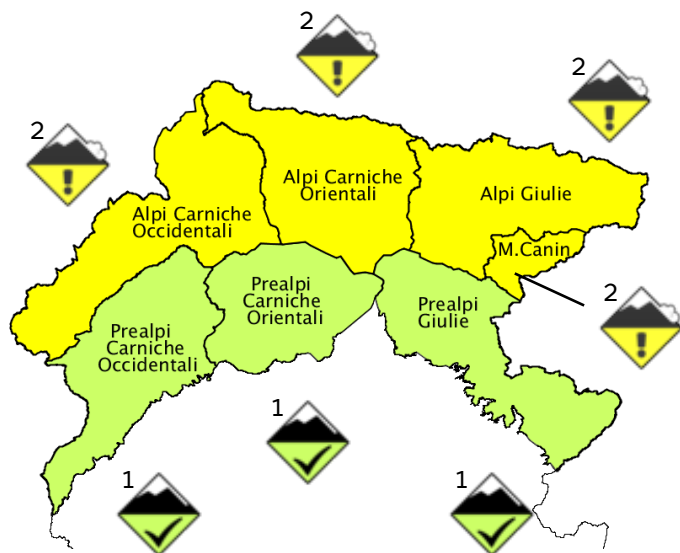

During the day, variable skies with clearings, and afternoon clouds and local showers, especially in the Prealps.

Station	quota (m)	snow depth (cm)	fresh snow (cm)	Tmin (°C)	Tmax (°C)
PIANCAVALLO	1280	0	0	0	6
TARVISIO	800	0	0	5	15
SELLA NEVEA - LIVINAL LUNC	1837	186	10	-1	4,5
RIFUGIO TAMAI - ZONCOLAN	1750	14	2	0	3
VARMOST M.TE SIMONE	1870	4	2	-0,5	3

**Snow cover conditions and avalanche danger:** On the Alps, avalanche danger is 2 (moderate). On very steep slopes, over 2000 m, especially in the Julian Alps and Canin area, chance of triggered small- and medium-sized dry-snow slab avalanches, even with low overload, due to the presence of wind-blown accumulations. During the day, due to rise in daytime temperatures and sunshine, natural avalanche activity will resume on very steep slopes, with damp- or wet-snow, small- and medium-sized avalanches. During warmer hours, chance of triggered small- and medium-sized avalanches, even with the passage of individual skiers. On the Prealps, avalanche danger is 1 (low), since there is little snow present.

Forecast for Thursday 28 April 2022, reliability: 70%

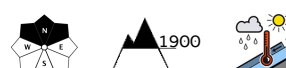

On the Alps the danger is 2 (moderate) on the Pre-Alps 1 (weak).

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2200 m  
T.average 1000: 9 °C  
T.average 2000: 2 °C

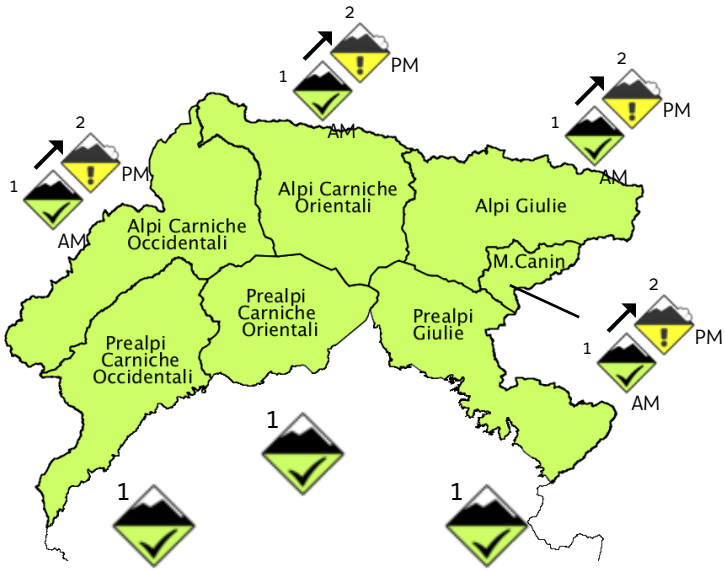

**Weather by OSMER - ARPA FVG:**

Clear skies in the morning. Along the Prealpine range, chance of slight temporary cloud cover.

**Snow cover conditions and avalanche danger:** Cloudy or clear skies and rising temperatures. On the Alps, avalanche danger will 2 (moderate). In the early morning, on very steep northern slopes over 2000 m, especially on the Julian Alps and Canin area, chance of triggered small- and locally medium-sized avalanches, generally with high overload. Freezing over again over night but, during the day, with a rise in daytime temperatures and the sunshine, natural avalanche activity will resume again, on very steep slopes, with small- and medium-sized, damp- or wet-snow, avalanches. During warmer hours, chance of triggered small- and medium-sized avalanches, even with the passage of individual skiers. On the Prealps, avalanche danger is 1 (low), since there is little snow present.

Forecast for Friday 29 April 2022, reliability: 70%

**On the Alps, increase avalanche danger from 1 (low) to 2 (moderate) during the day.**

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2400 m  
T.average 1000: 10 °C  
T.average 2000: 2 °C

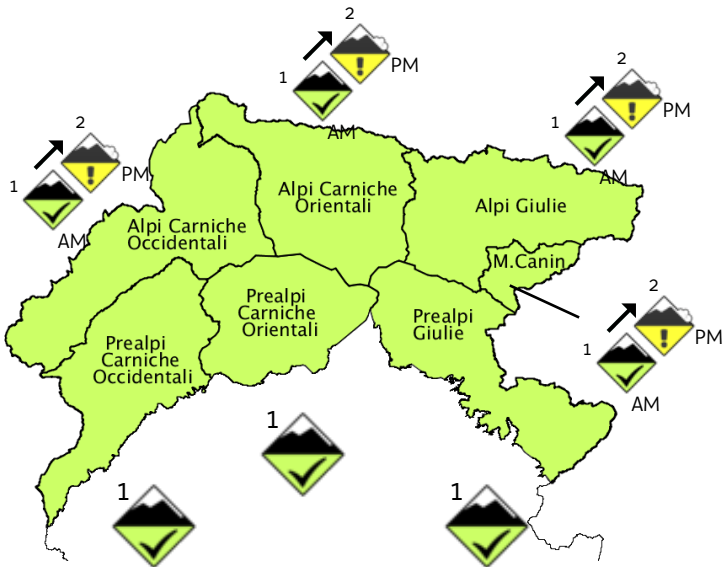

**Weather by OSMER - ARPA FVG:**

Clear skies in the morning. Along the Prealpine range, chance of slight temporary cloud cover.

**Snow cover conditions and avalanche danger:** Cloudless skies, freezing during the night. On the Alps, avalanche danger will increase from 1 (low) to 2 (moderate) during the day, due to an increase in freezing temperatures, rising to approximately 2400m. On the steepest sunny slopes, chance of damp- or wet-snow avalanches, generally small and medium in size. At an isolated level, on very steep northern slopes, avalanches may partly involve the old snow cover and become larger. During warmer hours, triggered small- and medium-sized avalanches are also possible with the passage of individual skiers. On the Prealps, avalanche danger will be 1 (low), since there is little snow present.

Forecast for Saturday 30 April 2022, reliability: 60%

**On the Alps, increase avalanche danger from 1 (low) to 2 (moderate) during the day.**

Alpi Carniche occ., Alpi Carniche orient., Alpi Giulie, M. Canin

Prealpi Carniche occ., Prealpi Carniche orient., Prealpi Giulie

Thermal Zero: 2500 m  
T.average 1000: 10 °C  
T.average 2000: 2 °C

**Weather by OSMER - ARPA FVG:**

Generally clear skies in the morning, then slightly little cloudy due to haze.

**Snow cover conditions and avalanche danger:** On the Alps, avalanche danger will increase from 1 (low) to 2 (moderate) during the day, due to an increase in freezing temperatures, rising to approximately 2400 m. On the steepest sunny slopes, chance of damp- or wet-snow avalanches, generally small and medium in size. At an isolated level, on very steep northern slopes, avalanches may partly involve the old snow cover and become larger. During warmer hours, triggered small- and medium-sized avalanches are also possible with the passage of individual skiers. On the Prealps, avalanche danger will be 1 (low), since there is little snow present.
